PREFACE	iii
1 INTRODUCTION	1
Classification of Methodologies	1
Overview Studies	3
Organization of Book	8
Selected References	8

TECHNOLOGIES FOR GROUND WATER POLLUTION CONTROL

2 PHYSICAL CONTROL MEASURES	13
Source Control Strategies	13
Stabilization/Solidification Strategies	15
Well Systems	16
Construction	17
Design	18
Application in Hydrocarbon Recovery	33
Costs	35
Advantages and Disadvantages	39
Interceptor Systems	41
Construction	43
Collector Drains	43
Interceptor Trenches	45
Design	47
Collector Drains	47
Interceptor Trenches	49
Costs	49
Advantages and Disadvantages	50
Surface Water Control, Capping and Liners	51
Construction—Surface Capping	53
Surface Capping—Selection and Design Considerations	55
Costs	64
Sheet Piling	65
Construction	65

Costs	65
Advantages and Disadvantages	65
Grouting	66
Construction	66
Design	68
Costs	74
Advantages and Disadvantages	74
Slurry Walls	75
Construction	75
Design	78
Costs	84
Advantages and Disadvantages	84
Selected References	85
3 TREATMENT OF GROUND WATER	89
Air Stripping	89
Description of Process	90
Design Parameters and Procedures	92
Applications to Ground Water	94
Costs	95
Carbon Adsorption	96
Description of Process	98
Design Parameters and Procedures	100
Applications to Ground Water	101
Costs	101
Biological Treatment	102
Description of Process	103
Design Parameters and Procedures	104
Applications to Ground Water	105
Costs	110
Chemical Precipitation	110
Description of Process	112
Design Parameters and Procedures	112
Applications to Ground Water	112
Costs	113
Other Treatment Techniques for Inorganics	115
Treatment Trains	116
Selected References	124
4 IN SITU TECHNOLOGIES	127
In Situ Chemical Treatment	127
Description of Process	127

Advantages and Disadvantages	130
In Situ Biological Stabilization	130
Enhancement of Indigenous Population	133
Addition of Acclimated Microorganisms	142
Conclusions	149
Selected References	150

DECISION-MAKING IN AQUIFER RESTORATION PROJECTS

5	PROTOCOL FOR AQUIFER RESTORATION	
	DECISION-MAKING	159
	Background Information	159
	Conceptual Framework for Aquifer Restoration	
	Decision-Making	164
	Preliminary Activities	165
	Multidisciplinary Team	165
	Problem Definition and Characterization	165
	Anticipated Problems	166
	Existing Problems	166
	Preliminary Study	166
	Plume Delineation	167
	Hydrogeologic Characteristics	169
	Site Characterization	171
	Water Use and Requirements	172
	Human Health Costs and Risk Assessment	172
	Land Use Patterns and Growth Projections	173
	Regulations and Institutional Constraints	173
	Funding	174
	Data Evaluation	175
	Data Needs	175
	Development of Alternatives	176
	Definition of Goals	176
	Goals Identification Matrix	178
	Technology-Decision Factor Matrix	181
	Preliminary Screening	181
	Scope Design	187
	Iteration	187
	Evaluation of Alternatives and Selection of Aquifer	
	Restoration Strategy	187
	Economic Considerations	188

Economic Evaluation	195
Environmental Evaluation	197
Risk Assessment	199
Selected References	201
6 TECHNIQUES FOR DECISION-MAKING	205
Conceptual Framework for Trade-Off Analysis	206
Importance Weighting for Decision Factors	207
Systematic Comparison of Structured Importance	
Weighting Techniques	209
Ranking Techniques for Importance Weighting	212
Public Preference Approach	213
Nominal Group Process Technique	213
Rating Techniques for Importance Weighting	213
Predefined Importance Scale	214
Group Approach Using Scales of Importance	214
Multiattribute Utility Measurement Technique	217
Computerized Version of MAUM Technique	219
Paired Comparison Techniques for	
Importance Weighting	227
Unranked Paired Comparison Techniques	227
Ranked Paired Comparison Techniques	233
Delphi Technique for Importance Weighting	242
Scaling/Rating/Ranking of Alternatives	247
Paired Comparison Technique for	
Scaling/Rating/Ranking	248
Functional Curves for Scaling/Rating/Ranking	251
Development of Decision Matrix	252
Selected References	258
7 RISK ASSESSMENT AS RELATED TO	
AQUIFER RESTORATION PLANNING	263
Background Information	263
Elements of Risk Assessment	267
Environmental Risk Analysis	270
Risk Assessment for Hazardous Waste Disposal Sites	272
Hazard Ranking System	278
Site Rating Methodology	286
Air Quality Risk Assessment System	290
Summary	291
Selected References	291

8	PUBLIC PARTICIPATION IN AQUIFER RESTORATION DECISION-MAKING	295
	Basic Definitions	295
	Advantages and Disadvantages of Public Participation ...	296
	Public Participation in the Decision-Making Process	298
	Objectives of Public Participation	299
	Identification of Publics	305
	Recognition of Types of Publics	306
	Pragmatic Approaches for Identifying Publics	309
	Selected Techniques for Communicating with Identified Publics	315
	Selection of Public Participation Techniques	316
	Techniques Classification According to Function	316
	Techniques Classification According to Communication Characteristics and Potential for Meeting Stated Objectives	319
	Catalog of Additional Techniques	327
	Practical Plan for Implementing Public Participation Program	340
	Practical Suggestions for Implementing Program	341
	Incorporation of Results in Decision-Making	342
	Selected References	343

CASE STUDIES AND APPLICATIONS OF GROUND WATER POLLUTION CONTROL

App. A	CASE STUDIES OF GROUND WATER POLLUTION CONTROL	349
	Introduction	349
	Case A: Tar Creek in Oklahoma	350
	Sources of Contaminants	352
	Studies to Determine Remedial Actions	353
	Proposed Remedial Action	358
	Case B: Gilson Road in New Hampshire	358
	Sources of Contaminants	361
	Studies to Determine Remedial Actions	362
	Remedial Actions Implemented	368
	Case C: Rocky Mountain Arsenal	371
	Sources of Contamination	373
	Studies to Determine Remedial Actions	374
	Remedial Actions Implemented	378

New Jersey Department of Environmental Protection	
Aquifer Restoration Program	384
Case Studies of Aquifer Restoration via	
Biological Processes	387
References	394
 App. B ANNOTATED BIBLIOGRAPHY FOR	
GROUND WATER POLLUTION CONTROL	397
