

CONTENTS

Preface	vii
---------	-----

PART I. INDUSTRIAL WATER POLLUTION CONTROL

Section 1. INTRODUCTION	3
Chemical-industry costs of water pollution abatement	5
Refinery wastewater treatment and reuse	13
The effects of water-pollution control on energy consumption	19
Industrial wastewater pumps	28
Section 2. WATER-POLLUTION INSTRUMENTATION	35
Water-pollution instrumentation	37
Instruments for environmental monitoring	41
Gaging and sampling industrial wastewaters	53
How to measure industrial wastewater flow	63
Measurement uncertainties in the pollutant-discharge permit system	68
Optical instruments monitor liquid-borne solids	73
Section 3. PRIMARY TREATMENT METHODS	79
Primary-waste-treatment methods	81
Designing parallel-plates separators	94
Single waste-treatment vessel both flocculates and clarifies	97
Estimating hydrocyclone efficiency	101
Reducing fluoride in industrial wastewater	103
Techniques for removing metals from process wastewater	109
Heavy metals removal	116
Section 4. SECONDARY TREATMENT METHODS	125
Selecting and specifying activated-carbon-adsorption systems	127
Treating industrial wastewater with activated carbon	133
A two-step process for toxic wastewaters	139
Selecting wastewater aeration equipment	144
Controlling and monitoring activated-sludge units	152

Guide to wastewater treatment: Biological-system developments	158
How to control biological-waste-treatment processes	162
Bacteria: Friends or foes?	166
Section 5. TERTIARY TREATMENT METHODS	171
Treatment of industrial wastewaters	173
Physical and chemical methods of wastewater treatment	191
Recovering organic materials from wastewater	195
Fast payout from in-plant recovery of spent solvents	198
Using wastewater as cooling-system makeup water	201
Design factors in reverse osmosis	207
Choosing a process for chloride removal	217
 PART II. INDUSTRIAL SOLID WASTE CONTROL	
Section 1. INTRODUCTION	227
A guide to the resource conservation and recovery act	229
How industry can prepare for RCRA	232
Section 2. SOLID WASTE TREATMENT METHODS	237
Waste-sludge treatment in the CPI	239
Equipment for dewatering waste streams	254
Sludge drying—one way to waste reduction	259
Increasing sludge-digester efficiency	262
Converting solid wastes and residues to fuel	265
Section 3. SOLID WASTE DISPOSAL METHODS	273
Solid-waste disposal: Landfarming	275
Solid-waste disposal: Deepwell injection	281
Solid-waste disposal: Incineration	287
Solid-waste disposal: Landfilling	297
Solid-waste disposal: Solidification	307
Disposal of flue-gas-cleaning wastes	312
How sludge characteristics affect incinerator design	319
Incineration of industrial wastes	325
How to burn salty sludges	332
Incineration's role in ultimate disposal of process wastes	338
Ultimate disposal of spilled hazardous materials	348
 Index	357
