

## Table of Contents

|   |     |
|---|-----|
| Introduction  | XI  |
| <b>1. Invited papers</b>  |     |
| What should geotechnical engineers be able to do and how should they acquire these skills?<br><i>J. Atkinson</i>                                    | 3   |
| New generation geo-engineering<br><i>F.B.J. Barends</i>   | 9   |
| Teaching rock mechanics in the classroom and on the UNI-Nettuno Network<br><i>G. Barla</i>  | 23  |
| Personal reflections on the teaching of soil mechanics<br><i>J.B. Burland</i>   | 35  |
| Geotechnical engineering collaboration between clients, consultants, contractors<br>and universities: A European perspective<br><i>M. Devriendt</i> | 49  |
| Engineering geology at University Complutense of Madrid: 30 years of postgraduate courses<br><i>L.I. González de Vallejo &amp; M. Ferrer</i>        | 55  |
| A multi-faceted approach to geotechnical engineering education<br><i>M.B. Jaksa</i>   | 59  |
| Let's get together<br><i>I.M. May</i>   | 73  |
| Geo-engineering education and training. The past and the future<br><i>R. Oliveira</i>   | 79  |
| Geotechnical education and Eurocode 7<br><i>T.L.L. Orr</i>  | 87  |
| Competency-oriented curricula development in geo-engineering with particular<br>reference to engineering geology<br><i>N. Rengers &amp; H. Bock</i> | 101 |
| Education and professional recognition of engineering geologists and geological<br>engineers in Canada and the United States<br><i>A.K. Turner</i>  | 111 |
| Training engineering geologists in developing countries: South African perspectives<br>and challenges<br><i>J.L. van Rooy</i>                       | 119 |
| <b>2. Reports on education and training in geo engineering sciences in<br/>various countries</b>  |     |
| First and second cycle degree programme and impact of the Bologna process in Albania<br><i>L. Bozo</i>  | 131 |
| Geo-engineering education in Australia<br><i>M.B. Jaksa, S.G. Fityus, J.K. Kodikara, S.T.S. Yuen &amp; M.A. Woodward</i>                            | 135 |

|   |     |
|---|-----|
| The geotechnical education in Bulgaria<br><i>A. Totsev &amp; J. Jellev</i>  | 141 |
| Report on geotechnical engineering from Chile<br><i>R. Verdugo &amp; C. Foncea</i>  | 145 |
| Introduction to education of rock mechanics in China<br><i>M.F. Cai</i>   | 147 |
| Historical review and current status of civil engineering education in China<br><i>Y. Qiu</i>   | 151 |
| Education and training in geo-engineering sciences in Croatia<br><i>V. Szavits-Nossan</i>   | 159 |
| Education and training in geo-engineering sciences in France<br><i>R. Kastner &amp; F. Emeriault</i>  | 165 |
| German education and training in geo-engineering sciences<br><i>U. Arslan &amp; H. Huber</i>  | 171 |
| Geotechnical and geoenvironmental engineering education and training in Germany<br><i>R. Katzenbach, B. Astheimer &amp; S. Wachter</i>                            | 177 |
| Education and training in geo-engineering sciences in Ghana<br><i>S.I.K. Ampadu &amp; S.K.Y. Gawu</i>   | 181 |
| Geotechnical engineering education and training in Greece and links with the geo-engineering sciences<br><i>M. Pantazidou, G. Tsiambaos &amp; D.K. Atmatzidis</i> | 187 |
| Geo-engineering sciences education in Hong Kong<br><i>L.G. Tham</i>   | 193 |
| Geotechnical and geoenvironmental education in India<br><i>R.K. Srivastava, S.H. Abbas, S. Saxena, S. Singh &amp; P. Bala Ramudu</i>                              | 199 |
| Geotechnical education in Ireland – 2008 national report<br><i>B.A. McCabe, D.T. Phillips, T.L.L. Orr &amp; S.P. Murray</i>                                       | 203 |
| Geotechnical engineering education in Israel<br><i>S. Frydman</i>   | 209 |
| Report on the education and training in geo-engineering sciences in Italy<br><i>D.C.F. Lo Presti &amp; F. Silvestri</i>   | 213 |
| Geo-engineering education in Lithuania<br><i>K. Dundulis &amp; V. Stragys</i>   | 221 |
| Geotechnical engineering education and training in Mexico<br><i>R. Rivera-Constantino</i>   | 227 |
| Report on the education and training in geo-engineering sciences for New Zealand<br><i>J.D. St. George</i>  | 231 |
| Education and training in geo-engineering sciences in Romania<br><i>I. Manoliu, Cr. Mărunțeanu &amp; D. Stematiu</i>  | 237 |
| Education and training in Geo-engineering sciences in the Republic of South Africa (RSA)<br><i>G. Blight</i>  | 245 |
| Geotechnical engineering education and training in Switzerland<br><i>M. Caprez, S.M. Springman, G. Anagnostou &amp; A.M. Puzrin</i>                               | 247 |
| Geotechnical engineering education in Thailand<br><i>K. Piriyakul</i>   | 253 |
| Report on education and training in geo-engineering sciences in the United States of America<br><i>A.L. Welker &amp; A.J. Puppala</i>                             | 257 |

|   |     |
|---|-----|
| Geotechnical engineering education in the United States<br><i>T.F. Zimmie &amp; R.D. Holtz</i>  | 263 |
| <b>3. Curricular matters in geo-engineering education</b>   |     |
| Teaching geotechnics at the Faculty of Civil Engineering, VŠB-Technical University Ostrava after Destructuralisation of University Study in the Czech Republic<br><i>J. Aldorf, J. Horky &amp; E. Hrubesova</i>                         | 269 |
| The relevance of geo-engineering in civil engineering education and practice in Ghana<br><i>S.I.K. Ampadu</i>   | 275 |
| Geotechnics subjects in the curricula of Civil Engineering courses in the University of Beira Interior (Portugal)<br><i>L.M. Ferreira Gomes, R. Kowalczyk, P. Gabriel de Almeida, L.J. Andrade Pais, I.M.G. Falorca &amp; E. Mendes</i> | 281 |
| Education, training and learning in geo-sciences for Civil Engineering<br><i>I. Lungu, A. Stanciu, N. Boti &amp; O. Donciu</i>  | 293 |
| Geotechnics for Civil Engineering in an Integrated Master Course<br><i>E. Maranha das Neves</i>   | 297 |
| “Design and Construction of Underground Works”. A postgraduate course in the National Technical University of Athens<br><i>P.G. Marinos</i>   | 301 |
| Teaching geotechnical engineering<br><i>B. Moussai</i>  | 305 |
| Bridging Geomatics and Geo-Engineering<br><i>D.J.M. Ngan-Tillard, B.G.H. Gorte, A.A.A. Verhagen &amp; E. Verbree</i>  | 307 |
| Geo-engineering, a co-production of Applied Earth Sciences and Civil Engineering<br><i>D.J.M. Ngan-Tillard, J.P. Oostveen &amp; C.M.J. van Kuijen</i>   | 313 |
| Some aspects of comparison of geo-engineers education at the universities of Germany and Russia<br><i>A. Ponomaryov &amp; R. Katzenbach</i>   | 319 |
| Complex education in underground structures at CTU in Prague<br><i>J. Pruška, S. Chamra &amp; R. Vašíček</i>  | 325 |
| Geotechnics and the University degree structure reform in Helsinki<br><i>O.T. Ravaska</i>   | 329 |
| Selected aspects of teaching geo-engineering sciences at the Faculty of Civil Engineering, Warsaw University of Technology<br><i>A. Siemińska-Lewandowska &amp; W. Gilewski</i>   | 333 |
| Contribution of numerical methods in the education of geosciences:<br>Implementation on two-tier study programs<br><i>E. Vairaktaris, G. Metaxas &amp; D. Damigou</i>   | 337 |
| Geo Risk Management – A new engineering education approach<br><i>M.Th. van Staveren</i>   | 345 |
| Education of the risk in Civil engineering<br><i>L. Vinet</i>   | 351 |
| <b>4. Teaching, learning and assessment in geo-engineering education</b>  |     |
| A project based approach to teaching geotechnical engineering<br><i>D.W. Airey</i>  | 357 |

|   |     |
|---|-----|
| Effective teaching of geo-engineering subjects via project-based approach<br><i>C.-M. Chan &amp; A. Suratkon</i>  | 363 |
| Geotechnical engineering education in METU and computer aided learning resources<br><i>E. Cokca</i>   | 369 |
| From teaching to assistance for project<br><i>N. Faure, J.-F. Thimus &amp; R.-M. Faure</i>  | 375 |
| Demonstration experiments in geotechnical education<br><i>I. Herle &amp; S. Gesellmann</i>  | 379 |
| Improving graduates' soft skills through laboratory teamwork<br><i>D. Ionescu</i>   | 383 |
| Using ICT in Geo-Engineering education: The case of UPC at Barcelona, Spain<br><i>A. Ledesma &amp; P.C. Prat</i>  | 389 |
| Combining Geographical Information Systems and geo-engineering education. Practical aspects and lessons learned at TEI of Serres (Greece)<br><i>C. Papatheodorou, A. Konstantinidis &amp; E. Mouratidis</i> | 393 |
| Case study importance in geotechnical engineering – educational approach<br><i>A. Popa, V. Farcas &amp; N. Ilies</i>  | 397 |
| Use of an interactive approach and case studies in Geo-engineering education<br><i>S. Singh</i>   | 405 |
| Improving rock mechanics education by using case studies analyses<br><i>D. Stematiu</i>   | 409 |
| DIDACTU and DIDACPENTE, e-learning tools for underground works and slope stability<br><i>J.-F. Thimus &amp; R.-M. Faure</i>   | 415 |
| <b>5. Challenges to geotechnical engineering education</b>  |     |
| Experiences from advanced teaching in Geotechnics under Erasmus programme<br><i>M. Drusa &amp; D. Sitányiová</i>  | 421 |
| Geotechnical aspects of the final year “Technical project” in the Civil Engineering Department of INSA Lyon, France<br><i>F. Emeriault, G. Debicki &amp; R. Kastner</i>                                     | 427 |
| Geotechnical engineering practice and the implementation of Eurocode approach in Italy<br><i>D.C.F. Lo Presti &amp; N. Squeglia</i>   | 435 |
| Launching geotechnical education into the 21st century<br><i>D.T. Phillips &amp; B.A. McCabe</i>  | 439 |
| Challenges and responses in the geo-engineering education<br><i>P. Scharle</i>  | 443 |
| Some thoughts on the interplay between theory and practice in geotechnical engineering education within the frame of the new modularized university education system<br><i>C. Vrettos</i>                   | 447 |
| <b>6. Issues in education and training in Engineering Geology</b>   |     |
| Training in Geological Engineering. The experience of University of Évora (Portugal)<br><i>I.M.R. Duarte, A.B. Pinho, P.A.G. Faria, J.L.G. Lopes &amp; P.M.M.P. Nogueira</i>                                | 453 |
| Engineering Geology a basic tool for civil engineering works<br><i>E. Marchidanu &amp; R. Stanescu</i>  | 459 |

|   |     |
|---|-----|
| Pragmatic training in Engineering Geology<br><i>D.J.M. Ngan-Tillard, P.M. Maurenbrecher, J. van der Schrier, A. Venmans &amp; R. Schmitz</i>  | 463 |
| Engineering geological education – Practical aspects from Civil Engineering<br>Department at TEI of Serres (Greece)<br><i>C. Papatheodorou &amp; A. Papazisi</i>                            | 473 |
| <b>7. The link university professional world in geo-engineering</b>   |     |
| Requirements of the construction industry with regard to the university education and training of graduates in geo-engineering<br><i>P. Arz, W. Steinhaeusl &amp; Ch. Scheld</i>            | 481 |
| Introduction about the plan of course system in lectures of Japanese Geotechnical Society<br><i>H. Furuya &amp; A. Izuka</i>  | 489 |
| Is Geotechnical education meeting industry demands? The Irish position<br><i>B.A. McCabe &amp; D.T. Phillips</i>  | 493 |
| Program of Continuing Professional Development for geotechnical engineers by Japanese Geotechnical Society<br><i>M. Nakano &amp; N. Suemasa</i>   | 499 |
| Industry-Academia collaboration produces geotechnical case studies for undergraduate instruction: An example, a proposal<br><i>M. Pantazidou, G.A. Anagnostopoulos &amp; C. Tsatsanifos</i> | 505 |
| Author index  | 513 |
