

# CONTENTS

<b>Preface</b>	<b>xi</b>
<b>Acknowledgments</b>	<b>xiii</b>
<b>1 Introduction</b>	<b>1</b>
<b>2 Polyurethane Building Blocks</b>	<b>13</b>
2.1 Polyols, 14	
2.1.1 Polyethers, 15	
2.1.2 Polyester Polyols, 32	
2.1.3 Other Polyols, 47	
2.1.4 Filled Polyols, 53	
2.1.5 Seed Oil-Derived Polyols, 57	
2.1.6 Prepolymers, 64	
2.2 Isocyanates, 66	
2.2.1 TDI, 69	
2.2.2 Diphenylmethane Diisocyanates (MDI), 77	
2.2.3 Aliphatic Isocyanates, 87	
2.3 Chain Extenders, 94	

<b>3</b>	<b>Introduction to Polyurethane Chemistry</b>	<b>111</b>
3.1	Introduction, 111	
3.2	Mechanism and Catalysis of Urethane Formation, 113	
3.3	Reactions of Isocyanates with Active Hydrogen Compounds, 119	
3.3.1	Urea Formation, 123	
3.3.2	Allophanate Formation, 124	
3.3.3	Formation of Biurets, 124	
3.3.4	Formation of Uretidione (Isocyanate Dimer), 125	
3.3.5	Formation of Carbodiimide, 126	
3.3.6	Formation of Uretonimine, 128	
3.3.7	Formation of Amides, 128	
<b>4</b>	<b>Theoretical Concepts and Techniques in Polyurethane Science</b>	<b>133</b>
4.1	Formation of Polyurethane Structure, 134	
4.2	Properties of Polyurethanes, 144	
4.2.1	Models and Calculations for Polymer Modulus, 145	
4.2.2	Models for Elastomer Stress–Strain Properties, 149	
4.2.3	The Polyurethane Glass Transition Temperature, 159	
<b>5</b>	<b>Analytical Characterization of Polyurethanes</b>	<b>167</b>
5.1	Analysis of Reagents for Making Polyurethanes, 168	
5.1.1	Analysis of Polyols, 168	
5.1.2	Analysis of Isocyanates, 173	
5.2	Instrumental Analysis of Polyurethanes, 176	
5.2.1	Microscopy, 176	
5.2.2	IR Spectrometry, 183	
5.2.3	X-Ray Analyses, 189	
5.3	Mechanical Analysis, 197	
5.3.1	Tensile, Tear, and Elongation Testing, 198	
5.3.2	DMA, 205	
5.4	Nuclear Magnetic Resonance Spectroscopy, 208	
5.5	Foam Screening: FOAMAT®, 211	
<b>6</b>	<b>Polyurethane Flexible Foams: Chemistry and Fabrication</b>	<b>219</b>
6.1	Making Polyurethane Foams, 220	
6.1.1	Slabstock Foams, 220	
6.1.2	Molded Foams, 224	
6.2	Foam Processes, 230	
6.2.1	Surfactancy and Catalysis, 234	
6.3	Flexible Foam Formulation and Structure–Property Relationships, 241	
6.3.1	Screening Tests, 241	
6.3.2	Foam Formulation and Structure–Property Relationships, 243	

<b>7 Polyurethane Flexible Foams: Manufacture, Applications, Markets, and Trends</b>	<b>249</b>
7.1 Applications, 252	
7.1.1 Furniture, 252	
7.1.2 Mattresses and Bedding, 257	
7.1.3 Transportation, 262	
7.1.4 The Molded Foam Market, 265	
7.2 Trends in Molded Foam Technology and Markets, 266	
<b>8 Polyurethane Rigid Foams: Manufacture, Applications, Markets, and Trends</b>	<b>273</b>
8.1 Regional Market Dynamics, 273	
8.2 Applications, 279	
8.2.1 Construction Foams, 279	
8.2.2 Rigid Construction Foam Market Segments, 293	
8.2.3 Appliance Foams, 294	
8.3 Blowing Agents and Insulation Fundamentals, 300	
8.3.1 Blowing Agents, 300	
8.3.2 Blowing Agent Phase-Out Schedule, 301	
8.4 Insulation Fundamentals, 304	
8.5 Trends in Rigid Foams Technology, 308	
<b>9 Polyurethane Elastomers: Manufacture, Applications, Markets, and Trends</b>	<b>315</b>
9.1 Regional Market Dynamics, 316	
9.2 Applications, 320	
9.2.1 Footwear, 320	
9.2.2 Nonfootwear Elastomer Applications and Methods of Manufacture, 329	
9.3 Trends in Polyurethane Elastomers, 349	
<b>10 Polyurethane Adhesives and Coatings: Manufacture, Applications, Markets, and Trends</b>	<b>359</b>
10.1 Adhesives and Coatings Industries: Similarities and Differences, 359	
10.2 Adhesives, 362	
10.2.1 Adhesive Formulations, 367	
10.3 Trends in Polyurethane Adhesives, 374	
10.4 Coatings, 379	
10.4.1 Polyurethane Coating Formulations, 386	
10.4.2 Trends in Polyurethane Coatings, 394	

<b>11</b>	<b>Special Topic: Medical Uses of Polyurethane</b>	<b>401</b>
11.1	Markets and Participants, 402	
11.2	Technology, 406	
11.2.1	Catheters, 406	
11.2.2	Wound Dressings, 406	
11.2.3	Bioabsorbable Polyurethanes, 409	
11.2.4	Hydrogels, 412	
11.2.5	Gloves and Condoms, 414	
11.3	Future Trends, 415	
<b>12</b>	<b>Special Topic: Nonisocyanate Routes to Polyurethanes</b>	<b>421</b>
12.1	Governmental Regulation of Isocyanates, 421	
12.2	Nonisocyanate Routes to Polyurethanes, 425	
12.2.1	Reactions of Polycyclic Carbonates with Polyamines, 426	
12.2.2	Direct Transformations of Amines to Urethanes, 432	
12.2.3	Reactions of Polycarbamates, 433	
12.2.4	Conversion of Hydroxamic Acids to Polyurethane, 436	
12.2.5	Conversion of Hydroxylamines to Polyurethanes, 436	
<b>13</b>	<b>Polyurethane Hybrid Polymers</b>	<b>441</b>
13.1	Introduction, 441	
13.2	Polyurethane-Acrylate Hybrids, 445	
13.3	Urethane-Epoxy Hybrids, 449	
13.4	Urethane-Silicone Hybrids, 452	
13.4.1	Silicone-Modified Prepolymers, 452	
13.4.2	Urethane-Silicone Hybrids Produced Using Diblock Compatibilizers, 454	
13.4.3	Hybrids Employing Covalent and Hydrogen-Bonded Cross-Links, 456	
13.4.4	Polyurethane Hybridization with Polyhedral Oligomeric Silsesquioxanes, 456	
13.5	Polyurethane-Polyolefin Hybrids, 458	
13.6	Hybridization Via Transurethanification, 460	
<b>14</b>	<b>Recycling of Polyurethanes</b>	<b>465</b>
14.1	Introduction, 465	
14.2	Glycolysis, Hydrolysis, Aminolysis, and Acidolysis, 469	
14.3	Pyrolysis, 474	
14.4	Recycle for Fuel Value, 475	
14.5	Regrinding and Incorporation, 477
