

# Table of Contents

<b>Chapter 1</b>	
<b>Railway traffic control systems and safety culture in rail transport</b>	
<b>1.1. Human and organizational factors in railway traffic control systems and safety culture in rail transport</b>	14
<b>1.2. The configuration of rail traffic control systems in the knowledge system of railway traffic control</b>	129
<b>1.3. Human and organizational factors in railway traffic control systems and safety culture in rail transport</b>	131
<b>List of abbreviations</b>	9
<b>Introduction</b>	11
<b>Chapter 1</b>	
<b>The scope and methodology of research into the mechanisms of shaping safety culture in rail transport</b>	17
1.1. The general outline of scientific discussion	18
1.2. Theoretical assumptions	19
<b>Chapter 2</b>	
<b>Specific conditions for the functioning of entities in the rail sector</b>	27
2.1. A railway enterprise as a High Reliability Organization	29
2.2. The place and role of railway infrastructure managers and railway undertakings in shaping safety culture in rail transport	35
2.3. The place and role of railway siding users in shaping safety culture in rail transport	37
2.4. The place and role of entities in charge of maintenance of railway vehicles (ECMs) in shaping safety culture in rail transport	39
<b>Chapter 3</b>	
<b>Safety management systems in rail transport and the functioning of railway enterprises</b>	43
3.1. Safety management systems in railway enterprises and their safety culture	46
3.2. Risk management in railway enterprises and safety culture	56
3.3. Change and innovation management and shaping the safety culture of railway enterprises	61

## Chapter 4

<b>Safety culture as a specific type of the organizational culture of railway enterprises – assumptions .....</b>	<b>69</b>
4.1. Safety culture in railway enterprise management.....	69
4.2. Technical safety culture in railway enterprise management.....	74
4.3. Occupational safety culture in railway enterprise management.....	76
4.4. Behavioral safety culture in railway enterprise management .....	78

## Chapter 5

<b>Safety culture as a specific type of the organizational culture of railway enterprises – operationalization .....</b>	<b>81</b>
5.1. Safety culture and aspects of the workplace ergonomics in railway enterprises .....	81
5.2. OHS safety culture and the assumptions of OHS management systems .....	86
5.3. The concept of Just Culture and conditions of rail transport.....	89
5.4. Measurement of the safety culture of railway enterprises.....	92

## Chapter 6

<b>The place and role of a person in railway enterprises .....</b>	<b>97</b>
6.1. Personnel competency management and the organizational culture of railway enterprises .....	97
6.2. A human factor in railway enterprises – key aspects .....	110
6.3. Awareness, commitment and motivation as the crucial attributes of the personnel of railway enterprises critical to railway safety.....	110
6.4. An organizational factor, occupational stress and the culture of the technical and occupational safety of railway enterprises .....	124

## Chapter 7

<b>Railway traffic control systems and railway traffic management versus human and organizational factors .....</b>	<b>129</b>
7.1. Human and organizational factors in managing the configuration of railway technical systems.....	129
7.2. Human and organizational factors in the analysis of accidents in the rail transport sector .....	138
7.3. Human and organizational factors in railway traffic control and management systems .....	140

## Chapter 8

<b>The operationalization of management principles through safety culture in rail transport in terms of systems and processes – selected implementation solutions.....</b>	<b>145</b>
8.1. An original model of shaping safety culture in rail transport .....	146
8.2. An original model of measuring safety culture in rail transport.....	149
8.3. The course of the management of safety culture processes and human and organizational factors .....	151
<b>Conclusion .....</b>	<b>167</b>
<b>References.....</b>	<b>183</b>
<b>List of figures.....</b>	<b>195</b>
<b>List of tables .....</b>	<b>196</b>
<b>About the authors.....</b>	<b>197</b>

NSA – National Safety Authority

NSR – National Safety Rules

OHS – Occupational Health and Safety

QMS – Quality Management System

RAMS – Reliability, Availability, Maintainability, Safety

SKYbrary – a repository of safety knowledge related to air transport

SMART – Specific, Measurable, Achievable, Relevant, Time-bound

SMS – Safety Management System

TSI – Technical Specifications for Interoperability

UIC – fr. Union Internationale des Chemins de fer
