

Contents

Preface.....	xi
Acknowledgments.....	xii
Chapter 1 Composite Technology Overview	1
Composites vs. Advanced Composites	1
Advanced Composites	2
Examples of Typical Applications	2
Advantages of Composites	9
Disadvantages of Composites	10
Composites Development Timeline	11
Chapter 2 Matrix Technology	13
Matrix Systems Overview	13
Thermosets	13
Glass Transition Temperature (T_g) and Service Temperature	15
Common Thermoset Matrix Systems	16
Principles of Curing and Cross-linking	18
Thermoplastics	19
Advantages	20
Disadvantages	21
Other Matrix Materials	21
Metal Matrix	21
Ceramic Matrix	21
Carbon Matrix	22
Liquid Resins	23
Introduction to Laminating Resins	23
Pot Life, Working Time, and Open Time	23
Mix Ratios	24
Understanding Viscosity	25
Storage and Shelf Life Considerations	25
Curing Considerations	26
Prepregs	26
Prepreg Material Considerations	26
Prepreg Manufacturing Methods	27
Stages of a Resin System	28
Prepreg Storage and Handling	29
Curing Thermoset Prepregs	31

Chapter 3 Fiber Reinforcements 41

Introduction to Fiber Reinforcements 41

Fiber Types and Properties 43

Glass Fiber 43

Carbon Fiber 48

Other Fibers 51

Synthetic Fibers 52

Forms of Reinforcement 55

Forms Terminology 55

Non-woven Materials 58

Woven Fabrics 58

Stitched Multiaxial Fabrics 59

Hybrid Fabrics 63

Braided Fabrics 64

Three-Dimensional Fabrics 65

Layup Technology 65

Tracers 65

Selvage 68

Ply Kitting and Orientation Terminology 68

Chapter 4 Basic Design Considerations 71

Composite Structural Design 71

Matrix-Dominated Properties 71

Fiber-Dominated Properties 71

Solid Laminate Panels 71

Sandwich Core Panels 72

Temperature and Moisture 72

Ply Orientation and Standardized Orientation Symbol 73

Ply Layup Table 74

Common Layup Terms and Conditions 74

Ply Orientation Shorthand Code 79

Resin to Fiber Ratio 81

Service Life Considerations 82

Environmental Effects on Cured Composite Structures 82

Galvanic Corrosion 83

Lightning Strike Protection (LSP) 84

Chapter 5 Molding Methods and Practices 89

Overview of Molding Methods and Practices 89

Semi-Permanent Mold Release Agents 90

Vacuum Bagging 91

Relating Vacuum and Atmospheric Pressure 92

Vacuum Bagging Requirements 93

Vacuum Bag Schedule and Function 94

Hand Layup—Wet Layup 96

Vacuum Infusion 97

Hand Layup—Prepreg 98

Oven and Autoclave Equipment 100

Filament Winding 101

Automated Tape Laying and Automated Fiber Placement	103
Materials	105
Parameters	105
Resin Transfer Molding	106
RTM Materials	106
Process Parameters	106
Pultrusion	108
Pultrusion Materials	110
Process Parameters	110
Thermoforming	110
Thermoforming Materials	112
Thermoforming Parameters	114
Compression Molding	115
Compression Molding Materials	115
Process Parameters	116
Chapter 6 Core Materials	117
Why Use Sandwich Construction?	117
Sandwich vs. Solid Laminate	117
Balsa Core	119
Foam Cores	121
Linear vs. Cross-linked PVC	122
Polyurethane vs. Polyisocyanurate Foam	122
Co-polymer and PMI Foams	123
Syntactic Foams	124
Honeycomb Cores	124
L (Ribbon) vs. W (Transverse) Properties	125
How Honeycomb is Manufactured	125
Honeycomb Materials	128
Other Core Types	130
Truss Cores and Reinforced Foam	130
Non-Wovens	132
Design and Analysis	133
General Design Criteria	134
General Design Guidelines	135
Key Property Tests for Sandwich Panels	136
Fabrication	137
In-Service Use	138
Chapter 7 Introduction to Tooling	139
Key Factors	139
Production Requirements	139
Tool Function and Types of Tools	139
Tooling Material Properties	140
Metal vs. Composite Tooling	142
Metals	142
Composites	142
Tooling for Thermoplastics	144
Tooling Materials	144
Other Considerations	145

Chapter 8 Inspection and Test Methods..... 147

Destructive Coupon Testing 147

- Tensile 149
- Compressive 149
- Shear 150
- Flexure 151
- Fracture Toughness 152
- Fatigue 153

Resin, Fiber and/or Void Content 155

- Matrix Ignition Loss 155
- Matrix Digestion 156

Fire, Smoke and Toxicity (FST) Requirements and Heat Release Testing 156

- Commercial Aircraft 157
- Rail 159

Non-Destructive Testing 160

- Visual Inspection 160
- Tap Testing 161
- Ultrasonic Inspection 162
- New UT Technology 163
- X-Rays 164
- Thermal Imaging 165
- Laser Shearography 167
- Holographic Laser Interferometry (HLI) 170
- Dye Penetration 172
- Comparison of NDI Techniques 172

Chapter 9 Adhesive Bonding and Fastening..... 173

Adhesive Bonding vs. Fastening Composites..... 173

Bonding Methods 174

- Co-Curing 174
- Co-Bonding 174
- Secondary Bonding 174

Types of Adhesives 174

- Liquid Adhesives 174
- Paste Adhesives 174
- Film Adhesives 175
- Core Splice Adhesives 175
- Supported Film Adhesives 175
- Unsupported Film Adhesives 176
- Bondline Thickness Control Methods 176

Surface Preparation 176

- Metal vs. Composites 176
- Mechanical Abrasion vs. Peel Ply 177

Cleaning..... 179

- Solvent Cleaning 179
- Solvent Grades 179
- Non-Solvent Wiping Technique 180
- Wipes 180

Bonding to Core Materials	180
Bonding to Honeycomb Core	180
Bonding to Foam Core	180
Bonding Thermoplastic Composites	181
Surface Treatments	181
Crystalline vs. Amorphous Thermoplastics	182
Fusion Bonding	183
Thermabond Process or Dual Resin Bonding	184
Joint Design	185
Drilling and Fastening	185
Mechanical Fastening of Composites	185
Drilling Tools and Techniques	189
Other Approaches	193
Chapter 10 Repair of Composite Structures	195
Types of Damage	195
Holes and Punctures	195
Delaminations	195
Disbonds	195
Core Damage	197
Resin Damage	197
Water Ingression or Intrusion	197
Lightning, Fire and Heat Damage	199
Damage Detection	199
Component Identification	199
Repair Materials	200
Paint Removal	202
Chemical Stripping	202
Hand Sanding	202
Blasting	203
Other Methods	205
Damage Removal	205
Damage Removal Scenarios	206
Skin	206
Core	208
Contamination	208
Drying	208
Repair Design	212
Structure Types	213
Types of Repair	213
Vacuum Bagging Materials for Composite Repair	219
Vacuum Bagging Requirements for Repairs	219
Bag Film and Sealant Tape	220
Bleeder Layer	220
Breather Layer	220
Peel Ply	222
Perforated Film	222
Separator Film Layer	223
Vacuum Gauges	224
Vacuum Ports	224
Repair Instructions	227

Scarfin	231
Tapered (Scarf) Distance per Ply	232
Tapered (Scarf) Angle	232
Scarfin vs. Stepping	233
The Repair Patch	234
Curing Methods	235
Hot Bonders	235
Heat Blankets and Other Heating Methods	240
Cure Temperature Considerations	242
Thermocouple Placement and Other Issues	242
Flash Tape	245
Cross-talk	245
Reverse-Wired Thermocouples	246
Caul Plates	247
Chapter 11 Health and Safety	249
Routes of Exposure	249
Absorption	250
Inhalation	250
Injection	250
Ingestion	250
Hazards Associated With Matrix Systems	251
Epoxy	251
Polyester and Vinyl Ester	252
Polyurethane	252
Polyimide and Bismaleimide	253
Phenolic	253
Hazards Associated With Fibers	253
Exposure Limits	254
Industrial Hygiene Reports	255
Threshold Limit Value	255
Solvents	256
Ketones	256
Chlorinated Solvents	256
Solvents in Release Agents	257
Personal Protective Equipment	257
Protection from Absorption	258
Protection from Inhalation	258
Limiting the Risk of Injection	259
Preventing Ingestion	259
Glossary	261
Index	281
About the Authors	290
