Preface 7

Part I

Modeling of complex data sets

Chapter 1
Modeling socio-economic factors of life expectancy in Poland
using panel data (*Agnieszka Orwat-Acedańska*) 11

Chapter 2
A coherent mortality and life expectancy forecasting – a comparison
of frequentist and Bayesian approaches (*Justyna Majewska*) 30

Chapter 3
Evaluation of the labor market status of young people in selected
countries of the European Union – the multiple regression approach
(*Grażyna Trzpiot, Magdalena Kawecka*) 46

Part II

Risk analysis

Chapter 4
Quantile and expectile regression in risk measurement – downside
risk measures approach (*Grażyna Trzpiot*) 77

Chapter 5
EVT in risk estimation on commodities exchanges
(*Alicja Ganczarek-Gamrot, Dominik Krężołek, Grażyna Trzpiot*) 95

Chapter 6
Backtesting Expected Shortfall using extreme value theory
on the metals market (*Dominik Krężołek*) 109

Chapter 7
Quantile-based CAPM model – the application on Polish capital market
during COVID-19 pandemic (*Tomasz Stachurski, Dominik Krężołek*) 133
