|                                                                                                                                 |    |
|---------------------------------------------------------------------------------------------------------------------------------|----|
| PREFACE ( <i>Joanne Irene Gabrynowicz</i> ) . . . . .                                                                           | 9  |
| INTRODUCTION . . . . .                                                                                                          | 13 |
| I. INTRODUCTION TO SATELLITE NAVIGATION<br>( <i>Katarzyna Myszone-Kostrzewa</i> ) . . . . .                                     | 15 |
| 1. How does the satellite navigation system work? . . . . .                                                                     | 15 |
| 2. The concepts of global and regional satellite<br>navigation systems. . . . .                                                 | 16 |
| 3. Existing global satellite navigation systems . . . . .                                                                       | 19 |
| 4. Existing regional satellite navigation systems. . . . .                                                                      | 20 |
| 5. The European satellite navigation systems . . . . .                                                                          | 21 |
| II. THE EUROPEAN SATELLITE NAVIGATION SYSTEMS –<br>LAW AND INSTITUTIONS ( <i>Katarzyna Myszone-Kostrzewa</i> ) . . . . .        | 25 |
| 1. The European satellite navigation systems and the scope<br>of application of international law. . . . .                      | 25 |
| 2. The European satellite navigation systems and the United Nations<br>and other universal international organizations. . . . . | 29 |
| 3. The European satellite navigation systems<br>and the European Space Agency . . . . .                                         | 33 |
| 4. The European satellite navigation systems<br>and the European Union law . . . . .                                            | 35 |
| 5. Summary . . . . .                                                                                                            | 38 |
| III. GALILEO: PRACTICAL AND LEGAL CHALLENGES<br>FOR THE EUROPEAN UNION ( <i>Karol Karski</i> ) . . . . .                        | 41 |
| 1. Galileo – European Union’s Satellite Navigation . . . . .                                                                    | 41 |
| 2. Galileo vs. public procurement . . . . .                                                                                     | 41 |
| 3. Russian rockets and European satellites . . . . .                                                                            | 45 |
| 4. Failure of clocks – the heart of satellite navigation. . . . .                                                               | 47 |
| 5. Dispute between the United Kingdom and the European Union<br>about access to Galileo after Brexit. . . . .                   | 49 |
| 6. Summary . . . . .                                                                                                            | 55 |

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| IV. ENVIRONMENT PROTECTION (THE INFLUENCE OF HUMAN-MADE SPACE OBJECTS AND/OR DEBRIS) AND SATELLITE NAVIGATION<br>( <i>Barbara Skardzińska</i> ) . . . . .  | 57  |
| 1. Introduction . . . . .                                                                                                                                  | 57  |
| 2. Space debris in international law, European Union law,<br>and national law . . . . .                                                                    | 58  |
| 2.1. Space debris in international law . . . . .                                                                                                           | 58  |
| 2.2. Space debris in the European Union law . . . . .                                                                                                      | 62  |
| 2.3. Space debris in national law . . . . .                                                                                                                | 64  |
| 3. Liability for environmental damage . . . . .                                                                                                            | 66  |
| 3.1. Liability for environmental damage<br>in international space law . . . . .                                                                            | 66  |
| 3.2. Liability for environmental damage<br>in international public law . . . . .                                                                           | 73  |
| 4. The procedure for claiming damages . . . . .                                                                                                            | 76  |
| 5. Summary . . . . .                                                                                                                                       | 79  |
| V. HUMAN RIGHTS AND THE EUROPEAN SATELLITE NAVIGATION<br>SYSTEMS ( <i>Zuzanna Kulińska-Kępa</i> ) . . . . .                                                | 81  |
| 1. Introduction . . . . .                                                                                                                                  | 81  |
| 2. The European satellite navigation systems<br>and the right to life. . . . .                                                                             | 83  |
| 3. The European satellite navigation systems and the right<br>to personal liberty and security . . . . .                                                   | 85  |
| 4. The European satellite navigation systems and the right<br>to property . . . . .                                                                        | 87  |
| 5. The European satellite navigation systems and the right<br>to information . . . . .                                                                     | 90  |
| 6. The European satellite navigation systems and the right<br>to good administration . . . . .                                                             | 92  |
| 7. The European satellite navigation systems and the right<br>to respect of private and family life and the right to personal<br>data protection . . . . . | 93  |
| 8. The European satellite navigation systems and the right<br>to development and freedom from poverty . . . . .                                            | 101 |
| 9. The European satellite navigation systems<br>and the non-discrimination clause . . . . .                                                                | 105 |
| 10. The European satellite navigation systems<br>and the right to effective remedy . . . . .                                                               | 106 |
| 11. Summary . . . . .                                                                                                                                      | 110 |

|                                                                                                                                                                                                     |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| VI. SECURITY OF THE EUROPEAN SATELLITE NAVIGATION SYSTEMS<br>( <i>Katarzyna Myszona-Kostrzewa</i> ) . . . . .                                                                                       | 111 |
| 1. Introduction . . . . .                                                                                                                                                                           | 111 |
| 2. The European Union law and the security of the European<br>satellite navigation systems . . . . .                                                                                                | 114 |
| 3. The European Union law and the security of the Union<br>and its Member States as affected by the operation<br>of the European satellite navigation systems . . . . .                             | 117 |
| 4. Summary . . . . .                                                                                                                                                                                | 118 |
| CONCLUSIONS . . . . .                                                                                                                                                                               | 119 |
| I. THE GALILEO PROGRAMME AS A TOOL OF THE INTERNATIONAL POLICY<br>OF THE EUROPEAN UNION ( <i>Zbigniew Kłos</i> ) . . . . .                                                                          | 119 |
| 1. Galileo – Second Generation GNSS Constellation, Present Status<br>and Perspectives . . . . .                                                                                                     | 119 |
| 2. Galileo – International Contest . . . . .                                                                                                                                                        | 122 |
| 3. Galileo – the EU–ESA cooperation . . . . .                                                                                                                                                       | 122 |
| 4. Cooperation between the European Union and the United States<br>on satellite navigation . . . . .                                                                                                | 124 |
| 5. Cooperation between the European Union and other states<br>on satellite navigation . . . . .                                                                                                     | 126 |
| 5.1. Cooperation between the EU and China on satellite<br>navigation . . . . .                                                                                                                      | 126 |
| 5.2. Galileo as the European Union platform for space dialogue<br>with other states . . . . .                                                                                                       | 129 |
