1	Overview of the Grid Modernization and Smart Grids	1
1.1	Introduction	1
1.2	Electricity Networks	6
1.3	Gas Networks	8
1.4	Heat Networks	9
1.5	Water Networks	10
1.6	Multi-Carrier Energy Networks (MCENs)	11
1.6.1	Reliability and Resiliency	12
1.6.2	Security and Stability	14
1.7	Smart MCENs	15
1.8	Why Modernization?	15
1.9	Modernization of the MCENs	16
1.9.1	Objectives	18
1.9.2	Challenges	18
1.9.3	Opportunities	19
1.9.4	Principles	19
1.9.5	Framework	20
1.10	Various Structures for MCENs	21
1.10.1	Microgrids	21
1.10.2	Prosumers	22
1.10.3	Multi-Carrier Energy Hubs	23
1.11	Energy Markets	24
1.11.1	Reserve and Regulation Markets	26
1.11.2	Look-Ahead Market	27
1.12	Summary	27
1.13	Questions	28
1.14	Suggestions	29
1.15	Future Trends and Discussion Topics	29
	References	30

2	Modernizing the Energy from Customer-Side	33
2.1	Introduction	33
2.2	Energy Customer-Side	36
2.3	Energy Supply-Side	38
2.4	Smart Homes	39
2.4.1	Home Energy Management Systems (HEMSs)	39
2.5	Buildings	41
2.5.1	Structure	43
2.5.2	Reframing Sustainability	44
2.5.3	Electric Systems	46
2.5.4	Heating and Cooling Systems	47
2.5.5	Local Climate and Shading	48
2.5.6	Active and Passive Solar System	49
2.5.7	Thermal Envelope for Thermal Comfort and Indoor Air Quality	51
2.5.8	Architectural Acoustics	52
2.6	Green Building	53
2.6.1	Design Strategies	54
2.7	Summary	56
2.8	Questions	57
2.9	Suggestions	58
2.10	Future Trends and Discussion Topics	59
	References	59
3	Technical and Theoretical Analysis of the Future Energy Network Modernization from Various Aspects	61
3.1	Introduction	61
3.2	Energy Generation in the Future Modern MCENs	63
3.2.1	Centralized Energy Production Units	64
3.2.2	Decentralized Energy Production Units (DEPUs)	67
3.3	Energy Storage Systems in the Future Modern MCENs	80
3.3.1	Electrical Storage Systems	81
3.3.2	Mechanical Energy Storage Systems	85
3.3.3	Pumped Storage Systems	85
3.3.4	Compressed-Air Energy Storage (CAES)	87
3.3.5	Thermal Energy Storage Systems	88
3.3.6	Natural Gas Storage Systems	91
3.3.7	Water Storage Systems	92
3.3.8	Hydrogen Storage Systems	92
3.3.9	Power-to-Gas Technology	98
3.3.10	Power-to-Hydrogen Technology	98
3.3.11	Power-to-Heat Technology	99
3.4	Fuel Cells	99
3.4.1	Alkaline Fuel Cell	101
3.4.2	Phosphoric Acid Fuel Cell	101

3.4.3	Proton Exchange Membrane Fuel Cell	101
3.4.4	Molten Carbonate Fuel Cell	101
3.4.5	Solid Oxide Fuel Cell (SOFC)	102
3.4.6	Direct Methanol Fuel Cell	102
3.5	Integration of the DEPUs in the Future Modern MCENs	102
3.5.1	Integration of the DEPUs with a High Share of RERs	102
3.5.2	Integration of the Full Share (100%) of RERs	103
3.6	Demand-Side Energy Management in the Future Modern MCENs	104
3.6.1	Demand Response Programs	104
3.6.2	<i>i-Energy</i>	108
3.7	Flexibility of the Future Modern MCENs	109
3.8	Food-Energy-Water Nexus in the Future Modern MCENs	109
3.9	Summary	110
3.10	Questions	111
3.10.1	Energy Production Sector	111
3.10.2	Energy Storage Sector	111
3.10.3	Integration of Energy Generation Resources and DSEM Sectors	112
3.11	Suggestions	113
3.12	Future Trends and Discussion Topics	113
	References	114
4	Data Management in Modernizing the Future Multi-Carrier Energy Networks	117
4.1	Introduction	117
4.2	Big Data Analytics	119
4.2.1	Characteristics of Energy Big Data	120
4.2.2	Challenges of Applying Energy Big Data	122
4.3	Smart Meters	123
4.3.1	Characteristics of Smart Meter	123
4.3.2	Benefits of Smart Meters for the Future Modern MCENs	125
4.4	Advanced Metering Infrastructure	128
4.4.1	Communications in AMI	128
4.5	Internet of Things (IoT)	129
4.5.1	Classification of IoT	130
4.5.2	Characteristics of IoT	131
4.5.3	Challenges in IoT	131
4.5.4	Combination of IoT and Smart Energy Grids	133
4.5.5	Components of IoT with the Smart Energy Grid	134
4.5.6	Applications of IoT in Smart Energy Grids	135
4.6	Energy-Cyber-Physical Systems (ECPSSs)	137
4.6.1	Features of CPSs	138
4.6.2	Principles of CPSs	138

4.6.3	CPSs Architecture	139
4.6.4	Challenges of CPSs	141
4.6.5	Digital Twin Technology	142
4.7	Energy Internet	144
4.7.1	Key Concepts in Energy Internet	145
4.7.2	Architecture of Energy Internet	147
4.8	Machine Learning in the Future Modern MCENs	149
4.8.1	Data Mining and Machine Learning Techniques and Models	150
4.8.2	Machine Learning Applications and Limitations	155
4.8.3	Autonomic Machine Learning	156
4.8.4	Deep Learning	160
4.8.5	Differences Between Machine Learning and Deep Learning	163
4.8.6	Presence of the Machine Learning and Deep Learning in the Future Modern MCENs	163
4.9	Summary	166
4.10	Questions	166
4.10.1	Big Data Analytics Sector	166
4.10.2	Smart Meters and Advanced Metering Infrastructure Sectors	167
4.10.3	Internet of Things (IoT) Sector	167
4.10.4	Energy Cyber-Physical Systems (ECPSs) Sector	168
4.10.5	Energy Internet Sector	168
4.10.6	Machine Learning and Deep Learning Sectors	168
4.11	Suggestions	169
4.12	Future Trends and Discussion Topics	170
