

Table of Contents

Author's Preface	9
Notation	11
Introduction.	13
Chapter 1 – Method of Application	19
The finite element method	19
Mathematical analysis.	22
Design.	26
Appendages	26
Manufacture.	27
Chapter 2 – Circular Plates Under Lateral Loading	28
Theory	29
Computer program	31
Example 2.1.	32
Example 2.2.	34
Example 2.3.	34
Example 2.4.	35
Example 2.5.	36
Chapter 3 – Cylinder with Flat End	39
Theory	40
Computer program	43
Example 3.1.	44
Example 3.2.	46
Chapter 4 – Ring-stiffened Circular Cylinder	49
Theory	50
Computer program	56

Example 4.1	57
Example 4.2	60
Chapter 5 – Axisymmetric Constant Meridional Curvature Element	64
Theory	66
Computer program	69
Example 5.1	70
Example 5.2	71
Example 5.3	73
Example 5.4	75
Example 5.5	77
Chapter 6 – Thick Conical Shell.	81
Theory	82
Computer program	87
Example 6.1	88
Example 6.2	92
Chapter 7 – Three-node Thick Axisymmetric Element	94
Theory	95
Computer program	97
Example 7.1	99
Example 7.2	100
Chapter 8 – Free Vibrations of Conical Shells.	105
Theory	107
Computer program	110
Example 8.1	110
Example 8.2	111
Cooling towers	114
Chapter 9 – Buckling of Conical Shells	116
Theory	117
Computer program	119
Example 9.1	119
Example 9.2	122
Chapter 10 – Free Vibration of Domes	126
Theory	127
Computer program	133
Example 10.1	134
Example 10.2	136
Comparison with other hemi-ellipsoidal domes	137

Chapter 11 – Elastic Instability of Domes	146
Theory	148
Computer program	150
Example 11.1	151
Example 11.2	153
Other Results	156
Chapter 12 – Two-dimensional Axisymmetric Field Problems	158
Theory	159
Computer program	162
Example 12.1	163
Example 12.2	165
Chapter 13 – Three-dimensional Axisymmetric Field Problems	167
Theory	168
Computer program	169
Example 13.1	171
Chapter 14 – Vibration of Submerged Axisymmetric Plates	175
Theory	176
Computer program	184
Example 14.1	186
Example 14.2	187
References	190
Appendix 1	Some Basic Expressions
Appendix 2	Computer Program for Circular Plates
Appendix 3	Computer Program for Circular Cylinders and Plates
Appendix 4	Computer Program for Ring-stiffened Cylinders
Appendix 5	Computer Program for Static Analysis of Doubly-curved Axisymmetric Shells
Appendix 6	Computer Program for Thick Conical Shells
Appendix 7	Computer Program for Doubly-curved Thick Axisymmetric Shells
Appendix 8	Computer Program for Vibration of Conical Shells
Appendix 9	Computer Program for Elastic Instability of Conical Shells
Appendix 10	Computer Program for Vibration of Doubly-curved Axisymmetric Shells
Appendix 11	Computer Program for Elastic Instability of Doubly-curved Axisymmetric Shells

Appendix 12	Computer Program for Axisymmetric Field Problems – Two-dimensional case.	276
Appendix 13	Computer Program for Axisymmetric Field Problems – Three-dimensional Case	279
Appendix 14	Computer Program for the Vibration of a Submerged Plate	284
Appendix 15	Program Running	294
