Preface	xi
Acknowledgments	xv
CHAPTER 1 Tools, Cutting Techniques, Risk, Reliability, and Safety Issues	1
Learning Outcomes.....	1
1.1 Tools Required for Cutting and Gluing Cardboard.....	1
1.2 Marking Out the Cardboard	2
1.3 Cutting Straight Lines	3
1.4 Cutting Circles.....	5
1.5 Breaking Off Old Section to Expose a New Sharp Edge on the Box Cutter.....	7
1.6 Safety Concerns for the Hitting Robot	7
1.7 Safety Concerns for the Throwing Robot.....	8
1.8 Safety Concerns for the Catapult Robot.....	10
CHAPTER 2 Theory I: Ball Trajectory Computation Using Excel Spreadsheet.....	11
Learning Outcomes.....	11
2.1 Introduction.....	11
2.2 Discrete Dynamics Equation of Motion	12
2.3 Calculating the Ping-Pong Ball Acceleration Drag Coefficient, k	16
2.4 Excel Spreadsheet Tabulation, Computation, and Graphical Results.....	17
2.5 Notes on First, Second, and Subsequent Row Calculations and Values	18
2.6 Using the Trajectory Computation to Synthesize Some Useful Equations	20
2.7 Strategy for Setting Launch Velocity Using the Excel Spreadsheet Trajectory Computation.....	21
2.8 Competition Scoring System for Pocketing Balls in Baskets	22
Rules of the Ball-in-Basket Competition.....	23
2.9 Confirmation of the Deceleration Drag Constant, k (m^{-1}).....	24
2.10 Problems	26
CHAPTER 3 Theory II: The Basic Stamp Microcomputer	27
Learning Outcomes.....	27
3.1 Introduction to the Stamp Microcomputer	27
3.2 The Stamp Microcomputer Input/Output (I/O) Ports and Pins.....	30
3.3 Experiment #1. Reading a Low and a High on an Input Pin.....	32

8.2 Gluing and Assembly Instructions	157
8.3 Wiring and Programming the Autoloader	163
Sample PBasic Stamp Code for Operating the Autoloader That Deposits a Ball Into the Tee	164
8.4 Problems	165
CHAPTER 9 Theory VI: Theory and Design Notes Related to the Throwing Robot	167
Learning Outcomes	167
9.1 Working Concept of the Throwing Robot	167
9.2 Basic Design Requirements of the Throwing Robot	167
9.3 Design of the Claw and Its Releasable Mechanism	168
9.4 Ball Release Kinematic Analysis	170
9.5 Forces Acting on Ping-Pong Ball During Rotation	172
In Conclusion	174
9.6 Method for Checking Adequacy of End-Effector Clutching Force	174
9.7 Repeatability Errors	175
9.8 Problems	176
CHAPTER 10 The Ball Throwing Robot: Design and Construction	179
Learning Outcomes	179
10.1 The Tower Structure (All Dimensions in mm)	179
10.2 The Smart Arm	190
Smart Arm Construction	192
10.3 Electrical Wiring of the Stepper Motor	201
10.4 Programming the Stepper Motor to Rotate the Smart Arm	201
10.5 The Smart Arm Electrical Circuitry	204
10.6 Real-Time Programming the Smart Arm	204
10.7 Problems	207
CHAPTER 11 Theory VII: Theory and Design Notes of the Catapult Robot	209
Learning Outcomes	209
11.1 Overview of the Catapult Launching System	209
11.2 The Spring Energy Storage Catapult System	209
11.3 The Shuttle Design	211
11.4 Mathematical Analysis of the Catapult Spring System	215
11.5 Launching Speed Precision	219
11.6 Problems	221

3.4	Experiment #2. Setting a Low on an Output Pin	35
3.5	Experiment #3. Setting a High on an Output Pin.....	36
3.6	Short Circuit Protection of I/O Pins	36
3.7	The RCTime Instruction	38
3.8	The Basic Stamp and Its Integer Number Computation	42
3.9	Significant Figures and Decimal Places	43
3.10	Computation of Mathematical Function With Integers.....	44
3.11	Basic Stamp Equation Setup Procedure	45
3.12	Problems	45
CHAPTER 4	Theory III: The Stepper Motor and Its Control.....	47
	Learning Outcomes.....	47
4.1	Introduction to the Stepper Motor and Its Power Drivers.....	47
4.2	Main Components Making Up the Stepper Motor.....	50
	Component 1. The Axle	50
	Component 2. The Rotor Pole Piece.....	50
	Component 3. The Permanent Magnet	51
	Component 4. The Disc Spacer.....	52
	Component 5. The Stator	52
4.3	Assembly of the Stepper Motor Components.....	54
4.4	Coil Winding and Electromagnetic Polarity.....	56
4.5	Stator and Rotor Pole Piece Attraction.....	57
4.6	Coil Winding Methodology	59
4.7	Flux Distribution and How It Is Used to Step the Rotor in Increments	66
4.8	Stepper Motor Electrical Power Drivers.....	70
	The Unipolar Circuit	70
4.9	Reason for High-Voltage 12 V Power Supply	72
4.10	Basic Stamp Programming of Unipolar Modes.....	74
	1-Phase-on Mode	74
	Determination of Pull-In Speed	75
	Determination of Pull-Out Speed.....	76
	Pull-Out Speed.....	76
	2-Phase-On Step Mode.....	77
	Half-Step Mode	77
	The Bipolar Circuit.....	80
4.11	The L298 “Keyes” Bipolar Driver.....	82
4.12	Leadshine DM542 Bipolar Microstepping Current Chopping Driver.....	83
4.13	Problems	85

CHAPTER 5 Theory IV: Collision Theory and Design Notes Related to the Hitting Robot	87
Learning Outcomes	87
5.1 Introduction	87
5.2 Theory of Collision Dynamics	87
5.3 Measurement of the Coefficient of Restitution, u	88
5.4 Hitting Constructional Design Features	90
5.5 Design of the Tee	92
5.6 Design of the Hitting Arm	94
5.7 Analysis of Ball Collision	95
CHAPTER 6 The Ball Hitting Robot: Design and Construction	101
Learning Outcomes	101
6.1 Making the Base Plate	101
First Make the "Instep Jig"	101
Now Start Making the Parts	102
6.2 Making the Tower That Supports the Heavy Stepper Motor	107
Now Start Gluing Up the Tower	109
6.3 Making the Hitting Arm	113
6.4 Making the Tee	119
6.5 Mounting the Electronics	123
6.6 Programming the Hitting Robot	129
6.7 Problems	133
CHAPTER 7 Theory V: The Angular Displacement Servomechanism, The "Servo"	135
Learning Outcomes	135
7.1 Overview of the Servo	135
7.2 Block Diagram of the Integrated Servomechanism	137
7.3 Inside the Integrated Servo	139
Description of Each Component of the Integrated Servo	139
Datuming the Horn	141
7.4 Microcomputer Signal Control of the Servo	145
Servo Calibration	146
7.5 Square-Wave Angle Demand and Its Programming Code	149
7.6 Sawtooth Wave Angle Demand and Its Programming Code	151
7.7 Problems	154
CHAPTER 8 The 10-Ball Magazine Autoloader: Design and Construction	155
Learning Outcomes	155
8.1 Design Drawings	155

CHAPTER 12 The Catapult Robot: Design and Construction	223
Learning Outcomes.....	223
12.1 Base Structure Drawings.....	223
12.2 Base Structure Construction.....	225
12.3 Slideway Drawings.....	231
12.4 Slideway Construction	233
12.5 Shuttle and Pull-Back System Drawings.....	242
12.6 Construction of Shuttle and Pull-Back System	245
12.7 Assembly of Complete Robot.....	253
12.8 The “Winch” Servo.....	255
12.9 Programming the Catapult to Launch a Ball Automatically.....	257
12.10 Problems.....	258
Index	261
