

Contents

1 The Built Environment	1
1.1 Building, Built Environment, Community	1
1.2 Energy Demand in the Built Environment	11
1.2.1 Energy Demand at Building Level	11
1.2.2 Energy Demand at Community Level	21
1.3 The Energy Consumption in the Built Environment	25
1.4 Indicators for Buildings Efficiency and Sustainability	35
References	51
2 Renewable Energy Sources and Systems	59
2.1 Solar Energy in the Built Environment	59
2.1.1 Solar Radiation	59
2.1.2 Solar Energy Available in the Built Environment	82
2.2 Other Renewable Energy Sources in the Built Environment	103
2.2.1 Geothermal Energy	103
2.2.2 Bioenergy	107
2.2.3 Wind Energy	111
2.2.4 Hydro-energy	117
2.3 Solar Energy Conversion Systems	120
2.3.1 Solar Thermal Systems	120
2.3.2 Photovoltaic Systems	128
2.4 Energy Mixes Based on Solar Energy Conversion Systems	144
2.4.1 Solar Thermal–Heat Pump Systems	145
2.4.2 Solar Thermal–Biomass Systems	148
2.4.3 Solar PV–Wind Systems	149
2.4.4 Solar PV–Micro-hydro Systems	151
