

Contents

Preface.....	xi
Acknowledgments	xiii
Author.....	xv
1. Introduction to Creation of Geometry and Modeling with Abaqus CAE.....	1
1.1 Introduction.....	1
1.1.1 Textiles—Why Model Them?.....	2
1.1.2 Finite Element Analysis and Finite Element Models.....	3
1.1.3 Abaqus CAE and Other Software as Tools for Modeling.....	4
References	11
2. Basics of Abaqus CAE Software.....	13
2.1 Creation of Models—Step-by-Step	13
2.1.1 Creation of a Part	15
2.1.2 Materials.....	20
2.1.3 Section and Its Properties	28
2.1.4 Defining the Assembly	30
2.1.5 Creation of a Step.....	32
2.1.6 Data Output Request.....	33
2.1.7 BCs and Loads.....	36
2.1.8 Meshing and Element Types.....	39
2.1.9 Job.....	50
2.1.10 Solution, Visualization	52
References	56
3. Modeling of a Fiber.....	59
3.1 Theoretical Approach.....	59
3.2 Finite Element Model of a Fiber	63
3.3 Summary.....	99
References	99
4. Haptic Perception of Objects.....	103
4.1 Objective and Subjective Hand Evaluation—Feeling Textiles Against the Skin.....	103
4.1.1 Subjective and Objective Techniques for HoT Measurements.....	106
4.1.2 Well-Established Objective Methods for HoT Measurement.....	106
4.1.3 The Innovations in Objective HoT Measurement	108

4.2	Model of Skin Touching an Object	113
4.2.1	The Skin Model	114
4.2.2	The Yarn Model	116
4.2.3	The Load Plate	118
4.2.4	Changing the Model and Using Different Visualizations	148
	References	151
5.	Geometry of a Knit Structure	155
5.1	Knit Structure	155
5.2	Guide for Sketching a Simplified Loop	156
5.3	Guide for Sketching a Profiled Loop	162
	Index	177
