

TABLE OF CONTENT

I. Hager	
Preface	5
K. Mróz, I. Hager	
Experimental setup for assessment of concrete susceptibility to fire spalling	7
T. Zdeb, T. Tracz, M. Żelazik, M. Adamczyk	
Determination of the pore fluid ionic composition of soil cements obtained by leaching and pressure extraction	17
T. Tracz, T. Zdeb, K. Brasse	
Flexural tensile strength and fracture energy of fibre-reinforced soil-cement	29
M. Sitarz, I. Hager	
Testing of geopolymer mortar behaviour at high temperature	45
M. Dudek, T. Stryszewska	
Application of scanning electron microscope equipped with tensile stage in micro- and macro capsules properties testing	59
E. Stanaszek-Tomal	
Research procedures used in observation of mineral building materials biodeterioration process	73
A. Kozak	
Accelerated weathering tests used to evaluate durability of polymeric coatings	87
M. Urban	
Rheological measurements of granular mattersuch as fresh concrete, mortar and geopolymers	97
I. Hager	
Analysis of colour change in mineral materials under influence of heat	109
Chair of Building Materials Engineering today and the prospect for 2025.....	119
Katedra Inżynierii Materiałów Budowlanych dzisiaj i w perspektywie do 2025 roku	125
