

CONTENTS

PREFACE	9
PLENARY SESSION	11
GÁTI, B. – VASS, G. (Hungary + USA) Investigation of Airfoils in Jet Flow	13
PITTNER, CH. – EDELMANN, J. – PLÖCHL, M. (Austria) Reference Models for Torque-Vectoring Electric Vehicles	23
MONTRouGE, A. – BIROUCHE, A. – TORRES, G. – LAMY, CH. – PARSONS, A. – BASSET, M. (France + Luxemburg) Identification of Tire Model Parameters from Vehicle Measurements Using Sensitivity Analysis	31
MÜLLER, G. – LUBER, B. – SORRIBES-PALMER, F. – PIETSCH, L. – SIX, K. (Austria) Influence of the Wheel Profile Condition on the Dynamics of Wheel-Rail In- terface Quantities	39
VU, V.T. – ZOLOTAS, A. – SENAME, O. – DUGARD, L. (Vietnam + France) Towards Robust Linear Parameter Varying Control of Active Rail-Vehicle Wheel-Sets	45
HEGEDŰS, F. – BÉCSI, T. (Hungary) Evaluation of Trajectories for Automated Road Vehicles in Sense of Dynam- ical Feasibility	57
BENEDA, K. – NAGY, A. (Hungary) Introduction, Identification and Control of a New Fuel Metering System on a Micro Turbo Jet Engine	65
VANDANJON, P.-O. – VINOT, E. – EL ALMI, T. (France) Slope Optimisation (Sloop): Tailor-Made Optimisation for Road Longitudinal Profile Eco-design Considering the Dynamics of Vehicles	75
SESSION FOR DYNAMICS, IDENTIFICATION AND ANOMALIES OF RAILWAY VEHICLES	83
ZOLLER, V. (Hungary) Analysis of the Track/Vehicle Interaction with Regard to the Coupling with the Subgrade Dynamics	85
CHUDZIKIEWICZ, A. – STELMACH, A. (Poland) Evaluation of the Process of Placing in Service of a Rail Vehicle with Regard to Safety of Transport Operation	91
JAKUSHEV, A. – HOMONETS, I. (Russia) Impact of Residual Stresses on the Railcar Wheel Strength.....	93
ALBON, A. (France) On Wheel Profile Optimization by Generic Algorithm.....	101
SZABÓ A. – ZOBORY, I. (Hungary) Vertical Dynamical Loading Conditions of Driven Wheel-Set.....	109

ZOBORY, I. – NAGY, D. (Hungary)	
Creep Control in Brake Operation to Avoid Wheel Sliding and Flattening.....	121
NÉMETH, I. (Hungary)	
How to Avoid Dynamical Instability in Disc-Brake System by Using Additional Linear Damping	131
KRÉMER, M. (Hungary)	
Knorr-Bremse Results in Adhesion Management and Participating in PINTA Project	143
LIN, S. – SUDA, J. (Japan)	
Vehicle Condition Monitor System Considering Vehicle and Track Maintenance.....	151
ALFI, S. – BRUNI, S. – FU, B. (Italy + China)	
Condition Monitoring and Fault Detection of Suspension Components in Freight Wagons Using Acceleration Measurements	157
CSIBA, J. (Hungary)	
Numerical Analysis of the Failures, Reliabilities and Availabilities Concerning a Given Family of Railway Carriages under Different Operation and Maintenance Circumstances.....	165
ZÁBORI, Z. – ZOBORY, I. (Hungary)	
Track Qualification Method by Using System Dynamics Based Parameter Identification	173
MALATINSZKY, S. (Hungary)	
Conformity Assessment of Modernised Locomotive Bogie and Body Connection	187
DI GIALLEONARDO, E. – BIONDA, S. – BRAGHIN, F. – SOMASCHINI, C. (Italy)	
Design of Experiment Approaches for the Calibration of Instrumented Wheel-Set	193
SOMASCHINI, C. – DI GIALLEONARDO, E. – COLLINA, A. – BOC-CIOLONE, M. (Italy)	
Algorithm Development to Classify the Deterioration of Insulated Rail Joints by Means of on Board Measurements	201
CARNEVALE, M – COLLINA, A. – ZUIN, A. (Italy)	
A Rolling Stock Based System for Pantograph and Catenary Condition Monitoring: Validation through Numerical Simulations on Rigid Catenary	209
SZÓKE, D. – ZOBORY, I. (Hungary)	
Investigation into the Structure of the Railway Track/Vehicle Connection	219
SESSION FOR DYNAMICS, IDENTIFICATION AND ANOMALIES OF ROAD VEHICLES.	229
COSTA, L. – PERRIN, CH. – DUBOIS-LOUNIS, M. – SERRE, T. – M'SIRDI, N.K. (France)	
Modelling of the Two-Wheeler Dynamic Behaviour for Emergency Situations Analyses	231
KOKREHEL, Cs. – NÉMETH, H. (Hungary)	
Wheel-brake Design for Heavy Duty Electric Vehicles.....	239
SZÚCS, G. – BÁRI, G. (Hungary)	
Tire Data Analysis Method for Finding Grip-Optimal Slip and Camber Values	247

WIDNER, A. – BÁRI, G. (Hungary) Investigating the Effects of Roll Centre Height, during Transient Vehicle Manoeuvres	255
ERŐSDI, Z. – BÁRI, G. (Hungary) Yaw Rate Control for Enhancing Vehicle Steering Behaviour	261
BÁRDOS, Á. – NÉMETH, H. (Hungary) Diesel Engine Cylinder-Charge Composition Control with HpEGr and Exhaust Throttling	269
NAKANO, K. – SEKI, M. – KAIZUKA, T. – ZHENG, R. – SAKURA, T. – MAKI, T. (Japan) Design of Haptic Steering Guidance Controller Considering Look-ahead Distance	277
LENGYEL, H. – SZALAY, ZS. (Hungary) Potential Weak Points of Environment Sensors in Autonomous Vehicles	285
SIMON, T. S. – MELEGH, G – SZALAY, ZS. (Hungary) Automated Vehicles' Accidents – Uber Self-Driving Vehicle Accident	293
NYERGES, Á. – TIHANYI, V. (Hungary) Environment Sensing and Parking Place Detection for Automated Vehicles	303
ARADI, SZ. – TARI, B. – BÉCSI, T. – GÁSPÁR, P. (Hungary) Reinforcement Learning Based Racing Car Control	313
KONCZ, A. (Hungary) Failure Mode and Effect Analysis Types in the Automotive Industry	321
SESSION FOR DYNAMICS, IDENTIFICATION AND ANOMALIES OF AIRCRAFT AND SHIPS	329
SZONDA, G. – VERESS, Á. (Hungary) CFD Analysis and Redesign of Main Landing Gear Unit on Skycruiser Sc-200 Autogyro for Drag Reduction	331
BÍRÓ, O. – SZABÓ, G. (Hungary) Integrating Large Remotely Piloted Vehicles into the Controlled Airspace	349
URBAN, A.X.C. – MOLNAR, I.T. - VERESS, A. (Mexico+Hungary) Investigation of Hybrid Propulsion Systems Applied on Small Sized Aircraft	357
BENEDA, K. – DERBEL, K. (Hungary+Tunisia) Identification of Single Spool Micro Turbojet Engine with Fixed Exhaust Nozzle at Multiple Operating Points for Linear Parameter Varying Control	371
HARGITAL, CS. – SIMONGÁTI, GY. – ZALACKÓ, R. (Hungary) Operational Profile of Inland Public Transport	381
SESSION FOR VEHICLE CONTROL THEORY AND INTERDISCIPLINARY SCIENCES	393
FÉNYES, D. – NÉMETH, B. – GÁSPÁR, P. – ASSZONYI, M. (Hungary) Possibilities of Vehicle State Estimation Using Big Data Approaches	395
SZÓTS, D. – NÉMETH, B. (Hungary) Challenges and Problems in the Design of Smart Intersections	403
DALVÁRI, M. – FÉNYES, D. – MIHÁLY, A. – NÉMETH, B. – GÁSPÁR, P. (Hungary) Camera-Based Lateral Driver Modelling for Vehicle Control Design Purposes	409

SZALAY, J. – KÖVÁRY, B. – ARADI, SZ. – GÁSPÁR, P. – BÉCSI, T. (Hungary) Highway Behaviour Training through Learning Based State Choice Model.....	417
DO, M. H. – KOENIG, D. – THEILLIOL, D. (France+Vietnam) Robust H_{∞} Proportional-Integral Observer Design for Actuator Fault Estimation	425
VU, V. T. – SENAME, O. – DUGARD, L. – PHAM, T. P. – DINH, V. P. (France+Vietnam) H_{∞} /LPD Active Braking Control System to Prevent Rollover of Heavy Vehicles	437
RATHAI, K.M.M. – SENAME, O. – ALAMIR, M. (France) A Comparative Study of Different NMPC Schemes for Control of Semi-Active Suspension System	447
VARGA, B. (Hungary) Energy Aware Cruise Control for Urban Public Transport Buses	455
HEGEDŰS, T. – NÉMETH, B. – BEDE, ZS. (Hungary) Control and Decision Method for Overtaking Problem in Autonomous Vehicles	463
PAPP, J. – BÁRI, G. (Hungary) Hardware in the Loop Test System for Teaching Model Based Design for Automotive Control	471
PHAM, T.P. – SENAME, O. – DUGARD, L. – VU, V.T. (France +Vietnam) Real-Time Estimation of the Damping Force of Vehicle Electrorheological Suspension	477
DOMINA, Á. – TIHANYI, V. (Hungary) Comparison of Controller Systems and Motion Modelling Methods for Autonomous Vehicle Trajectory Following Practice.....	487
KOLONITS, F. (Hungary) Possible Cause of an Internal Level Crash, '95 Kobe Eq.	497
KISS, CS. (Hungary) Some Remarks on Designing Crankshafts.....	507
HIDAS, A. (Hungary) Thermal Simulation to Ensure Heat Management of Vehicle Ecus with Plastic Enclosure.....	517
POKORÁDI, L. – LÁZÁR-FÜLEP, T. (Hungary) Dependability of Vehicle Systems with Complex Interconnections	519
POKORÁDI, L. – SOMOSI, V. (Hungary) Graph-Theoretical Investigation into Vehicle and Transportation Systems	529
FERENCZ, P. (Hungary) The Question of Lifetime: Extension Possibilities of Bogie Force Transmission Elements on the Basis of Condition Test Results	539
TULIPANT, G. – SZABÓ, A. – ZOBORY, I. (Hungary) Laboratory Investigation into the Noise Generated by Sliding Friction for Cast Iron and Steel Friction Pair	549
ADVERTISEMENTS	557
