

CONTENTS OF VOLUME 1

GENERAL

- Adaptive Finite Element Methods for Complex Problems in
Solid and Fluid Mechanics 3
J. T. Oden and L. Demkowicz
- Importance of Self Adaptive Finite Elements and *a-posteriori*
Error Analysis 15
J. P. de S. R. Gago
- CSA/NASTRAN — a General Purpose Program for Structural
Analysis 23
R. Narayanaswami and J. G. Cole
- An Efficient Element Numbering Algorithm for Minimal
Front Width 39
P. S. Anantharama and K. S. R. K. Prasad
- Tracking Reorthogonalization Lanczos Algorithm and
Its Applications 51
Q. Jiangning and Z. Xianglin

STRUCTURAL MECHANICS

- Nonlinear Shell Analysis Based on Free Formulation Elements 61
M. K. Nygard, J. Kjekken and P. G. Bergan
- A Triangular Thin Shell Element Based on Discrete Kirchhoff
Theory: Some Patch Test Solution Results 73
S. Sridhara Murthy and R. H. Gallagher
- On Stiffness Matrix of Tapered Triangular DKT Plate Bending
Element 83
G. Subramanian, C. R. Babu and C. J. Bose
- Reduced Integration and Addition of Nonconforming Modes
in Finite Element Analysis 93
C. K. Choi and M. S. Bang
- Superfinite Element Analysis of Ocean Structures 103
K. Rajagopalan
- Performance of Straight and Curved Finite Elements for Analysis
of Curved Beams and Arches 113
T. V. S. R. Appa Rao, N. Pandian, S. Chandra and N. R. Iyer
- Three-dimensional Stress Analysis of a Planetary Axle Housing
Using Finite Element Technique 123
N. H. Shareef, K. N. Seetharamu and B. V. A. Rao
- A New Approach to Make Use of Plate Elements for Nonlinear
Thermal Gradient Across Thickness 133
B. K. Dutta, B. Murali, H. S. Kushwaha and A. Kakodkar
- Analysis of Large Infilled Frames by Substructuring Techniques 143
V. Thiruvengadam

Finite Element Analysis of Continuous Cylindrical Shells <i>C. Natarajan, P. K. Aravindan and P. Srinivasa Rao</i>	153
Static Analysis of Guyed Mast Tower <i>P. N. Godbole, Prem Krishna and C. V. Khandekar</i>	165
The Superparametric Element for Analysis of Stiffened and Composite Shells <i>D. N. Buragohain and A. S. Patil</i>	177
COMPOSITE MATERIALS	
Nonlinear Finite Element Models of Laminated Plates and Shells <i>J. N. Reddy and K. Chandrashekhar</i>	189
Finite Element Applications in Mechanics of Composites <i>H. V. Lakshminarayana and C. Ramesh Babu</i>	211
Nonlinear Static Analysis of Multilayered Sandwich Plates <i>S. V. Rajagopal, G. Singh and Y. V. K. Sadasiva Rao</i>	221
A Modified Penalty Element for Laminated Shells <i>G. Balasubrahmanyam and K. Balaraman</i>	231
Finite Element Modelling and Analysis of a Composite Rudder <i>H. M. Aruna, K. Guruprasad and B. R. Somashekar</i>	239
A 'Modified' Finite Element Technique for the Determination of Interfacial Stresses in a Composite Material <i>A. K. Soh</i>	249
Two Triangular Elements for the Analysis of Thick Sandwich Plates <i>S. K. Ghosh and D. N. Buragohain</i>	259
NONLINEAR PROBLEMS	
Notes and Comments on Computational Elasto-Plasticity: Some New Models and Their Numerical Implementation <i>S. N. Atluri</i>	271
Elasto-Plastic Finite Element Analysis of Slopes in Rock Mass <i>T. Ramamurthy, K. G. Sharma and O. P. Ailawadi</i>	291
Elasto-Plastic Finite Element Analysis of Interacting Tunnels <i>K. G. Sharma, A. Varadarajan and R. K. Srivastava</i>	301
Finite Element Analysis of Arch Dams up to Failure <i>J. O. Pedro and C. Pina</i>	311
Nonlinear Modelling in Practical Design <i>T. H. Søreide</i>	321
Quasi-Newton, Partitioned Variable Metric, EBE and Other Preconditioned Conjugate Gradient Methods for Nonlinear Problems of Structural Mechanics <i>M. P. Kamat, D. J. Vanden Brink and L. T. Watson</i>	333
Quasistatic Indentation of a Rubberlike Layer by a Rigid Cylinder <i>R. C. Batra</i>	345

Geometrically Nonlinear Formulation for Shells and Beams <i>K. S. Surana</i>	359
Finite Element Analysis for Buckling of Plates with Eccentrically Located Square Holes <i>A. B. Sabir and F. Y. Chow</i>	371
Nonlinear Elastic Analysis of Solid Propellant Grains for Slump Studies <i>M. K. Jana, K. Renganathan and G. Venkateswara Rao</i>	383
CONCRETE STRUCTURES	
Use of Finite Element Techniques to Predict Nonlinear Behavior of Reinforced Concrete Structures <i>W. C. Schnobrich and H. T. Hu</i>	395
A Finite Element Formulation for Analysis of Reinforced Concrete Structures <i>F. Damjanić</i>	413
Analysis of Reinforced Concrete Membrane Shells <i>A. K. Gupta and H. Akbar</i>	423
Non-linear Finite Element Analysis of Eccentrically Stiffened Bridge Decks <i>R. J. Cope and K. R. Edwards</i>	435
Stress Distribution in Prestressed Concrete Anchorage Blocks — a Comparative Study Using Boundary Element and Finite Element Methods <i>K. T. Sundara Raja Iyengar, B. K. Raghu Prasad and N. Gopala Rao</i>	449
GEOMECHANICS	
Three-dimensional Stress Analysis of Anisotropic Layered Soils <i>T. Kuppusamy</i>	463
Strip Footing — Soil Interaction with Loss of Contact <i>I. D. Desai, B. B. Mistry and B. M. Patel</i>	475
Ultimate Uplift Resistance of Multiunderreamed Deep Anchors in Cohesive Soil Medium <i>D. M. Dewaikar</i>	487
Elasto-plastic Finite Element Analysis of Some Soil-Foundation Interaction Problems <i>S. L. Narasimhan and N. S. V. Kameswara Rao</i>	495
Analysis of Viscoelastic Deformation of a Compacted Soil <i>S. V. Ramaswamy</i>	505
The Analytical Production of Design Charts Using Three Dimensional Finite Elements to Solve the Soil-Structure Interaction Problem Between Precast Concrete Pavement Units and Low Bearing Capacity Sub-grades <i>J. W. Bull</i>	513
An Evaluation of Pavement Design Parameters for Some Graded Unbound Aggregate Materials and Its Application Using Finite Element Methods <i>S. P. Bindra</i>	523

FEM Analysis of Triaxial Behavior of Reinforced Earth <i>J. N. Mandal and A. N. R. Char</i>	533
Progressive Action in Geomechanics — the Role of Finite Elements <i>R. N. Chowdhury and P. A. Gray</i>	541
FEB and BEM in Elasto-plastic Problems for Soil-Structure Interaction <i>V. F. Poterasu and N. Mihalache</i>	551

CONTENTS OF VOLUME 2

FLUID FLOW

- On Topics of Finite Element Analysis in Computational Fluid Dynamics 563
A. J. Baker
- Lagrangian Finite Element Method for Non linear Free Surface Motions 579
M. Kawahara, B. Ramaswamy and A. Anjyu
- A Tidal Circulation Model for Kuwait Territorial Waters 589
T. C. Gopalakrishnan
- Finite Element Solution of Inverse Problem in Geohydrology by Non Linear Programming 599
P. Sreenivasulu and G. Jagmohan Das
- Numerical Solution of Unsteady Flow in Ducts by the Finite Element Method 609
P. K. Mahanti
- Fluid Transients Following a Valve Closure by FEM 615
D. G. Paygude, B. Vasudeva Rao and S. G. Joshi

FREE VIBRATION

- A Higher Order Beam Element for Vibration of Beams with Discontinuities 627
G. Subramanian and T. S. Balasubramanian
- Finite Element Modelling of Semi-submersibles 635
M. V. Dharaneepathy and S. Gomathinayagam
- Natural Frequency Analysis of Compressor Rotor Blades 645
S. K. Sane, C. S. Gurujee, A. R. Malpani and C. M. P. Fernandes
- Natural Frequency Analysis of Pretwisted Plates 655
S. K. Sane, C. S. Gurujee, A. R. Malpani, V. N. Sharma and C. M. P. Fernandes
- Free Vibration Characteristics of Prefabricated Shear Wall Including Foundation Interaction 665
S. C. Chakrabarti, G. C. Nayak and D. K. Paul
- Vibration Data Reduction for Design, Analysis and Testing of Spacecraft 677
P. S. Nair, M. Sambasiva Rao and S. Durvasula
- Comparison of Block-Stodala and Static Condensation Algorithms for the Linear Flutter of Axisymmetric Shells 689
C. V. Ramakrishnan and P. J. Sunder
- Experience in the Use of Component Mode Synthesis in a Project Environment 701
B. G. Prakash and M. S. S. Prabhu
- Vibration of Thermally Stressed Skewed Plates 711
N. Ganesan and M. S. Dhotarad

Nonlinear Vibrations of Thermally Stressed Plates by Finite Element Method	721
<i>N. Ganesan and M. S. Dhotarad</i>	
DYNAMICS	
Dynamic Amplification of Displacements and Stresses in a Buried Tunnel	733
<i>A. H. Shah, K. C. Wong and S. K. Datta</i>	
Treatment of Fluid Structure Interaction with Fustin Code	743
<i>P. Chellapandi</i>	
A Dynamic Material Model from Shock Compression of Geological Materials for the Adina Code	753
<i>A. Das Gupta</i>	
Nonlinear Dynamic Analysis of Guyed Towers	761
<i>G. V. Surya Kumar and N. V. Raman</i>	
Dynamic Behaviour of Saw Blade with Applied Damping Treatment	771
<i>S. Haranath, N. Ganesan and B. V. A. Rao</i>	
Seismic Analysis of Reactor Building on a Rocky Site	781
<i>A. R. Chandrasekaran, S. K. Thakkar, D. K. Paul, N. C. Singhal, M. M. Tilak and U. S. P. Verma</i>	
Seismic Analysis of Ventilation Stack	793
<i>R. Patnaik, S. Prakash, H. S. Kushwaha and V. S. Gowaikar</i>	
Seismic Response of Cooling Tower	799
<i>R. Singh, H. S. Kushwaha and B. K. Dutta</i>	
Elastic Response of a Launch Vehicle-Payload-Fairing to Separation Shock	807
<i>M. N. G. Elayathu and E. M. Abdul Salam</i>	
Thermal Stress Analysis of Turbine Rotor under Transients	815
<i>S. Vasudeva Rao and S. Rahamatulla</i>	
Finite Element Inelastic Analysis of Nuclear Power Plants Subjected to Dynamic Loads	827
<i>B. K. Raghu Prasad and A. R. Gopalakrishnan</i>	
FIELD PROBLEMS	
Coupled Heat-Moisture Flow in Saturated/Unsaturated Porous Media	837
<i>S. K. Saxena and M. Geraminegad</i>	
Finite Element Modelling for Nonlinear Diffusion Equation	853
<i>B. S. Babur and E. Jones</i>	
Analysis of Network of Heat Exchangers Using Finite Elements	861
<i>S. G. Ravikumaur, K. N. Seetharamu and P. A. Aswathanarayana</i>	
Finite Element Methods for Investigation of Air Film in Conveyor Applications	871
<i>C. J. G. Chandra, K. N. Seetharamu and M. A. Parameswaran</i>	

Exact Finite Elements for Parabolic Boundary Value Problems <i>K. N. Shukla and M. J. Chacko</i>	881
STRESS CONCENTRATION	
Modified Crack Closure Integral Method for Higher Order Finite Elements <i>T. Krishnamurthy, T. S. Ramamurthy, K. Vijayakumar and B. Dattaguru</i>	891
Finite Element Analysis of Segment Joints in Long Motor Cases <i>K. P. Rao, R. K. Gupta, S. K. Radhamohan and S. Murugesan</i>	901
Finite Element Predictions of J and CTOD for Nonlinear Fracture Mechanics <i>R. H. Dodds, S. T. Rolfe and G. Wellman</i>	909
A Three-dimensional Finite Element Program for Crack Initiation and Propagation in Solids <i>A. R. Kukreti, A. S. Khan and A. Kumar</i>	923
Special Elements for Analysis of Fasteners in Composite Plates <i>A. C. B. Naidu, T. Krishnamurthy, B. Dattaguru, T. S. Ramamurthy and A. K. Rao</i>	933
Prediction of Fatigue Crack Propagation Based on Finite Element Fracture Analysis <i>A. A. Mufti, N. G. Zamani, J. F. Porter, F. Taheri and L. T. Russell</i>	943
A Finite Element Method for Evaluating Stresses Around Cutouts in Shells <i>R. Ramesh Kumar, K. Rajaiah, R. M. Belkune and Tarun Kant</i>	955
GRAPHICS	
The Missing Link Between CAD and FEM — Does It Exist? <i>M. Soerensen and G. Boehmler</i>	967
Interactive Graphics on a Microcomputer for a Design Office <i>N. Raghavan, S. G. Joglekar and M. C. Tandon</i>	985
Contour Plotting Using Parametric Bilinear Patches <i>B. S. Babu and G. R. Shevare</i>	993
AUTHOR INDEX	1001
SUBJECT INDEX	1005
