

Contents

Part I Introduction

1 Important Developments in the History of Ionic Liquids from Academic Curiosity to Commercial Processes and Products	3
Mark B. Shiflett, Joe W. Magee and Dirk Tuma	

Part II Ionic Liquid Processes

2 ISOALKY™ Technology: Next-Generation Alkylate Gasoline Manufacturing Process Technology Using Ionic Liquid Catalyst	33
Hye Kyung Timken, Huping Luo, Bong-Kyu Chang, Elizabeth Carter and Matthew Cole	
3 Continuous Catalytic Processes with Supported Ionic Liquid Phase (SILP) Materials	49
Marco Haumann	
4 Are Ionic Liquids Enabling Technology? Startup to Scale-Up to Find Out	69
Julia L. Shamshina and Robin D. Rogers	
5 Commercial Aspects of Biomass Deconstruction with Ionic Liquids	87
Aida R. Aboulela, Florence V. Gschwend, Francisco Malaret and Jason P. Hallett	

Part III Ionic Liquid Products

6 Gas Chromatography Columns Using Ionic Liquids as Stationary Phase	131
Mohsen Talebi, Rahul A. Patil and Daniel W. Armstrong	

7	Ionic Liquid–Liquid Chromatography: A Novel Separation Method	167
	Leslie Brown, Martyn J. Earle, Manuela A. Gilea, Natalia V. Plechkova and Kenneth R. Seddon	
8	Commercial Production of Ionic Liquids	191
	Thomas J. S. Schubert	
Part IV Future Ionic Liquid Applications		
9	Natural Fiber Welding	211
	Luke M. Haverhals, David P. Durkin and Paul C. Trulove	
10	Development of New Cellulosic Fibers and Composites Using Ionic Liquid Technology	227
	Frank Hermanutz, Marc Philip Vocht and Michael R. Buchmeiser	
11	Toward Industrialization of Ionic Liquids	261
	Roland S. Kalb	
	Author Index	283
	Subject Index	285
