Abstract	9
List of acronyms, abbreviations, and symbols	11
Preface	15
Literature	17
CHAPTER I	
Introduction	19
<i>Robert M. Purgert</i>	
I.1. Historical background of United States' AUSC Program	20
I.2. Alloy selection	21
I.3. Program successes and acknowledgements	22
CHAPTER II	
Pure nickel	33
<i>Zenon Pirowski</i>	
II.1. General data	33
II.2. Physical properties	36
II.3. Chemical properties	40
II.4. Mechanical properties	41
Literature	43
CHAPTER III	
Nickel-based alloys	45
<i>Jerzy Sobczak, Zenon Pirowski, Natalia Sobczak</i>	
III.1. Synthesis of alloys	45
III.2. Commercial alloys	49
III.2.1. General classifications of nickel alloys	49
III.2.2. Nickel superalloys	56
III.2.3. Corrosion-resistant cast alloys	62
III.2.4. Heat- and high temperature-resistant cast alloys	67
Literature	75

CHAPTER IV

High-temperature interaction between molten Ni alloys**and refractory materials** 77*Natalia Sobczak, Robert M. Purgert, Rajiv Asthana, Jerzy J. Sobczak*

IV.1. State of the art	77
IV.2. Materials	80
IV.3. Methods and testing procedures	81
IV.4. Nickel/oxide systems	86
IV.4.1. Al/oxide and Ni/Al ₂ O ₃ systems	86
IV.4.2. Ni/MgO system	98
IV.4.3. Ni/MgAl ₂ O ₄ system	115
IV.4.4. Ni/Y ₂ O ₃ system	121
IV.4.5. Ni/YAP and Ni/YAG systems	132
IV.4.6. Ni/Mg ₂ SiO ₄ system	140
IV.4.7. Ni/ZrO ₂ system	144
IV.5. Conclusions and final remarks	150
Literature	153

CHAPTER V

Melting and casting 161*Zenon Pirowski, Zbigniew Stefański, Waldemar Uhl, Jerzy J. Sobczak*

V.1. Melting techniques	161
V.1.1. Melting of nickel	163
V.1.2. Melting of Ni-Cu alloys	164
V.1.3. Melting of Ni-Cr-Fe alloys	165
V.1.4. Melting of highly reactive Ni-based alloys	166
V.2. Molding	166
V.3. Pouring and casting techniques	168
V.4. Casting defects and quality control	175
Literature	179

CHAPTER VI

Heat treatment and thermo-chemical treatment of cast nickel alloys 181*Zenon Pirowski*

VI.1. Cast polycrystalline alloys	181
VI.2. Directionally solidified and single-crystal alloys	185
VI.3. Heat-resistant protective coatings	187
Literature	188

CHAPTER VII

Primary and secondary melt processing on example of Haynes 282 191
*Zenon Pirowski, Małgorzata Warmuzek, Stanisław Pysz,
Natalia Sobczak, Robert M. Purgert, Jerzy J. Sobczak*

VII.1. Chemical composition and properties of
as-received commercial alloy 191

VII.2. High-temperature interaction of molten Haynes 282 alloy
with crucible 194

VII.3. Melting and casting trials 203

VII.3.1. Introduction 203

VII.3.2. Thermal analysis 206

VII.3.3. Step test 207

VII.3.4. Fluidity test 210

VII.4. Structure of castings (as cast) 215

VII.5. Effect of heat treatment on structures and properties of
castings 220

VII.6. Effect of advanced post-processing HIP
on structure-property relationships 228

VII.7. Foundry practice 234

VII.7.1. Computer simulation approximation 234

VII.7.2. Melting, pouring, and heat treatment 237

VII.7.3. Material testing of executed castings 241

VII.7.4. Practical recommendations 249

Literature 254

CHAPTER VIII

Mechanical properties of Haynes 282 casting 255
*Xiang Chen, Ling Wang, Keyou Mao,
Subrahmanyam Thangirala, Philip J. Maziarz*

VIII.1. Introduction 255

VIII.2. Microstructure 255

VIII.3. Tensile testing and characterization 258

VIII.4. Creep testing and characterization 262

VIII.5. Environmental effect on creep tests 266

VIII.6. Low-cycle fatigue and creep fatigue tests 267

VIII.7. Summary and perspective 268

Literature 268

CHAPTER IX

Computer modeling – ProCAST® approach	271
<i>Andriy Burbelko, Tomasz Wiktor, Daniel Gurgul,</i>	
<i>Robert M. Purgert, Jerzy J. Sobczak</i>	
IX.1. Preparation of simulation tasks	272
IX.2. Hot spots and choice of casting position	275
IX.3. Analysis of gating system and pouring	278
IX.4. Development of feeding system and chill system	282
IX.5. Correction of technological scheme	285
IX.6. Final version	288
IX.7. Technical description of final version	290
Literature	294

CHAPTER X

Computer modeling – MagmaSoft® approach	295
<i>Janusz Lelito, Paweł Żak, Michał Szucki,</i>	
<i>Robert M. Purgert, Jerzy J. Sobczak</i>	
X.1. Initial and boundary conditions	298
X.2. Simulation of casting-solidification process	298
X.3. Simulation of pouring and solidification process	301
X.4. Final conclusions	309

CHAPTER XI

Current achievements in Haynes 282 large-scale casting	311
<i>Robert M. Purgert, Subrahmanyam Thangirala</i>	
XI.1. Casting the valve body casing	312
XI.2. Experimental procedure Haynes 282 nozzle carrier casting	333
XI.2.1. Stage 1 – molding and refractory coating trial	334
XI.2.2. Stage 2 – first pour of full-scale nozzle carrier casting	339
XI.2.3. Stage 3 – Haynes 282 nozzle carrier casting final pour	346
Literature	356

Appendix A	357
Appendix B	365
Appendix C	367

SUPPLEMENT	371
<i>Zenon Pirowski</i>	

Information materials of manufacturers and suppliers of relevant products (public domains)	450
