

TABLE OF CONTENTS

ABSTRACT.....	7
LIST OF ABBREVIATIONS AND SYMBOLS	9
INTRODUCTION.....	11
1. BASIC ISSUES	13
1.1. Errors of numerically controlled machine tools	13
1.2. Positioning repeatability and accuracy	17
1.3. Regulations regarding machine tool testing	22
1.4. Machine tool measurement and diagnostic systems	25
2. AIM AND SCOPE OF THE WORK	28
3. LASER DIAGNOSTICS OF CNC MACHINE TOOLS.....	31
3.1. Research object, methods and testing conditions.....	31
3.2. Linear positioning repeatability test.....	38
3.3. Angular positioning accuracy and repeatability assessment.....	45
3.4. Summary and conclusions	51
4. IDENTIFICATION OF ROTARY AXIS KINEMATIC CENTRE	
POSITION.....	53
4.1. Rotary axis kinematic centre positioning error	53
4.2. Rotary axis kinematic centre coordinates assessment.....	73
4.3. Summary and conclusions	84
5. MACHINE TOOL DIAGNOSTICS WITH THE USE OF A	
TELESCOPIC KINEMATIC BAR	85
5.1. Types of errors identified with a telescopic kinematic bar	85
5.2. Diagnostic test description	96
5.3. Diagnostic measurement results and their analysis.....	100
5.4. Prediction of the roundness and squareness deviations of the CNC machine tool axis	105
5.5. Summary and conclusions	114
6. MACHINE TOOL THERMOGRAPHIC DIAGNOSTICS	117
6.1. Balance of heat sources in machine tools	120
6.2. Design and technological methods for reducing machine tool thermal deformations	122
6.3. Procedures for machine tool thermographic diagnostic testing	123
6.4. Test stand and the diagnostic test.....	127
6.5. Diagnostic measurement results and their analysis.....	130
6.6. Summary and conclusions	141

7. MONITORING OF CNC MACHINE TOOL SPINDLE ERRORS	143
7.1. Factors contributing to spindle errors	143
7.2. Test methods and the experiment	144
7.3. Diagnostic measurement results and their analysis.....	148
7.4. Summary and conclusions	159
8. MONITORING OF FEED ACCURACY AND ROTATIONAL SPEED DEVIATIONS	160
8.1. Errors of machine tool spindle kinematic parameters.....	160
8.2. Diagnostic testing.....	161
9. CNC MACHINE TOOL ACOUSTIC DIAGNOSTICS.....	170
9.1. Sources of noise in machine tools and noise reduction.....	170
9.2. Machine tool noise measurement and the parameters describing acoustic energy	171
9.3. Exposure to noise in the workplace environment.....	173
9.4. Noise measurement in the CNC milling centre and the results	174
9.5. Noise source identification by acoustic holography	180
10. SUMMARY AND CONCLUSIONS	191
STRESZCZENIE.....	194
GLOSSARY	196
BIBLIOGRAPHY	199
