

CONTENTS

Selected list of symbols and acronyms	5
1. Introduction (<i>W. Kordalski</i>)	9
2. Quasi-2D representation of the MOSFET (<i>W. Kordalski</i>)	16
2.1. Introduction	16
2.2. 2D-into-quasi-2D transformation of the MOSFET	16
2.2.1. Quasi-2D representation of the channel	16
2.2.2. Modified 2D dc MOSFET representation	26
2.2.3. Quasi-2D dc MOSFET representation	32
2.3. Conclusion	33
3. Time-domain model (<i>W. Kordalski</i>)	35
3.1. Introduction	35
3.2. MOSFET under small excitation	35
3.3. Quasi-2D continuity equation	38
3.3.1. Basic equations	38
3.3.2. Some simplifications	41
3.4. Quasi-2D Poisson's equations	44
3.4.1. Equations for steady-state (dc) and small-signal conditions	44
3.4.2. Simplified equations	46
3.5. Transport equation	47
3.6. Terminal currents	49
3.6.1. Capacitive currents	49
3.6.2. Drain- and source-terminal non-capacitive currents	51
3.7. Gate-to-body capacitance C_{gb}	53
3.7.1. Preliminary remarks	53
3.7.2. Quasi-static gate-to-channel capacitance C_{gc}	55
3.7.3. Quasi-static body-to-channel capacitance C_{bc}	57
3.7.4. Gate-to-body capacitance C_{gb}	59
3.8. Supplementary equations and rules	61
3.9. Conclusion	63

4. Frequency-domain model (<i>W. Kordalski</i>)	65
4.1. Introduction	65
4.2. Formulation of time-domain equations	65
4.2.1. Continuity equation	66
4.2.2. Transport equation	66
4.2.3. Poisson's equation	68
4.3. Quasi-2D frequency-domain analysis	70
4.3.1. Frequency-domain equations	70
4.3.2. Solution for $p_1(\xi, j\omega)$	71
4.3.3. Wave phenomena in the channel	72
4.3.4. The electric field $E_1(\xi, j\omega)$	73
4.4. DIBL-included model	73
4.4.1. Non-capacitive terminal currents	73
4.4.2. Four-terminal equivalent circuit for an idealized MOSFET	87
4.4.3. Four-terminal equivalent circuit for the real MOSFET	88
4.5. Long-channel MOSFET model	89
4.6. Conclusion	89
5. Validation of the frequency-domain model	
(<i>W. Kordalski, T. Stefański, D. Trofimowicz</i>)	91
5.1. Introduction	91
5.2. Layout of the measured MOSFETs	91
5.3. Small-signal model of the measured MOSFETs	92
5.4. De-embedding procedure	93
5.5. Results of the verification up to f_T	94
5.6. Results of the verification in the range of up to thirteen times f_T	102
5.7. Conclusion	106
Summary in English	107
Summary in Polish	109
Appendix A. Derivation of quasi-2D continuity equation (<i>W. Kordalski</i>)	111
Appendix B. Derivation of quasi-2D Poisson's equation (<i>W. Kordalski</i>)	114
Appendix C. Quasi-static small-signal conductance g_{ds} (<i>W. Kordalski</i>)	117
Appendix D. Finding the hole concentration $p_1(\xi, j\omega)$ (<i>W. Kordalski</i>)	120
Appendix E. Finding the electric field $E_1(\xi, j\omega)$ (<i>W. Kordalski</i>)	121
