

Contents

1 Data representation

1.1 Binary systems

Binary data	2
Bits and bytes	4
Binary and denary	6
Counting in binary	8
Convert binary to denary	10
Convert denary to binary	12

1.2 Hexadecimal

What is hexadecimal?	14
Hexadecimal and denary	16
Hexadecimal and binary	18
How hexadecimal is used	20

1.3 Data storage

Digital data	22
Digital graphics	24
Digital sound and video	26
Compression	28
Review	30

2 Communications and the Internet

2.1 Data transmission

How data is transmitted	32
Serial or parallel?	34
Data bus	36
Transmission errors	38
Parity check	40
Check digit and checksum	42

2.2 The Internet

What is the Internet?	44
What is the World Wide Web?	46
HTML	48
HTTP: Hypertext transfer protocol	50
TCP/IP	52

2.3 Safety online

Staying safe	54
Malware and hacking	56
Protective software	58
Review	60

3 The processor

3.1 Logic gates

Electronic processing	62
The NOT gate	64
The AND gate	66
The OR and XOR gates	68
The NAND and NOR gates	70

3.2 Logical processing

Logic statements	72
Simplify statements	74
Logic circuits	76
Truth tables and circuits	78
Truth tables (continued)	80
Solve a problem	82
Repeat inputs	84

3.3 Inside the CPU

The central processing unit (CPU)	86
The fetch-execute cycle	88
Registers and buses	90
Review	92

4 Hardware

4.1 Input devices

Keyboard and mouse	94
Touch screens	96
Camera and microphone	98
Barcode readers	100
Scanners	102
Sensors	104
Control systems	106

4.2 Output devices

Monitors and display	108
Printers	110
Sound	112
Actuators	114
Manufacturing objects	116
Output in real life	118

4.3 Memory and storage

Primary storage	120
Measuring storage	122
File sizes	124
Magnetic storage	126
Optical storage	128
Solid state (flash) storage	130
Use and choice of storage	132
Review	134

5 Software

5.1 Systems software

What is software?	136
Operating systems	138
Functions of an operating system	140

5.2 Computer languages

Low-level languages	142
High-level languages	144
Review	146

6 Security

6.1 Security threats

Data security	148
Security threats	150
Malpractice and crime	152
Online attacks	154

6.2 Security protection

Proof of identity	156
Firewalls	158
Security protocols	160
Encryption	162
Security examples	164
Review	166

7 Ethics

7.1 Ethics

Copyright	168
Free software	170
Hackers and crackers	172
Review	174

8 Programming

8.1 Introduction to programming

Introduction to Python	176
Algorithms	178

8.2 Begin coding

Output	180
Sequence	182
Input	184
Assign a value	186
Calculated values	188
Variables in pseudocode	190
Variables in flowcharts	192

8.3 Selection

Logical decision	194
Python if...	196

Python if...else...	198
Python elif	200
Selection in pseudocode	202

8.4 Repetition

Loops	204
for loops	206
while loops	208
Loops in pseudocode	210

8.5 Data structures

Lists and arrays	212
Output a list	214
Add elements to a list	216
Review	218

9 Solution development

9.1 Worked examples

Count how many	220
Calculate a total	222
Calculate an average	224
Verification	226
Validation	228

9.2 Testing and evaluation

Test data	230
Evaluation	232

9.3 Developing algorithms

Trace tables	234
Trace tables (loops)	236
Trace tables (flowcharts)	238
Analyse algorithms	240
Find errors in algorithms	242
Create an algorithm	244

9.4 Development methods

Top-down programming	246
Structure diagrams	248
Code libraries	250
Review	252

10 Databases

10.1 Database design

Records and fields	254
Data types	256
Primary key	258

10.2 Database queries

Select fields	260
Select records	262
Review	264
Index	266
