Introduction	5
1. Distillation	7
1.1. Distillation at atmospheric pressure	8
1.2. Steam distillation	10
1.3. Fractional distillation	12
1.4. Distillation under reduced pressure	13
2. Crystallization	16
3. Extraction	19
4. Filtration under reduced pressure	21
5. Basic glass and laboratory equipment	24
6. List of preparations	38
6.1. Oxidation and reduction reactions	38
6.1.1. <i>p</i> -Aminodimethylaniline from methyl orange	40
6.1.2. Benzoic acid from toluene	41
6.1.3. Benzoic acid from ethylbenzene	43
6.1.4. Aniline from nitrobenzene	44
6.1.5. Ethylbenzene from acetophenone	46
6.2. Aldehydes and ketones	47
6.2.1. 2-Aminobenzaldehyde	48
6.2.2. Benzylideneacetone	50
6.2.3. Cinnamic acid from benzaldehyde	51
6.2.4. Benzyl alcohol (Cannizzaro cross-reaction)	53
6.2.5. Benzyl alcohol and benzoic acid	55
6.2.6. Ethyl cinnamate from benzaldehyde	56
6.3. Carboxylic acids and their derivatives	58
6.3.1. Acetanilide from aniline	61
6.3.2. Methyl benzoate	63
6.3.3. 3-Nitrobenzoic acid	64
6.3.4. <i>N</i> -Acetylglycine from chloroacetic acid	65
6.3.4.1. Glycine from chloroacetic acid	65
6.3.4.2. <i>N</i> -acetylglycine from glycine	67

6.3.5. <i>N</i> -Benzoylglycine from chloroacetic acid	69
6.3.6. Acetylsalicylic acid	71
6.3.7. <i>N</i> -Phenylbenzamide	72
6.3.7.1. Oxime of benzophenone from benzophenone	72
6.3.7.2. <i>N</i> -Phenylbenzamide from oxime of benzophenone	74
6.3.8. Anthranilic acid from phthalic anhydride	75
6.3.8.1. Phthalic imide from phthalic anhydride	75
6.3.8.2. Anthranilic acid from phthalic imide	76
6.4. Synthesis using diazonium salts	78
6.4.1. Phenol from aniline	82
6.4.2. Orange II (β -naphtholic) from β -naphthol	84
6.4.2.1. Diazonium salt formation	84
6.4.2.2. Coupling	85
6.4.3. Methyl orange from <i>N,N</i> -dimethylaniline	86
6.4.4. <i>p</i> -Aminoazobenzene from aniline	88
6.4.4.1. Diazoaminoazobenzene from aniline	88
6.4.4.2. <i>p</i> -Aminoazobenzene from diazoaminobenzene	90
6.5. Syntheses using organo-magnesium compounds	92
6.5.1. Benzoic acid	94
6.5.2. Phenylacetic acid	96
6.5.3. 1-Naphthoic acid	97
6.5.4. 2-Methylhexan-2-ol	99
6.5.5. Triphenylmethanol from methyl benzoate	100
6.5.6. Triphenylmethanol from benzophenone	102
6.5.7. 1,1-Diphenylethane	103
6.5.7.1. 1,1-Diphenylethanol from ethyl acetate	103
6.5.7.2. 1,1-Diphenylethylene from 1,1-diphenylethanol	105
7. Use of rotary evaporator (rotary)	107
8. Sample questions	109
9. Regulations	112
9.1. Characteristics of the obtained preparation	112
Literature	114
Index	115
