INTRODUCTION	5
---------------------------	----------

Chapter I

The essence of national security	9
1.1. Security as an existential value	9
1.2. Processes determining the international security environment	20
1.3. Polish security environment in the context of NATO and European Union membership	32
1.4. Conclusions	41

Chapter II

Critical infrastructure in the national security system	43
2.1. National security system	43
2.2. Critical infrastructure systems	52
2.3. Critical infrastructure of the European Union	54
2.4. Legal aspects of critical infrastructure protection	56
2.5. Conclusions	57

Chapter III

National Programme for Critical Infrastructure Protection	61
3.1. The origins of the National Programme for Critical Infrastructure Protection	61
3.2. Public and private actors' responsibilities to protect critical infrastructure	63
3.2.1. Critical infrastructure operators	64
3.2.2. Government administration	65
3.2.3. Local government administration	77
3.3. Conclusions	84

Chapter IV

Factors determining the security of a large urban agglomeration	85
4.1. Characteristics of highly urbanised areas	85
4.2. Issues of security of large agglomerations in Poland	89
4.2.1. Organisational aspects	90
4.2.2. Technical aspects	113
4.3. Conclusions	118

Chapter V

Threats to critical infrastructure in highly urbanised areas	121
5.1. Critical systems for operation of a large urban agglomeration.....	121
5.1.1. Water supply system	122
5.1.2. Electricity and gas distribution system	126
5.1.3. District heating system	128
5.1.4. ICT infrastructure	130
5.1.5. Transport system	132
5.1.6. Public security and order system.....	135
5.2. Threats from terrorism and other criminal activities.....	137
5.2.1. Use of chemical or biological agents to contaminate water or food ...	141
5.2.2. Physical takeover of the critical infrastructure system	146
5.2.3. Cyberattacks on critical infrastructure	147
5.3. Critical infrastructure system failure	149
5.4. Disaster caused by external factors.....	150
5.4.1. Power supply system inefficiency.....	151
5.4.2. Threats from natural forces	154
5.4.3. Military threats	160
5.5. Conclusions	164

Chapter VI

Projected developments in the area of security of critical infrastructure systems in large urban agglomerations	165
6.1. Proposals for solutions in the formal, legal and organisational spheres ..	165
6.2. Use of new technologies to enhance the security of critical infrastructure ...	170
6.2.1. Improvement of critical infrastructure systems.....	171
6.2.2. Directions for changes in the protection of critical infrastructure facilities	182
6.3. Conclusions	185

Conclusion	187
