

# Table of contents

## PART I

### TESTING OF VEHICLES, COMPONENTS OF RAIL VEHICLES AND RAILWAY INFRASTRUCTURE.....

9

#### Chapter 1

**Adam Mańska, Janusz Ćwiek**

A simplified analytical model of heat flow in a railway wheel ..... 11

#### Chapter 2

**Robert Konowrocki, Andrzej Chojnacki, Grzegorz Wysocki**

Longitudinal dynamics of freight trains – experimental and theoretical investigations..... 22

#### Chapter 3

**Witold Groll, Bogdan Sowiński, Sławomir Walczak**

Statistical analysis of acceleration based measurements as approach for determination of rail track defects..... 32

#### Chapter 4

**Jakub Młyńczak, Piotr Folęga, Ireneusz Celiński**

Specifics of the traffic scene identification problem observed at level crossings, analysed from the road traffic participant's perspective ..... 40

#### Chapter 5

**Paweł Urbańczyk**

The brake performance of railway vehicles. Operating and research issues..... 51

#### Chapter 6

**Armando Miguel Rilo Cañas, Wojciech Sawczuk**

Verification of selected models of resistance freight train on the basis of free riding..... 61

#### Chapter 7

**Artur Rojek**

Main circuit breaker of traction vehicles in the DC system – parameters and requirements..... 67

#### Chapter 8

**Mirosław Dusza**

The influence of suspension damping increase on stability of rail vehicle – track model solutions ..... 77

**Chapter 9****Andrzej Wolff, Jakub Kukulski, Zbigniew Jeleśniański**

Selected cases of a numerical and experimental analysis of the heat transfer process in a railway disc brake ..... 86

**Chapter 10****Magdalena Machno, Wojciech Bizoń, Marcin Trajer**

Investigation of micro-holes accuracy drilled in the Inconel 718 alloy by using EDD with deionized water ..... 97

**Chapter 11****Ewa Kardaś-Cinal, Seweryn Koziak, Rafał Melnik**

Investigation of railway vehicle dynamics leading to large transient bogie and body accelerations ..... 106

**Chapter 12****Paweł Wątroba, Zbigniew Konieczek**

Proprietary tool for welded joint verification in railway vehicles ..... 113

**PART II****RAILWAY TRAFFIC MANAGEMENT, LEGAL REGULATIONS****AND ECOLOGICAL ASPECTS IN THE OPERATION OF RAIL VEHICLES** ..... 123**Chapter 13****Andrzej Massel**

Implementation of ertms in Central-Eastern European railways ..... 125

**Chapter 14****Michał Wieliczko, Marta Pachołek-Zegar, Tomasz Olejniczak**

Overview of selected requirements in the aspect of legal regulations in the process of approval of trams ..... 136

**Chapter 15****Piotr Daszkiewicz, Maciej Andrzejewski, Jacek Pielecha, Łukasz Rymaniak**

Environmental assessment of diesel locomotives in static and road tests ..... 143

**Chapter 16****Teresa Gajewska, Anna Grabarz**

Theoretical models of measures of selected key performance indicators and supporting indicators in the transport of food products ..... 154

**Chapter 17****Stanisław Berezinski**

Stability of railway logistics supply chains between European Union and China ..... 161

**Chapter 18**

**Maciej Andrzejewski, Anna Kobaszyńska-Twardowska, Mateusz Nowak, Patryk Urbański**  
 Social and ecological assessment of the use of rail crossing ..... 174

**Chapter 19**

**Małgorzata Magnucka-Blandzi, Rafał Cichy**  
 Two-road vehicles – an environmental approach to the vehicle's life cycle ..... 183

**Chapter 20**

**Paweł Daszkiewicz, Maciej Andrzejewski, Michałina Kamińska, Łukasz Rymaniak, Marian Medwid**  
 Comparison of ecological indicators of a shunting locomotive and a rail-road vehicle in real  
 operating conditions ..... 192

**Chapter 21**

**Kamil Bialek, Patryk Wetoszka**  
 The impact of rail vehicles on the railway environment – electromagnetic disturbances ..... 202

**Chapter 22**

**Piotr Tokaj, Piotr Koziol**  
 Railway noise reduction in Europe ..... 208

**PART III****TRIBOLOGICAL PROCESSES, WEAR AND TESTING OF MATERIALS FOR  
 RAIL TRANSPORT APPLICATIONS..... 217****Chapter 23**

**Norbert Radek, Łukasz Pasieczyński, Jacek Pietraszek**  
 Mechanical properties of anti-graffiti coating systems for rail vehicles..... 219

**Chapter 24**

**Magdalena Machno, Wojciech Bizoń, Marcin Trajter**  
 The experimental research on the deionized water flow through tube-electrode channel  
 applied in the EDD process ..... 227

**Chapter 25**

**Jarosław Konieczny, Krzysztof Labisz, Andrzej Adamiec, Jakub Młyńczak, Marcin Adamiak**  
 Wear mechanisms of the section isolator guide ..... 236

**Chapter 26**

**Wojciech Sawczuk, Armando Miguel Rilo Cañas**  
 Comparative assessment of the wear of wheelset and brake disc in the electric traction unit  
 of the EN76 series..... 244

**Chapter 27****Maciej Michnej**

The role of a third body in fretting wear ..... 251

**Chapter 28****Krzysztof Labisz, Jarosław Konieczny, Janusz Ćwiek, Jakub Młyńczak, Łukasz Wierzbicki, Szymon Surma**

Modelling of microstructure and properties of silver alloys using laser surface treatment ..... 257

**PART IV****RELIABILITY, SAFETY AND RISK IN RAIL TRANSPORT**

267

**Chapter 29****Piotr Smoczyński, Adrian Gill, Adam Kadziński, Martin Laur, Tambet Öun**

Application of an improved bowtie method in CSM-compliant risk assessment of a change introduced in the EU railway system ..... 269

**Chapter 30****Piotr Smoczyński, Adrian Gill, Adam Kadziński**

Qualitative bowtie method for change-related risk assessment in the European Union railway system ..... 277

**Chapter 31****Ignacy Góra, Piotr Combik**

Human as a foundation of safety culture. Human factor and its impact on transport safety ..... 288

**Chapter 32****Karol Andrzejczak, Jarosław Selech**

Method of flexible prediction of the remaining useful lifetime of the rail vehicle components .... 299

**Chapter 33****Maciej Nowicki, Rafał Cichy**

Revision of risk assessment methods used in rail transport ..... 308

**Chapter 34****Marek Pawlik**

Reliability, availability, maintainability and safety in the railway rolling stock procurement and production processes ..... 318

**Chapter 35****Adrian Bednarz, Maciej Kalużyński, Zbigniew Konieczek**

Analysis of factors affecting the availability of the impuls electric multiple units based on operational data ..... 332

**Chapter 36****Maciej Szkoda, Aleksandra Lisowska, Maciej Paluch**

Analysis of statistics on significant accidents in rail transport in Poland compared to selected European countries.....

339

**PART V****MODERN SOLUTIONS AND ECONOMY IN RAIL TRANSPORT .....** 349**Chapter 37****Eliza Wawrzyn, Krzysztof Ochociński**

Innovative and standardized development model for the purchase of rail passenger rolling stock – INNORAIL.....

351

**Chapter 38****Marta Pachołek-Zegar, Urszula Strzelczyk-Król**

Concept of dual-mode tram in Poland on the example of a solution introduced in Chemnitz.

Technical and organizational problems..... 356

**Chapter 39****Bartosz Grzelka, Michał Kowalski, Radosław Wilde**

Comparison of simulation and experimental test results for innovative construction material

in the form of a three-layer panel filled with aluminum foam..... 365

**Chapter 40****Stanisław Kowalski, Kacper Kulig, Łukasz Widle, Tomasz Kądziołka**

Analysis of profitability of the development of the railway line number 104 Nowy Sącz–

Chabówka in terms of railway tourism .....

376

**Chapter 41****Teresa Gajewska, Patryk Stawiarski**

Study of the macroeconomic environment of intermodal transport in Poland using PEST

methodology..... 386

**Chapter 42****Jerzy Kwaśnikowski, Andrzej Bujak**

Internalisation of transport external costs: policy background to support rail transport .....

396

**Chapter 43****Maciej Paluch, Maciej Szkoda, Aleksandra Lisowska**

Application of an energy recovery system in the form of a turbogenerator on a selected example of a diesel locomotive.....

407
