Part 1

M. KLIMEK, Personal reflections on Józef Siciak's mathematical journey . . .	1-7
J. BOCHNAK and J. SICIĄK, A characterization of analytic functions of several real variables	9-13
P. AĦAG, U. CEGRELL and PHẠM HOÀNG HIỆP, On the Guedj-Raschkovskii conjecture	15-20
P. AĦAG and R. CZYZ, On a characterization of m -subharmonic functions with weak singularities	21-29
R. M. ARON, S. CHARPENTIER, P. M. GAUTHIER, M. MAESTRE and V. NESTO-RIDIS, Extendability and domains of holomorphy in infinite-dimensional spaces	31-41
M. BARAN and L. BIALAS-CIEZ, On the behaviour of constants in some polynomial inequalities	43-60
J. BERGH and R. SIGURDSSON, Siciak's homogeneous extremal functions, holomorphic extension and a generalization of Helgason's support theorem .	61-70
R. J. BERMAN, Statistical mechanics of interpolation nodes, pluripotential theory and complex geometry	71-153
H.-P. BLATT and R. GROTHMANN, Interpolation characteristics of maximal polynomial approximants to rational functions	155-169
T. BLOOM, L. BOS, N. LEVENBERG, S. MA'U and F. PIAZZON, The extremal function for the complex ball for generalized notions of degree and multivariate polynomial approximation	171-195
J. BOCHNAK and W. KUCHARZ, Sharpening a theorem of Forelli	197-201
U. CEGRELL, Measures of finite pluricomplex energy	203-213
D. COMAN, V. GUEDJ, S. SAHIN and A. ZERIAHI, Toric pluripotential theory	215-242
S. CYNK and D. VAN STRATEN, Periods of rigid double octic Calabi-Yau threefolds	243-258

Part 2

S. T. DINH, K. KURDYKA and T. S. PHẠM, Global mixed Łojasiewicz inequalities and asymptotic critical values	259-266
P. M. GAUTHIER, T. RANSFORD, S. ST-AMANT and J. TURCOTTE, Approximation by random complex polynomials and random rational functions	267-294
F. HASLINGER, The δ -complex on the Segal-Bargmann space	295-317
C. O. KISELMAN, Generalized convexity: The case of linearly convex Hartogs domains	319-344
A. KOWALSKI and I. MARCZENKO, On deviations and spreads of entire curves	345-368

Contents

T. KRASIŃSKI and J. WALEWSKA, Non-degenerate jumps of Milnor numbers of quasihomogeneous singularities	369–386
B. LAMEL and N. MIR, Formal versus analytic CR mappings	387–422
L. LEMPERT, Isometries in spaces of Kähler potentials	423–458
T. OHSAWA, Application of L^2 methods to the Levi problem on complex manifolds	459–466
Y. OKUYAMA and M. STAWISKA, A generalization of the converse of Brolin's theorem	467–472
A. SADULLAEV, On the Weierstrass Preparation Theorem	473–479
R. SIGURDSSON and A. S. SNÆBJARNARSON, Monge–Ampère measures of plurisubharmonic exhaustions associated to the Lie norm of holomorphic maps	481–504
J. WIEGERINCK, An example concerning Sadullaev's boundary relative extremal functions	505–508
