|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| <b>CHAPTER 1</b>                                                                                                                                                                                                                          |       |
| THE KINETICS OF NATURAL PHYSICAL AGEING OF BISMUTH MODIFIED CHALCOGENIDE GLASSES $As_xSe_{100-x-y}Bi_y$ AS STUDIED BY DIFFERENTIAL SCANNING CALORIMETRY<br>(Czesław GÓRECKI).....                                                         | 23    |
| <b>CHAPTER 2</b>                                                                                                                                                                                                                          |       |
| ANALYSIS OF SOME COUPLING EFFECTS IN THERMO-ELASTO-PLASTICITY PRESENTED AT CLOSED DIAGRAM<br>(Zdzisław ŚLÓDERBACH).....                                                                                                                   | 37    |
| <b>CHAPTER 3</b>                                                                                                                                                                                                                          |       |
| ANALYSIS OF VARIATIONS IN BODY POSTURE IN 5 AND 7 YEAR-OLDS<br>(Karina SŁONKA, Anna KOZIARSKA, Roland PAMPUCH) .....                                                                                                                      | 49    |
| <b>CHAPTER 4</b>                                                                                                                                                                                                                          |       |
| COMPLETION OF WEAKLY REGULAR LINEAR EXTENSIONS OF DYNAMICAL SYSTEMS TO REGULAR<br>(Victor KULYK, Dariusz PĄCZKO).....                                                                                                                     | 61    |
| <b>CHAPTER 5</b>                                                                                                                                                                                                                          |       |
| FUNCTION APPROXIMATION IN THE PRESENCE OF INTERACTIONS AND NOISY VARIABLES<br>(Mariusz KUBUS) .....                                                                                                                                       | 77    |
| <b>CHAPTER 6</b>                                                                                                                                                                                                                          |       |
| PHYSICO-MATHEMATICAL FUNDAMENTALS OF THERMO-MECHANICS OF MAGNETIZABLE ELECTRICALLY CONDUCTING BODIES SUBJECT TO QUASISTEADY ELECTROMAGNETIC FIELDS<br>(Oleksandr HACHKEVYCH, Roman IVAS'KO, Mykhaylo SOLODYAK, Anida STANIK-BESLER) ..... | 89    |
| <b>CHAPTER 7</b>                                                                                                                                                                                                                          |       |
| ELECTROMAGNETIC, THERMAL AND MECHANICAL PROPERTIES FOR CONDUCTIVE LAYER UNDER THE ACTION OF ELECTROMAGNETIC PULSES<br>(Oleksandr HACHKEVYCH, Roman KUSHNIR, Nataliya MELNYK, Roman MUSIY) .....                                           | 103   |

**CHAPTER 8**  
ON THE DEFINITION OF THE ELECTROMAGNETIC FIELD PARAMETERS AND FACTORS OF ITS ACTION IN THE NON-FERROMAGNETIC LAYER SUBJECTED TO BILATERAL INDUCTION HEATING  
(Karen GHAZARYAN, Roman IVAS'KO, Mykhaylo SOLODYAK, Anida STANIK-BESLER) ..... 123

**CHAPTER 9**  
A NEW APPROACH TO DESCRIPTION OF MEDICAL TEST RESULTS WITH USE ORDERED FUZZY NUMBERS  
(Anna CHWASTYK) ..... 137
