

Table of contents

Introduction	8
Engineering and technical sciences	
Jędrzej Kowalewski, Anna Wojciechowicz, Michał Zięba, Mikołaj Podgórski, Łukasz Buczkowski Application of the method of laser spectroscopy in the classification of mining materials	14
Adam F. Idziak Selected aspects of the seismicity of the Upper Silesian Coal Basin ...	36
Tadeusz Gorewoda, Jacek Anyszkiewicz The challenges of analytical chemistry – keeping up with changes in the copper industry	54
Marcin Przybyła, Wacław Szetelnicki The use of a mobile laboratory to assess the quality of the natural environment and the possibility of its use in measurements in underground mining excavations	72
Barbara Namysłowska-Wilczyńska Estimation of the Parameters of the Cu Deposit in the "Rudna" Mine Based on the Application of Geostatic Methods with Even Conditioning on the Example of the Mining Side R-1, R-3	88
Jacek Piotr Gurwin, Marek Wcisło, Stanisław Staśko, Robert Tarka Numerical hydrogeological model of copper mine deposits of KGHM Polska Miedź S.A.	140

Artur Wilczyński, Barbara Namysłowska-Wilczyńska, Stanisław Downorowicz	
Possibilities of sustainable water resources and energy management in mining of the copper deposits	154

Mirosław Lewicki, Paweł Śliwiński	
Experience in the field of practical use of data from mining machinery monitoring	176

Social sciences

Miłosz Czopek, Paweł Greń	
Building the Image of a State-Owned Company: the Case of KGHM Polska Miedź S.A.	188

Jolanta Dmowska	
Selected aspects of innovation activity	202

Miłosz Czopek, Piotr Spaliński	
Assessment of the organization's maturity to implement innovative solutions in the area of knowledge management and verification of the implemented tools supporting this process in the copper industry, on the example of KGHM Polska Miedź S.A.	220

Robert Kaszuba	
The art of improvement. The implementation of process innovations in the areas of production and logistics of business activities.....	234

Miłosz Czopek, Marta Kazusek	
Recruitment, Onboarding and Training in the Time of the COVID-19 Pandemic in the Enterprises of the Polish Copper Basin	246
