Wstęp	7
-------	---

Część I. Oryginalne prace badawcze

<i>Andrzej M. Borzyszkowski</i> Algebraic structures to study distributed systems	11
<i>Andrzej M. Borzyszkowski</i> A note on the neighbour distinguishing index of digraphs	25
<i>Joanna Czarnowska, Janusz Przewocki, Agnieszka Wypych, Robert Pyrc</i> Modeling annual wind speed maxima in Poland with max-stable processes	29
<i>Tomasz Człapiński</i> Global convergence of successive approximations for functional integral equations with infinite delay	55
<i>Janusz Czub, Wiesław Miklaszewski</i> Adiabatic and secular approximations in the description of a two-level Zeeman degenerate atom driven by light pulses	73
<i>Joanna Kamińska, Aleksandra Sobajtis, Marcin Sinacki, Krystyna Serkies</i> LAD – znaczący narząd krytyczny w radioterapii piersi?	107
<i>Paweł Klinga, Marta Kwela, Andrzej Nowik</i> Notes on summable ideals and ideals on partitions	117
<i>Stanisław Kryszewski, Mateusz Zachciał, Łukasz Szparaga</i> Stratificational and antipodean properties of boundary states for $N \times N$ density matrices	125
<i>Arkadiusz Mirakowski</i> Handwritten digit recognition with binary classification in Python	137

<i>Jakub Neumann, Mirosław Szaban, Barbara Wolnik, Witold Bolt</i> Statistical approach to the binary classification problem with the use of probabilistic cellular automata	149
<i>Witold Rosicki</i> On the uniqueness of the decomposition of manifolds, polyhedra and continua into Cartesian products	161

Część II. Praca magisterska

<i>Michał Jaworowski</i> Maksymalne grafy zewnętrznie planarne	171
