Preface *xiii*

Acknowledgments *xvii*

1	Introduction to Optical Networks	1
1.1	Introduction	1
1.1.1	Trends in Optical Networking	2
1.1.2	Classification of Optical Networks	3
1.2	Optical Networks: A Brief Picture	7
1.2.1	Multiplexing in Optical Networks	8
1.2.2	Services Supported by Optical Networks	9
1.2.3	WDM Optical Network Architectures	10
1.2.3.1	Broadcast-and-Select Networks	10
1.2.3.2	Wavelength Routed Networks	11
1.2.3.3	Linear Lightwave Networks	13
1.2.4	Services Types	13
1.2.5	Types of Traffic	14
1.2.6	Switching Granularities	14
1.2.6.1	Optical Circuit Switching	15
1.2.6.2	Packet Switching for Bursty Traffic	15
1.3	Optical Network Layered Architecture	16
1.3.1	Layers and Sub-layers	19
1.4	Organization of the Book	23
1.5	Summary	24
	Problems	24
	References	25
2	Network Elements	27
2.1	Introduction	27
2.2	Optical Fiber	29
2.2.1	Loss and Bandwidth Windows	30
2.2.2	Linear and Nonlinear Effects	32

2.3	Laser Transmitters	33
2.3.1	Laser Characteristics	34
2.3.2	Tunable Lasers	34
2.3.3	Modulation Techniques	35
2.4	Optical Receivers	36
2.5	Optical Amplifiers	37
2.5.1	Types of Optical Amplifiers	38
2.5.1.1	Semiconductor Optical Amplifier	38
2.5.1.2	Fiber Amplifiers	39
2.6	Optical Network Components	40
2.6.1	Passive Coupler Devices	40
2.6.1.1	Coupler Parameters	41
2.6.1.2	Scattering Matrix Formulation of the 2×2 Coupler	42
2.6.2	Switching Elements	44
2.6.2.1	Directive Switches	46
2.6.2.2	Gate Switches	46
2.6.2.3	Micro-Electro Mechanical Switches	47
2.6.2.4	Liquid Crystal Optical Switch	48
2.6.3	$N \times N$ Star Coupler	49
2.6.4	Gratings	52
2.6.4.1	Fiber Bragg Gratings	53
2.6.4.2	Arrayed Waveguide Grating	54
2.6.5	Optical Filters	55
2.6.5.1	Fabry-Perot Filter	56
2.6.5.2	Multi-Layer Dielectric Thin-Film Filter	58
2.6.5.3	Acousto-Optic Filter	58
2.7	Optical Multiplexer and De-Multiplexer	58
2.7.1	Mach-Zehnder Interferometer (MZI) Multiplexer	59
2.8	Routers	62
2.8.1	Static Wavelength Router	62
2.8.2	Reconfigurable Wavelength Router	62
2.8.3	Optical Packet Routing Switches	64
2.9	Optical Switching Fabrics	64
2.9.1	Classification of Switching Fabrics	65
2.9.1.1	Permutation Switching Fabric	65
2.9.1.2	Generalized Switching Fabric	65
2.9.1.3	Linear Divider and Combiner Switching Fabric	65
2.9.2	Classification According to Blocking Characteristics	66
2.9.3	Types of Space Switching Fabrics	67
2.9.3.1	Cross-Bar Switching Fabric	67
2.9.3.2	Clos Switch Fabric	69
2.9.3.3	Spanke Switch Fabric	70
2.9.3.4	Benes Switch Fabric	71

2.9.3.5	Spanke-Benes Switch Fabric	72	
2.10	Wavelength Converter	72	
2.10.1	Opto-Electronic Wavelength Converters	73	
2.10.2	All-Optical Wavelength Converters	74	
2.10.2.1	Transparent All-Optical Wavelength Converters	74	
2.10.2.2	Opaque All-Optical Wavelength Converter	74	
2.11	Optical Network Functional Blocks	76	
2.11.1	Network Access Terminal	76	
2.11.2	Optical Network Node	78	
2.11.2.1	Optical Add-Drop Multiplexers	79	
2.11.2.2	Optical Cross-Connect	82	
2.12	Summary	85	
	Problems	86	
	References	88	
3	Broadcast-and-Select Local Area Networks	91	
3.1	Introduction	91	
3.2	Physical Topologies of Single-Hop Networks	92	
3.2.1	Star Topology	92	
3.2.2	Folded Bus Topology	93	
3.2.3	Tree Topology	93	
3.3	Multiplexing and Multiple Access in B&S Networks	95	
3.4	Network Traffic	95	
3.4.1	Circuit-Switched Traffic	97	
3.4.1.1	Streamed Synchronous Traffic on Dedicated Connections	97	
3.4.1.2	Packet Traffic with Fixed Frame on Dedicated Connections	98	
3.4.1.3	Traffic with Demand-Assigned Circuit-Switched Connections	102	
3.4.2	Optical Packet Switching	105	
3.5	Network Resource Sharing in Optical Networks	106	
3.5.1	Capacity Increase with Number of λ -Channels	107	
3.5.2	Capacity Increase with Number of Time Slots	107	
3.6	Capacity of the B&S Network	108	
3.6.1	Scheduling Efficiency	109	
3.7	Packet Switching in the Optical Layer in B&S Networks	110	
3.8	Medium Access Protocols	111	
3.8.1	Non-pre-transmission Coordination	112	
3.8.2	Pre-transmission Coordinated MAC Protocol	113	
3.8.2.1	Slotted Aloha/Slotted Aloha Protocols	114	
3.8.2.2	DT-WDMA Scheduling Protocol	118	
3.8.2.3	MAC Scheduling Protocols	121	

3.9	Summary	122
	Problems	122
	References	124
4	Optical Access Networks	127
4.1	Introduction	127
4.2	Available Access Technologies	128
4.2.1	Access Network Classification	129
4.2.1.1	Digital Subscriber Line	130
4.2.1.2	Cable Television	130
4.2.1.3	Hybrid Fiber Coaxial Network	130
4.2.1.4	Fixed Wireless Access Networks	131
4.2.1.5	Satellite Wireless Access Networks	132
4.3	Optical Fiber Access Networks	132
4.3.1	Passive Optical Network Topology	134
4.4	PON Architectures in Access Networks	135
4.4.1	Broadcast-and-Select Passive Optical Networks	135
4.5	TDM/TDMA EPON Operation	138
4.5.1	Upstream Communication in PON	138
4.5.2	Multi-Point Control Protocol	139
4.5.2.1	Auto-Discovery and Registration	140
4.5.2.2	Ranging and Clock Synchronization	141
4.5.2.3	Signaling Messages Used for Arbitration	142
4.5.3	Dynamic Bandwidth Allocation Algorithms	143
4.5.3.1	Service Disciplines	144
4.5.3.2	Interleaved Polling with Adaptive Cycle Time DBA Protocol	145
4.6	WDM PON Network Architecture	146
4.6.1	WDM PON with TPON Architecture	146
4.6.2	Wavelength Routing WDM PON	147
4.7	Next-Generation PONs	147
4.7.1	NG-PON1	148
4.7.2	Long-Term Evolution – NG-PON2	150
4.8	Free Space Optical Access and WOBAN	151
4.8.1	Optical Wireless Access System	152
4.8.2	Hybrid Wireless-Optical Broadband Access Network	153
4.9	Summary	153
	Problems	154
	References	155
5	Optical Metropolitan Area Networks	159
5.1	Introduction	159
5.2	Synchronous Optical Network/Synchronous Digital Hierarchy	161

5.2.1	SONET Networks	161
5.2.2	SONET Multiplexing	163
5.2.2.1	Virtual Tributaries	164
5.2.3	SONET Frame	165
5.2.4	SONET/SDH Devices	166
5.2.4.1	Terminal Multiplexer/De-multiplexer	166
5.2.4.2	Regenerator	167
5.2.4.3	Add/Drop Multiplexer	167
5.2.4.4	Digital Cross-Connect	167
5.2.5	SONET Protocol Hierarchy	167
5.2.6	SONET Network Configurations	169
5.2.6.1	SONET Ring Architecture	169
5.2.7	Traffic Grooming in SONET/SDH Networks	172
5.2.8	Scalability of SONET/SDH Networks	173
5.3	Optical Transport Network	174
5.3.1	Layered Hierarchy of OTN	175
5.3.2	Lines Rates of OTN	177
5.3.3	OTN Frame Structure	179
5.3.3.1	OTN Frame Structure Overheads	180
5.3.4	OTN Switching	181
5.3.4.1	OTN Switch	182
5.3.5	Tandem Connection Monitoring	183
5.4	Summary	186
	Problems	186
	References	188
6	Wavelength Routed Wide Area Networks	189
6.1	Introduction	189
6.2	The Hybrid Wavelength Routed Network Architecture	192
6.3	The Optical Layer in Wavelength Routing Networks	196
6.4	Design of Wavelength Routed Network with Logical Routing	197
6.5	Analysis of WDM Wavelength Routing Networks	199
6.5.1	Optimization Problem Formulation of the WRN	200
6.6	Heuristic Solutions for WDM Wavelength Routing Networks	205
6.6.1	Design Parameters, Performance Metrics, and QoS Issues	206
6.6.2	Route Selection Algorithms	207
6.6.2.1	Breadth-First-Search Algorithm	208
6.6.2.2	Dijkstra Algorithm	210
6.6.3	Heuristic Wavelength Routing Algorithms	211
6.6.3.1	Fixed Routing	211
6.6.3.2	Fixed-Alternate Routing	212
6.6.3.3	Adaptive Routing	212

6.6.3.4	Least Congested Path Routing	213
6.6.4	Wavelength Assignment Algorithms	213
6.6.4.1	Fixed Order First Fit	214
6.6.4.2	Random Assignment	214
6.6.4.3	Least Used Wavelength Assignment	214
6.6.4.4	Most Used Wavelength Assignment	215
6.6.5	Joint Routing-Wavelength Assignment Algorithm	218
6.7	Logical Topology Design Heuristics	218
6.7.1	Logical Topology Design Algorithm with Congestion Minimization	219
6.7.2	Logical Topology Design Algorithm with Delay Minimization	220
6.7.3	Logical Topology Design Algorithm with Link Elimination and Matching	220
6.7.4	Simulated Annealing-Based LT Heuristics	221
6.8	Summary	222
	Problems	222
	References	225
7	Network Control and Management	229
7.1	Introduction	229
7.2	NMS Architecture of Optical Transport Network	232
7.3	Logical Architecture of Automatic Switched Optical Network	234
7.3.1	Interaction Between the Client Control Layer and the Optical Control Layer	236
7.4	Functions of Management and Control Plane	238
7.4.1	Discovery or State Information	238
7.4.2	Routing	240
7.4.3	Signaling	240
7.4.3.1	Signaling Network	241
7.4.3.2	Alarm Management System	242
7.4.3.3	Resource Reservation Signaling Protocol	242
7.4.4	Performance Monitoring	244
7.4.5	Fault Management	245
7.4.6	Security, Accounting Management, and Policing	246
7.5	Generalized Multi-Protocol Label Switching	246
7.5.1	Interfaces in GMPLS	248
7.5.2	GMPLS Control Plane Functions and Services	248
7.5.3	GMPLS Protocol Suite	251
7.5.4	Path Computation Element	254
7.6	Summary	256
	Problems	256
	References	257

8	Impairment Management and Survivability	261
8.1	Introduction	261
8.2	Impairments in Optical Networks	262
8.2.1	Impairments in Transparent Optical Networks	263
8.2.2	Evaluation Criteria of Signal Quality	264
8.2.3	Optical System Impairments	266
8.2.3.1	Linear Impairments	267
8.2.3.2	Impairments Due to Nonlinearities	272
8.2.4	Impairment Awareness and Compensation in Optical Networks	276
8.3	Survivability in Optical Networks	279
8.4	Protection and Restoration	280
8.4.1	Protection and Restoration Schemes	280
8.4.2	Restoration Schemes	283
8.5	Survivability in Multilayer WDM Optical Networks	284
8.5.1	Survivability in the Electronic Logical Layer	285
8.5.2	Optical Layer Protection/Restoration	287
8.6	Summary	291
	Problems	292
	References	295
9	Flexible Optical Networks	297
9.1	Introduction	297
9.2	Coherent Modulation Schemes	298
9.2.1	Dual Polarization-Quadrature Phase Shift Keying (DP-QPSK)	299
9.2.2	M-Quadrature Amplitude Modulation (M-QAM)	301
9.3	Multi-Carrier Modulation Schemes	301
9.3.1	Orthogonal Frequency Division Multiplexing	303
9.3.1.1	Cyclic Prefix in OFDM	305
9.3.1.2	Peak-to-Average Power Ratio for OFDM	306
9.3.2	Optical OFDM	307
9.3.2.1	Direct-Detection Optical OFDM	309
9.3.2.2	Coherent-Detection Optical OFDM	310
9.3.2.3	All-Optical OFDM	311
9.4	Elastic Optical Network	312
9.5	Elastic Optical Network Elements	314
9.5.1	Flexible-Grid Fiber	314
9.5.2	Bandwidth Variable Transponder	317
9.5.3	Flexible Spectrum Selective Switches	319
9.5.4	Reconfigurable Optical Add Drop Multiplexers	320
9.6	Routing and Spectrum Assignment Algorithms	321
9.6.1	Static and Dynamic RSA	322

9.6.1.1	Static ILP and Heuristic RSA Solutions	322
9.6.1.2	RSA for Time-Varying Traffic	324
9.6.1.3	Network Defragmentation RSA	325
9.7	Network Control and Management	325
9.8	Summary	326
	References	326
10	Software-Defined Optical Networks	331
