

CONTENTS

1 INTRODUCTION	9
2 THE AIMS OF THE RESEARCH WORK.....	14
3 CYCLIC TESTING OF POLYMER COMPOSITES	15
3.1 Composite Materials Used	17
3.2 Design of the Method for Composites	18
3.3 Composites – Results and Discussion	20
4 CYCLIC TESTING OF POLYMER TEXTILE CORDS	27
4.1 Textile Cord Materials Used	27
4.2 Design of the Method for Textile Cords	28
4.3 Results from the Static tests – Loading Speed Influence.....	31
4.4 Results from the Static tests – Temperature and Relaxation Stress Influences	33
4.5 Results from Cycle Loading – Relaxation Stress Influence	36
4.6 Results from Cycle Loading – Temperature Influence	41
4.7 Design of the Method with Ten Relaxation Time Pauses	43
4.8 Results from the Specific Tensile Tests with Ten Relaxation Time Pauses	45
5 BIAXIAL CYCLIC LOADING OF POLYMER COMPOSITES	49
6 TESTS OF TYRE CASING COMPONENTS.....	52
7 COMPUTATIONAL MODELLING OF POLYMER COMPOSITES	56
7.1 Determination of Material Parameters of Elastomer Matrix for Computational Modelling.....	56
7.2 APDL Creation of Computational Models of a Specific Shear Test of Multi-Layered Long-Fibre Composites	62
7.3 Results from the Computational Simulation of a Specific Shear Test of Multi-Layered Long-Fibre Composites	72
8 CONCLUSIONS	77
REFERENCES	79
