

Proceedings of the 19th National Conference  
on Superconductivity (KKN 19),  
Bronisławów, Poland, October 6–11, 2019

|                                                                                                                                                          |     |                                                                                                                                                                                                                                                   |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A. Sotnikov, Y. Zambrano, A. Cichy<br><i>Low-Temperature Phases in Two-Orbital Hubbard Model Realized with Ultracold Atoms in Optical Lattices</i> ..... | 669 | A.P. Durajski, M.W. Jarosik, K.P. Kosk-Joniec, I.A. Wrona, M. Kostrzewa, K.A. Szewczyk, R. Szcześniak<br><i>Phonon-Induced Superconducting State: From Metallic Hydrogen to LaH<sub>10</sub></i> .....                                            | 715 |
| A. Kobińska, A. Ptak<br><i>Majorana Bound State Leakage to Impurity in Su-Schrieffer-Heeger-Rashba Scenario</i> .....                                    | 673 | K. Pomorski, R.B. Staszewski<br><i>Description of Interface Between Semiconductor Electrostatic Qubit and Josephson Junction in Tight Binding Model</i> .....                                                                                     | 728 |
| A. Kobińska, A. Ptak<br><i>Majorana Bound States and Zero-Bias Conductance Peaks in Superconductor/Semiconductor Nanowire Devices</i> .....              | 681 | L. Tomkow, A. Smara, V. Climente-Alarcon, B.A. Glowacki<br><i>Calculation of an Optimal Number of Tapes in Stack of Superconducting Tapes Subjected to Tilted Magnetising Field</i> .....                                                         | 737 |
| A. Więckowski, A. Ptak<br><i>Dynamics of Quantum Annealers: Ising Model with Transverse Field Study</i> .....                                            | 686 | Thi Ly Mai, Vinh Hung Tran<br><i>DFT+U Study of Stability and Electronic Properties of Antiferromagnetic States of Sr<sub>4</sub>V<sub>2</sub>O<sub>6</sub>Fe<sub>2</sub>As<sub>2</sub></i> .....                                                 | 740 |
| B. Baran, R. Taranko, T. Domański<br><i>Postquench Dynamics of Quantum Dot Proximitized to Superconducting Lead</i> .....                                | 691 | M. Giebułtowski, W.M. Woch, R. Zalecki, M. Kowalik, J.M. Michalik, Ł. Gondek<br><i>Resistance and Susceptibility of Ceramic Tl<sub>2</sub>Ba<sub>2</sub>Ca<sub>2</sub>Cu<sub>3</sub>O<sub>x</sub> Superconductor in the Critical Region</i> ..... | 744 |
| B.A. Glowacki, M. Wozniak<br><i>Dynamic Transport Critical Current Measurements of MgB<sub>2</sub> Superconductor</i> .....                              | 695 | P. Ruszała, M.J. Winiarski, M. Samsel-Czekala<br><i>Dirac-Like Electronic-Band Dispersion of LaSb<sub>2</sub> Superconductor and Its Counterpart LaAgSb<sub>2</sub></i> .....                                                                     | 748 |
| B. Kondratowicz-Kucewicz<br><i>Opportunities for Energy Storing in Magnetic Field of High-Temperature Superconducting Winding</i> .....                  | 705 | S. Kozak, M. Majka, J. Kozak<br><i>Analysis of Superconducting Fault Current Limiter 6 kV/0.14 kA</i> .....                                                                                                                                       | 752 |
| J. Kozak, M. Majka, S. Kozak<br><i>Design Considerations on a Resistive Superconducting Fault Current Limiter</i> .....                                  | 710 |                                                                                                                                                                                                                                                   |     |
