Chapter 1			
Aircraft Engines	1-1		
General Requirements.....	1-1	Cylinder Numbering.....	1-16
Power and Weight.....	1-2	Firing Order	1-16
Fuel Economy	1-3	Single-Row Radial Engines	1-16
Durability and Reliability.....	1-3	Double-Row Radial Engines.....	1-17
Operating Flexibility	1-3	Valves	1-17
Compactness	1-3	Valve Construction.....	1-17
Powerplant Selection.....	1-3	Valve Operating Mechanism	1-18
Types of Engines.....	1-4	Cam Rings.....	1-19
Inline Engines.....	1-4	Camshaft	1-20
Opposed or O-Type Engines.....	1-4	Tappet Assembly.....	1-20
V-Type Engines	1-5	Solid Lifters/Tappets.....	1-21
Radial Engines	1-5	Hydraulic Valve Tappets/Lifters.....	1-21
Reciprocating Engines	1-5	Push Rod	1-21
Design and Construction.....	1-5	Rocker Arms	1-22
Crankcase Sections.....	1-5	Valve Springs.....	1-22
Accessory Section	1-7	Bearings	1-22
Accessory Gear Trains	1-7	Plain Bearings	1-23
Crankshafts	1-8	Ball Bearings.....	1-23
Crankshaft Balance	1-10	Roller Bearings.....	1-23
Dynamic Dampers.....	1-10	Propeller Reduction Gearing.....	1-24
Connecting Rods.....	1-10	Propeller Shafts.....	1-24
Master-and-Articulated Rod Assembly.....	1-11	Reciprocating Engine Operating Principles.....	1-24
Knuckle Pins	1-12	Operating Cycles.....	1-26
Plain-Type Connecting Rods	1-12	Four-Stroke Cycle	1-26
Fork-and-Blade Rod Assembly.....	1-12	Intake Stroke.....	1-27
Pistons	1-12	Compression Stroke	1-27
Piston Construction	1-12	Power Stroke	1-27
Piston Pin	1-13	Exhaust Stroke.....	1-28
Piston Rings	1-14	Two-Stroke Cycle	1-28
Piston Ring Construction	1-14	Rotary Cycle.....	1-28
Compression Ring.....	1-14	Diesel Cycle	1-28
Oil Control Rings	1-14	Reciprocating Engine Power and Efficiencies.....	1-28
Oil Scraper Ring.....	1-14	Work.....	1-28
Cylinders	1-14	Horsepower	1-28
Cylinder Heads.....	1-15	Piston Displacement.....	1-29
Cylinder Barrels	1-16	Area of a Circle	1-29
		Example.....	1-29
		Compression Ratio	1-29
		Indicated Horsepower	1-31
		Example.....	1-32
		Brake Horsepower.....	1-32
		Example.....	1-33
		Friction Horsepower.....	1-33
		Friction and Brake Mean Effective Pressures.....	1-33
		Thrust Horsepower.....	1-35
		Efficiencies.....	1-35

Thermal Efficiency.....	1-35	Accelerating Pump.....	2-21
Example.....	1-35	Manual Mixture Control.....	2-21
Mechanical Efficiency.....	1-36	Fuel-Injection Systems.....	2-22
Volumetric Efficiency.....	1-36	Bendix/Precision Fuel-Injection System.....	2-22
Propulsive Efficiency.....	1-37	Fuel Injector.....	2-22
Gas Turbine Engines.....	1-37	Airflow Section.....	2-22
Types and Construction.....	1-37	Regulator Section.....	2-22
Air Entrance.....	1-38	Fuel Metering Section.....	2-23
Accessory Section.....	1-38	Flow Divider.....	2-23
Compressor Section.....	1-39	Fuel Discharge Nozzles.....	2-24
Compressor Types.....	1-40	Continental/TCM Fuel-Injection System.....	2-25
Centrifugal-Flow Compressors.....	1-40	Fuel-Injection Pump.....	2-25
Axial-Flow Compressor.....	1-41	Fuel/Air Control Unit.....	2-27
Diffuser.....	1-44	Fuel Control Assembly.....	2-27
Combustion Section.....	1-44	Fuel Manifold Valve.....	2-28
Turbine Section.....	1-47	Fuel Discharge Nozzle.....	2-28
Exhaust Section.....	1-52	Carburetor Maintenance.....	2-30
Gas Turbine Engine Bearings and Seals.....	1-53	Carburetor Removal.....	2-30
Turboprop Engines.....	1-56	Installation of Carburetor.....	2-30
Turboshaft Engines.....	1-56	Rigging Carburetor Controls.....	2-30
Turbofan Engines.....	1-57	Adjusting Idle Mixtures.....	2-30
Turbine Engine Operating Principles.....	1-57	Idle Speed Adjustment.....	2-32
Thrust.....	1-59	Fuel System Inspection and Maintenance.....	2-32
Gas Turbine Engine Performance.....	1-60	Complete System.....	2-33
Ram Recovery.....	1-62	Fuel Tanks.....	2-33
		Lines and Fittings.....	2-33
		Selector Valves.....	2-33
		Pumps.....	2-33
		Main Line Strainers.....	2-34
		Fuel Quantity Gauges.....	2-34
		Fuel Pressure Gauge.....	2-34
		Pressure Warning Signal.....	2-34
		Water Injection Systems for Reciprocating Engines.....	2-34
		Turbine Engine Fuel System—General Requirements.....	2-34
		Turbine Fuel Controls.....	2-35
		Hydromechanical Fuel Control.....	2-35
		Hydromechanical/Electronic Fuel Control.....	2-35
		FADEC Fuel Control Systems.....	2-37
		FADEC for an Auxiliary Power Unit.....	2-37
		FADEC Fuel Control Propulsion Engine.....	2-39
		Fuel System Operation.....	2-41
		Water Injection System.....	2-41
		Fuel Control Maintenance.....	2-42
		Engine Fuel System Components.....	2-43
		Main Fuel Pumps (Engine Driven).....	2-43
		Fuel Heater.....	2-43
		Fuel Filters.....	2-44
		Fuel Spray Nozzles and Fuel Manifolds.....	2-45
		Simplex Fuel Nozzle.....	2-46
		Duplex Fuel Nozzle.....	2-46
		Airblast Nozzles.....	2-46
		Flow Divider.....	2-46
		Fuel Pressurizing and Dump Valves.....	2-47
		Combustion Drain Valves.....	2-47

Chapter 2

Engine Fuel and Fuel Metering Systems2-1

Fuel System Requirements.....	2-1
Vapor Lock.....	2-2
Basic Fuel System.....	2-2
Fuel Metering Devices for Reciprocating Engines.....	2-3
Fuel/Air Mixtures.....	2-4
Carburetion Principles.....	2-5
Venturi Principles.....	2-5
Application of Venturi Principle to Carburetor.....	2-6
Metering and Discharge of Fuel.....	2-6
Carburetor Systems.....	2-8
Carburetor Types.....	2-9
Carburetor Icing.....	2-9
Float-Type Carburetors.....	2-10
Float Chamber Mechanism System.....	2-10
Main Metering System.....	2-11
Idling System.....	2-12
Mixture Control System.....	2-13
Accelerating System.....	2-14
Economizer System.....	2-14
Pressure Injection Carburetors.....	2-15
Typical Injection Carburetor.....	2-15
Throttle Body.....	2-16
Regulator Unit.....	2-16
Fuel Control Unit.....	2-18
Automatic Mixture Control (AMC).....	2-19
Stromberg PS Carburetor.....	2-20

Fuel Quantity Indicating Units.....	2-48
-------------------------------------	------

Chapter 3

Induction and Exhaust Systems3-1

Reciprocating Engine Induction Systems	3-1
Basic Carburetor Induction System	3-2
Induction System Icing.....	3-4
Induction System Filtering	3-5
Induction System Inspection and Maintenance.....	3-5
Induction System Troubleshooting	3-5
Supercharged Induction Systems	3-5
Internally Driven Superchargers	3-6
Turbosuperchargers	3-8
Normalizer Turbocharger.....	3-11
Ground-Boosted Turbosupercharger System.....	3-11
A Typical Turbosupercharger System.....	3-13
Turbocharger Controllers and System Descriptions	3-15
Variable Absolute Pressure Controller (VAPC).....	3-16
Sloped Controller	3-16
Absolute Pressure Controller.....	3-17
Turbocharger System Troubleshooting	3-17
Turbine Engine Inlet Systems.....	3-17
Divided-Entrance Duct.....	3-19
Variable-Geometry Duct.....	3-19
Compressor Inlet Screens.....	3-20
Bellmouth Compressor Inlets.....	3-20
Turboprop and Turboshaft Compressor Inlets	3-21
Turbofan Engine Inlet Sections.....	3-21
Reciprocating Engine Exhaust Systems.....	3-22
Radial Engine Exhaust Collector Ring System.....	3-23
Manifold and Augmentor Exhaust Assembly	3-24
Reciprocating Engine Exhaust System	
Maintenance Practices.....	3-24
Exhaust System Inspection	3-24
Muffler and Heat Exchanger Failures	3-25
Exhaust Manifold and Stack Failures	3-25
Internal Muffler Failures	3-25
Exhaust Systems with Turbocharger	3-26
Augmentor Exhaust System.....	3-26
Exhaust System Repairs.....	3-26
Turbine Engine Exhaust Nozzles	3-26
Convergent Exhaust Nozzle.....	3-28
Convergent-Divergent Exhaust Nozzle.....	3-28
Thrust Reversers	3-28
Afterburning/Thrust Augmentation	3-29
Thrust Vectoring	3-31
Engine Noise Suppression	3-31
Turbine Engine Emissions	3-33

Chapter 4

Engine Ignition and Electrical Systems 4-1

Reciprocating Engine Ignition Systems.....	4-1
Magneto-Ignition System Operating Principles.....	4-2
High-Tension Magneto System Theory of Operation.....	4-2

Magnetic Circuit.....	4-2
Primary Electrical Circuit.....	4-4
Secondary Electrical Circuit.....	4-6
Magneto and Distributor Venting	4-7
Ignition Harness	4-8
Ignition Switches.....	4-9
Single and Dual High-Tension System Magnetos	4-10
Magneto Mounting Systems	4-10
Low-Tension Magneto System	4-10
FADEC System Description.....	4-12
Low-Voltage Harness.....	4-13
Electronic Control Unit (ECU).....	4-14
PowerLink Ignition System.....	4-14
Auxiliary Ignition Units.....	4-15
Booster Coil	4-15
Impulse Coupling.....	4-17
High-Tension Retard Breaker Vibrator.....	4-18
Low-Tension Retard Breaker Vibrator	4-19
Spark Plugs	4-20
Reciprocating Engine Ignition System	
Maintenance and Inspection	4-22
Magneto-Ignition Timing Devices.....	4-23
Built-In Engine Timing Reference Marks.....	4-23
Timing Disks.....	4-24
Piston Position Indicators.....	4-24
Timing Lights.....	4-24
Checking the Internal Timing of a Magneto.....	4-25
High-Tension Magneto E-Gap Setting	
(Bench Timing)	4-26
Timing the High-tension Magneto to the Engine.....	4-27
Performing Ignition System Checks	4-27
Ignition Switch Check.....	4-28
Maintenance and Inspection of Ignition Leads	4-28
Replacement of Ignition Harness	4-29
Checking Ignition Induction Vibrator Systems.....	4-30
Spark Plug Inspection and Maintenance.....	4-30
Carbon Fouling of Spark Plugs	4-30
Oil Fouling of Spark Plugs.....	4-30
Lead Fouling of Spark Plugs.....	4-31
Graphite Fouling of Spark Plugs.....	4-31
Gap Erosion of Spark Plugs	4-32
Spark Plug Removal.....	4-32
Spark Plug Reconditioning Service	4-33
Inspection Prior to Installation	4-34
Spark Plug Installation	4-35
Spark Plug Lead Installation	4-35
Breaker Point Inspection.....	4-36
Dielectric Inspection	4-38
Ignition Harness Maintenance.....	4-38
High-Tension Ignition Harness Faults	4-38
Harness Testing.....	4-39
Turbine Engine Ignition Systems.....	4-40
Capacitor Discharge Exciter Unit	4-41
Igniter Plugs	4-42

Turbine Ignition System Inspection and Maintenance	4-42
Inspection	4-43
Check System Operation	4-43
Repair	4-43
Removal, Maintenance, and Installation of	
Ignition System Components	4-43
Ignition System Leads	4-44
Igniter Plugs	4-44
Powerplant Electrical Systems	4-45
Wire Size	4-45
Factors Affecting the Selection of Wire Size	4-47
Factors Affecting Selection of Conductor Material	4-47
Conductor Insulation	4-49
Identifying Wire and Cable	4-50
Electrical Wiring Installation	4-51
Wire Groups and Bundles	4-51
Twisting Wires	4-52
Spliced Connections in Wire Bundles	4-52
Slack in Wiring Bundles	4-52
Bend Radii	4-52
Routing and Installation	4-53
Protection Against Chafing	4-53
Protection Against High Temperature	4-53
Protection Against Solvents and Fluids	4-54
Protection of Wires in Wheel Well Area	4-54
Routing Precautions	4-54
Installation of Cable Clamps	4-54
Lacing and Tying Wire Bundles	4-55
Single-Cord Lacing	4-55
Double-Cord Lacing	4-56
Lacing Branch-Offs	4-56
Tying	4-57
Cutting Wire and Cable	4-58
Stripping Wire and Cable	4-58
Solderless Terminals and Splices	4-59
Copper Wire Terminals	4-59
Crimping Tools	4-60
Aluminum Wire Terminals	4-60
Splicing Copper Wires Using Preinsulated Wires	4-61
Emergency Splicing Repairs	4-61
Splicing with Solder and Potting Compound	4-61
Connecting Terminal Lugs to Terminal Blocks	4-62
Bonding and Grounding	4-62
General Bonding and Grounding Procedures	4-63
Connectors	4-65
Types of Connectors	4-65
Connector Identification	4-65
Installation of Connectors	4-65
Conduit	4-67
Electrical Equipment Installation	4-67
Electrical Load Limits	4-67
Controlling or Monitoring the Electrical Load	4-67
Circuit Protection Devices	4-68
Switches	4-68
Relays	4-69
Chapter 5	
Engine Starting Systems	5-1
Introduction	5-1
Reciprocating Engine Starting Systems	5-2
Inertia Starters	5-2
Direct Cranking Electric Starter	5-2
Direct Cranking Electric Starting System for	
Large Reciprocating Engines	5-3
Direct Cranking Electric Starting System for	
Small Aircraft	5-7
Reciprocating Engine Starting System	
Maintenance Practices	5-7
Troubleshooting Small Aircraft Starting Systems	5-8
Gas Turbine Engine Starters	5-8
Electric Starting Systems and Starter Generator	
Starting System	5-10
Troubleshooting a Starter Generator Starting System	5-13
Air Turbine Starters	5-13
Air Turbine Starter Troubleshooting Guide	5-16
Chapter 6	
Lubrication and Cooling Systems	6-1
Principles of Engine Lubrication	6-1
Types of Friction	6-2
Functions of Engine Oil	6-2
Requirements and Characteristics of Reciprocating	
Engine Lubricants	6-2
Viscosity	6-3
Viscosity Index	6-3
Flash Point and Fire Point	6-3
Cloud Point and Pour Point	6-3
Specific Gravity	6-4
Reciprocating Engine Lubrication Systems	6-5
Combination Splash and Pressure Lubrication	6-5
Lubrication System Requirements	6-5
Dry Sump Oil Systems	6-5
Oil Tanks	6-5
Oil Pump	6-7
Oil Filters	6-7
Oil Pressure Regulating Valve	6-8
Oil Pressure Gauge	6-9
Oil Temperature Indicator	6-10
Oil Cooler	6-10
Oil Cooler Flow Control Valve	6-10
Surge Protection Valves	6-10
Airflow Controls	6-11
Dry Sump Lubrication System Operation	6-12
Wet-Sump Lubrication System Operation	6-13
Lubrication System Maintenance Practices	6-14
Oil Tank	6-14
Oil Cooler	6-14
Oil Temperature Bulbs	6-16

Pressure and Scavenge Oil Screens.....	6-16
Oil Pressure Relief Valve.....	6-17
Recommendations for Changing Oil	6-18
Draining Oil	6-18
Oil and Filter Change and Screen Cleaning.....	6-18
Oil Filter Removal Canister Type Housing	6-18
Oil Filter/Screen Content Inspection.....	6-18
Assembly of and Installation of Oil Filters	6-19
Troubleshooting Oil Systems	6-19
Requirements for Turbine Engine Lubricants.....	6-19
Turbine Oil Health and Safety Precautions.....	6-20
Spectrometric Oil Analysis Program	6-21
Typical Wear Metals and Additives.....	6-21
Turbine Engine Lubrication Systems.....	6-21
Turbine Lubrication System Components	6-22
Oil Tank	6-22
Oil Pump	6-23
Turbine Oil Filters.....	6-24
Oil Pressure Regulating Valve.....	6-25
Oil Pressure Relief Valve.....	6-25
Oil Jets.....	6-25
Lubrication System Instrumentation.....	6-26
Lubrication System Breather Systems (Vents.....	6-26
Lubrication System Check Valve.....	6-27
Lubrication System Thermostatic Bypass Valves.....	6-27
Air Oil Coolers.....	6-28
Fuel Oil Coolers	6-28
Deoiler.....	6-28
Magnetic Chip Detectors.....	6-28
Typical Dry-Sump Pressure Regulated Turbine Lubrication System	6-28
Pressure System	6-29
Scavenge System.....	6-29
Breather Pressurizing System	6-30
Typical Dry-Sump Variable Pressure Lubrication System	6-30
Pressure Subsystem.....	6-31
Scavenger Subsystem.....	6-31
Breather Subsystems	6-31
Turbine Engine Wet-Sump Lubrication System.....	6-32
Turbine Engine Oil System Maintenance	6-32
Engine Cooling Systems	6-33
Reciprocating Engine Cooling Systems.....	6-33
Reciprocating Engine Cooling System Maintenance....	6-35
Maintenance of Engine Cowling.....	6-36
Engine Cylinder Cooling Fin Inspection.....	6-37
Cylinder Baffle and Deflector System Inspection.....	6-38
Cylinder Temperature Indicating Systems.....	6-38
Exhaust Gas Temperature Indicating Systems.....	6-39
Turbine Engine Cooling.....	6-39
Accessory Zone Cooling.....	6-40
Turbine Engine Insulation Blankets.....	6-40

Chapter 7	7-1
Propellers.....	7-1
General.....	7-1
Basic Propeller Principles.....	7-2
Propeller Aerodynamic Process.....	7-2
Aerodynamic Factors	7-5
Propeller Controls and Instruments.....	7-6
Propeller Location.....	7-6
Tractor Propeller	7-6
Pusher Propellers.....	7-6
Types of Propellers	7-6
Fixed-Pitch Propeller	7-6
Test Club Propeller	7-7
Ground-Adjustable Propeller	7-7
Controllable-Pitch Propeller.....	7-7
Constant-Speed Propellers	7-8
Feathering Propellers	7-8
Reverse-Pitch Propellers	7-9
Propeller Governor.....	7-9
Governor Mechanism.....	7-10
Underspeed Condition.....	7-10
Overspeed Condition.....	7-10
On-Speed Condition.....	7-10
Governor System Operation.....	7-12
Propellers Used on General Aviation Aircraft.....	7-12
Fixed-Pitch Wooden Propellers	7-12
Metal Fixed-Pitch Propellers.....	7-14
Constant-Speed Propellers	7-14
Hartzell Constant-Speed, Nonfeathering	7-14
Constant-Speed Feathering Propeller.....	7-15
Unfeathering.....	7-17
Propeller Auxiliary Systems	7-17
Ice Control Systems	7-17
Anti-Icing Systems.....	7-17
Deicing Systems	7-18
Propeller Synchronization and Synchrophasing	7-20
Autofeathering System.....	7-20
Propeller Inspection and Maintenance.....	7-20
Wood Propeller Inspection.....	7-21
Metal Propeller Inspection	7-21
Aluminum Propeller Inspection	7-21
Composite Propeller Inspection	7-21
Propeller Vibration.....	7-22
Blade Tracking.....	7-22
Checking and Adjusting Propeller Blade Angles.....	7-23
Universal Propeller Protractor.....	7-23
Propeller Balancing.....	7-24
Static Balancing	7-24
Dynamic Balancing.....	7-26
Balancing Procedure	7-26
Propeller Removal and Installation.....	7-27
Removal	7-27
Installation.....	7-27
Servicing Propellers	7-27

Cleaning Propeller Blades.....	7-27
Charging the Propeller Air Dome	7-28
Propeller Lubrication	7-28
Propeller Overhaul.....	7-29
The Hub.....	7-29
Prop Reassembly.....	7-30
Troubleshooting Propellers.....	7-30
Hunting and Surging	7-30
Engine Speed Varies with Flight Attitude (Airspeed)	7-30
Failure to Feather or Feathers Slowly	7-30
Turboprop Engines and Propeller Control Systems.....	7-30
Reduction Gear Assembly.....	7-31
Turbo-Propeller Assembly	7-31
Pratt and Whitney PT6 Hartzell Propeller System	7-32
Hamilton Standard Hydromatic Propellers.....	7-35
Principles of Operation	7-37
Feathering Operation.....	7-38
Unfeathering Operation.....	7-39
Setting the Propeller Governor.....	7-41

Chapter 8

Engine Removal and Replacement8-1

Introduction.....	8-1
Reasons for Removal of Reciprocating Engines	8-2
Engine or Component Lifespan Exceeded.....	8-2
Sudden Stoppage.....	8-2
Sudden Reduction in Speed	8-2
Metal Particles in the Oil.....	8-3
Spectrometric Oil Analysis Engine	
Inspection Program	8-3
Turbine Engine Condition Monitoring Programs	8-3
Engine Operational Problems	8-3
General Procedures for Engine Removal	
and Installation.....	8-3
Preparation of Engines for Installation	8-3
QECA Buildup Method for Changing of Engines	8-4
Depreservation of an Engine.....	8-5
Inspection and Depreservation of Accessories	8-5
Inspection and Replacement of Powerplant External	
Units and Systems.....	8-6
Preparing the Engine for Removal.....	8-6
Draining the Engine	8-7
Electrical Disconnects.....	8-7
Disconnection of Engine Controls	8-8
Disconnection of Lines	8-8
Other Disconnections	8-9
Removing the Engine.....	8-9
Hoisting the Engine.....	8-10
Hoisting and Mounting the Engine for Installation	8-10
Connections and Adjustments.....	8-11
Preparation of Engine for Ground and Flight Testing	8-13
Pre-Oiling.....	8-13
Fuel System Bleeding	8-13
Propeller Check.....	8-14

Checks and Adjustments After Engine Runup	
and Operation.....	8-14
Rigging, Inspections, and Adjustments	8-14
Rigging Power Controls.....	8-14
Adjusting the Fuel Control.....	8-15
Turboprop Powerplant Removal and Installation.....	8-16
Reciprocating Helicopter Engine and QECA	8-17
Removal of Helicopter QECA	8-17
Installation, Rigging, and Adjustment of	
Helicopter QECA	8-17
Testing the Engine Installation.....	8-17
Engine Mounts	8-17
Mounts for Reciprocating Engines.....	8-17
Mounts for Turbofan Engines	8-18
Turbine Vibration Isolation Engine Mounts	8-18
Preservation and Storage of Engines	8-18
Corrosion-Preventive Materials	8-18
Corrosion-Preventive Compounds.....	8-19
Dehydrating Agents	8-19
Engine Preservation and Return to Service	8-20
Engine Shipping Containers	8-21
Inspection of Stored Engines	8-22
Preservation and Depreservation of	
Gas Turbine Engines.....	8-22

Chapter 9

Engine Fire Protection Systems.....9-1

Introduction.....	9-1
Components.....	9-2
Engine Fire Detection Systems	9-2
Thermal Switch System.....	9-2
Thermocouple Systems	9-3
Optical Fire Detection Systems.....	9-4
Pneumatic Thermal Fire Detection.....	9-4
Continuous-Loop Detector Systems.....	9-4
Fire Zones.....	9-7
Engine Fire Extinguishing System.....	9-8
Fire Extinguishing Agents.....	9-8
Turbine Engine Ground Fire Protection.....	9-9
Containers	9-9
Discharge Valves	9-9
Pressure Indication.....	9-9
Two-Way Check Valve.....	9-9
Discharge Indicators.....	9-10
Thermal Discharge Indicator (Red Disk)	9-10
Yellow Disk Discharge Indicator	9-10
Fire Switch	9-10
Warning Systems	9-10
Fire Detection System Maintenance	9-10
Fire Detection System Troubleshooting	9-12
Fire Extinguisher System Maintenance Practices.....	9-13
Boeing 777 Aircraft Fire Detection and	
Extinguishing System	9-13
Overheat Detection.....	9-14

Fire Detection.....	9-14	Installation and Testing.....	10-20
Nacelle Temperature Recording	9-14	Engine Testing of Reciprocating Engines.....	10-20
Continuous Fault Monitoring.....	9-14	Test Cell Requirements	10-21
Single/Dual Loop Operation	9-14	Engine Instruments.....	10-21
System Test.....	9-14	Carburetor Air Temperature (CAT) Indicator.....	10-22
Boeing 777 Fire Extinguisher System.....	9-14	Fuel Pressure Indicator.....	10-22
Fire Extinguisher Containers.....	9-14	Oil Pressure Indicator.....	10-23
Squib	9-15	Oil Temperature Indicator.....	10-23
Engine Fire Switches.....	9-15	Fuel Flow Meter.....	10-23
Engine Fire Operation	9-17	Manifold Pressure Indicator	10-23
APU Fire Detection and Extinguishing System.....	9-18	Tachometer Indicator	10-23
APU Fire Warning	9-18	Cylinder Head Temperature Indicator	10-24
Fire Bottle Discharge	9-20	Torquemeter	10-24
		Warning Systems	10-25
Chapter 10		Reciprocating Engine Operation.....	10-25
Engine Maintenance and Operation	10-1	Engine Instruments.....	10-25
Reciprocating Engine Overhaul.....	10-1	Engine Starting.....	10-25
Top Overhaul	10-2	Pre-Oiling	10-25
Major Overhaul and Major Repairs	10-2	Hydraulic Lock.....	10-25
General Overhaul Procedures	10-2	Engine Warm-Up	10-26
Receiving Inspection.....	10-2	Ground Check	10-27
Disassembly	10-2	Fuel Pressure and Oil Pressure Check	10-28
Inspection Process.....	10-3	Propeller Pitch Check.....	10-28
Visual Inspection.....	10-3	Power Check	10-28
Cylinder Head	10-4	Idle Speed and Idle Mixture Checks	10-28
Piston, Valve Train, and Piston Pin	10-5	Engine Stopping.....	10-29
Crankshaft and Connecting Rods.....	10-5	Basic Engine Operating Principles	10-29
Cleaning	10-6	Combustion Process	10-29
Degreasing.....	10-6	Detonation	10-30
Removing Hard Carbon	10-6	Pre-Ignition	10-30
Structural Inspection	10-7	Backfiring.....	10-31
Dye Penetrant Inspection	10-7	Afterfiring.....	10-31
Eddy Current Inspection	10-7	Factors Affecting Engine Operation	10-31
Ultrasonic Inspection	10-7	Compression.....	10-31
Pulse-Echo.....	10-7	Fuel Metering.....	10-31
Through Transmission.....	10-8	Idle Mixture.....	10-33
Resonance.....	10-8	Induction Manifold.....	10-34
Magnetic Particle Inspection.....	10-8	Operational Effect of Valve Clearance	10-34
X-ray	10-8	Engine Troubleshooting.....	10-35
Dimensional Inspection	10-8	Valve Blow-By.....	10-39
Cylinder Barrel.....	10-8	Cylinder Compression Tests	10-40
Valves and Valve Springs	10-9	Differential Pressure Tester.....	10-40
Crankshaft	10-10	Cylinder Replacement.....	10-41
Checking Alignment	10-10	Cylinder Removal	10-42
Repair and Replacement	10-11	Cylinder Installation.....	10-43
Cylinder Assembly Reconditioning	10-12	Cold Cylinder Check.....	10-44
Piston and Piston Pins	10-12	Turbine Engine Maintenance.....	10-45
Valves and Valve Springs	10-13	Compressor Section	10-45
Refacing Valve Seats	10-13	Inspection and Cleaning	10-46
Valve Reconditioning.....	10-16	Causes of Blade Damage	10-47
Valve Lapping and Leak Testing	10-17	Blending and Replacement	10-49
Piston Repairs.....	10-18	Combustion Section Inspection	10-49
Cylinder Grinding and Honing.....	10-18	Marking Materials for Combustion Section Parts.....	10-50
Reassembly	10-20	Inspection and Repair of Combustion Chambers.....	10-50

Fuel Nozzle and Support Assemblies	10-51	Rotax 582 UL DCDI	11-5
Turbine Disk Inspection	10-51	Description of Systems for Two-Stroke Engines	11-5
Turbine Blade Inspection	10-51	Cooling System of Rotax 447 UL SCDI and	
Turbine Blade Replacement Procedure	10-52	Rotax 503 UL DCDI	11-5
Turbine Nozzle Inlet Guide Vane Inspection	10-53	Cooling System of the Rotax 582 UL DCDI	11-5
Clearances	10-53	Lubrication Systems	11-6
Exhaust Section	10-53	Oil Injection Lubrication of Rotax 503 UL	
Engine Ratings	10-55	DCDE, 582 UL DCDI, and 582 UL DCDI	11-6
Turbine Engine Instruments	10-55	Electric System	11-6
Engine Pressure Ratio Indicator	10-55	Fuel System	11-6
Torquemeter (Turboprop Engines)	10-56	Fuel/Oil Mixing Procedure	11-7
Tachometer	10-56	Opposed Light-Sport, Experimental, and	
Exhaust Gas Temperature Indicator (EGT)	10-56	Certified Engines	11-7
Fuel-Flow Indicator	10-56	Rotax 912/914	11-7
Engine Oil Pressure Indicator	10-56	Description of Systems	11-7
Engine Oil Temperature Indicator	10-56	Cooling System	11-7
Turbine Engine Operation	10-56	Fuel System	11-7
Ground Operation Engine Fire	10-58	Lubrication System	11-8
Engine Checks	10-58	Electric System	11-8
Checking Takeoff Thrust	10-58	Turbocharger and Control System	11-10
Ambient Conditions	10-58	HKS 700T Engine	11-10
Engine Shutdown	10-59	Jabiru Light-Sport Engines	11-10
Troubleshooting Turbine Engines	10-60	Jabiru 2200 Aircraft Engine	11-12
Turboprop Operation	10-60	Aeromax Aviation 100 (IFB) Aircraft Engine	11-12
Troubleshooting Procedures for Turboprop Engines	10-60	Direct Drive VW Engines	11-13
Turbine Engine Calibration and Testing	10-60	Revmaster R-2300 Engine	11-13
Turbine Engine Analyzer Uses	10-60	Great Plains Aircraft Volkswagen (VW)	
Analyzer Safety Precautions	10-62	Conversions	11-15
Continuity Check of Aircraft EGT Circuit	10-64	Teledyne Continental 0-200 Engine	11-16
Functional Check of Aircraft EGT Circuit	10-64	Lycoming 0-233 Series Light-Sport	
EGT Indicator Check	10-65	Aircraft Engine	11-16
Resistance and Insulation Check	10-65	General Maintenance Practices on Light-Sport	
Tachometer Check	10-65	Rotax Engines	11-17
Troubleshooting EGT System	10-65	Maintenance Schedule Procedures and	
One or More Inoperative Thermocouples in		Maintenance Checklist	11-17
Engine Parallel Harness	10-65	Carburetor Synchronization	11-18
Engine Thermocouples Out of Calibration	10-65	Pneumatic Synchronization	11-19
EGT Circuit Error	10-66	Idle Speed Adjustment	11-20
Resistance of Circuit Out of Tolerance	10-66	Optimizing Engine Running	11-20
Shorts to Ground/Shorts Between Leads	10-66	Checking the Carburetor Actuation	11-20
Troubleshooting Aircraft Tachometer System	10-66	Lubrication System	11-21
		Oil Level Check	11-21
		Oil Change	11-21
		Cleaning the Oil Tank	11-21
		Inspecting the Magnetic Plug	11-22
		Checking the Propeller Gearbox	11-22
		Checking the Friction Torque in Free Rotation	11-22
		Daily Maintenance Checks	11-23
		Pre-flight Checks	11-23
		Troubleshooting and Abnormal Operation	11-24
		Troubleshooting	11-24
		Engine Keeps Running With Ignition OFF	11-24
		Knocking Under Load	11-24
		Abnormal Operating	11-24

Chapter 11

Light-Sport Aircraft Engines 11-1

Engine General Requirements	11-1
Personnel Authorized to Perform Inspection and	
Maintenance on Light-Sport Engines	11-2
Authorized Personnel That Meet FAA Regulations	11-4
Types of Light-Sport and Experimental Engines	11-4
Light-Sport Aircraft Engines	11-4
Two-Cycle, Two Cylinder Rotax Engine	11-4
Single Capacitor Discharge Ignition (SCDI)	11-4
Dual Capacitor Discharge Ignition (DCDI)	11-4
Rotax 447 UL (SCDI) and Rotax 503 UL DCDI	11-4

Exceeding the Maximum Admissible	
Engine Speed.....	11-24
Exceeding of Maximum Admissible	
Cylinder Head Temperature	11-24
Exceeding of Maximum Admissible	
Exhaust Gas Temperature	11-24
Engine Preservation	11-24
General Maintenance Practices for the	
Light-Sport Jabiru Engines	11-25
Engine and Engine Compartment Inspection.....	11-25
Lubrication System	11-25
Carburetor Adjustment and Checks	11-25
Spark Plugs.....	11-25
Exhaust System	11-26
Head Bolts.....	11-26
Tachometer and Sender.....	11-26
Engine Inspection Charts	11-26
Glossary.....	G-1
Index	I-1
