

Contents

Preface	
Chapter 1: introduction	
1.1 Introduction	2
1.2 Different types of energy dissipation systems	3
1.3 Energy absorbers	6
Chapter 2: Multi-criteria Decision Making Methods	
2.1 Introduction	12
2.2 COPRAS method.....	13
2.2.1 Worked example using the COPRAS	16
2.3 TOPSIS method.....	18
2.3.1 Worked example using the TOPSIS	20
Chapter 3: Finite Element Modeling of Impact	
3.1 Introduction	26
3.2 LS-DYNA software	26
3.3 Different types of loading	28
3.3.1 Quasi-static loading.....	29
3.3.2 Dynamic loading.....	30
3.4 Types of loading angle	31
3.5 Finite element modeling under dynamic loading	32
3.6 Finite element modeling under quasi-static loading	42
3.7 Finite element modeling of foam filled tubes under dynamic loading.....	46
3.8 Processing and extracting the results in LS-DYNA.....	50
Chapter 4: Numerical Evaluation of the Crashworthiness Capacity of Energy Absorbers	
4.1 Introduction	56
4.2 Crashworthiness indicators.....	56
4.3 Straight structures under quasi-static loading	57
4.3.1 Single-cell tubes.....	57

4.3.1.1 Problem description	57
4.3.1.2 Finite element modeling	58
4.3.1.3 Collapse behavior	59
4.3.1.4 Selection of the best multi-cell tube using the COPRAS method	59
4.3.2 Multi-cell tubes	64
4.3.2.1 Problem description	64
4.3.2.2 Finite element modeling	64
4.3.2.3 Collapse behavior	65
4.3.2.4 Selection of the best multi-cell tube using the TOPSIS	66
4.4 Tapered structures under dynamic loading	70
4.4.1 Bitubal columns	70
4.4.1.1 Problem description	70
4.4.1.2 Finite element modeling	72
4.4.1.3 Collapse behavior	72
4.4.1.4 Selection of the best tube using the TOPSIS method	76
4.4.2 Double-cell tapered tubes	78
4.4.2.1 Problem description	78
4.4.2.2 Finite element modeling	79
4.4.2.3 Collapse behavior	80
4.4.2.4 Selection of the best tube using the COPRAS	82
4.5 S-shaped structures	84
4.5.1 Problem description	84
4.5.2 Finite element modeling	86
4.5.3 Collapse behavior	86
4.5.4 Crashworthiness comparison of S-rails using the COPRAS	87
4.6 Multi-cell tubes filled with foam	92
4.6.1 Problem description	92
4.6.2 Finite element modeling	94
4.6.3 Collapse behavior	94
