Conference Program	vii

Plenary Lectures

Jürgen Appell	
<i>Bounded variation and around: a survey</i>	1
Fernando Cobos	
<i>Entropy and extrapolation of compact operators</i>	17
Guillermo P. Curbera	
<i>Optimal domains for operators</i>	29
Kazimierz Goebel and Łukasz Piasecki	
<i>Minimal displacement and related problems, revisited</i>	49
Jun Kawabe	
<i>Weak convergence of nonadditive measures defined by Choquet and Sugeno integrals</i>	63
Hiro-o Kita	
<i>Some inclusion relations of Orlicz-Morrey spaces and the Hardy-Littlewood maximal function</i>	81
Lech Maligranda	
<i>Tosio Aoki and Hidegoro Nakano – once again. Remarks and comments</i>	117
Sergey V. Astashkin and Lech Maligranda	
<i>Interpolation of Cesàro and Copson spaces</i>	123
Aoi Honda, Yoshiaki Okazaki and Hiroshi Sato	
<i>The new sequence space $\Lambda_p(f)$</i>	135
Pier Luigi Papini	
<i>Complete sets and surroundings</i>	149
Wataru Takahashi	
<i>Existence theorems, duality theorems and convergence theorems for nonlinear operators in Banach spaces</i>	165

Invited Lectures

Luz M. Fernández-Cabrera	
<i>Interpolation using the unit square and limiting real methods</i>	187
Mikio Kato and Takayuki Tamura	
<i>On a class of convex functions which yield partial ℓ_1-norms</i>	199
Kichi-Suke Saito, Naoto Komuro and Ken-Ichi Mitani	
<i>How to calculate James constants of Banach spaces</i>	211
Shuichi Sato	
<i>Cesàro and Riesz means of critical order on certain function spaces</i> . .	225
Yoshihiro Sawano	
<i>The Riesz potential operator I_α of constant order from the Hardy spaces $H^{p(\cdot)}(\mathbb{R}^n)$ with variable exponent to generalized Campanato spaces $\mathcal{L}_{\phi,1,\alpha}(\mathbb{R}^n)$</i>	231
Sin-Ei Takahasi	
<i>A classification of semisimple commutative Banach algebras</i>	251
Witold Wnuk	
<i>Remarks concerning M-constants in Banach lattices</i>	259

Contributed Talks

Sachiko Atsushiba	
<i>Strong convergence theorems for uniformly asymptotically regular non-expansive semigroups in Banach spaces</i>	275
Takanori Ibaraki	
<i>Weak convergence theorems for Bregman generalized nonexpansive mappings in Banach spaces</i>	289
Yasunori Kimura	
<i>Approximation of a fixed point of nonlinear mappings with nonsummable errors in a Banach space</i>	303
Fumiaki Kohsaka	
<i>Averaged sequences for nonspreading mappings in Banach spaces</i> . . .	313

Katsuo Matsuoka	
<i>B_σ-Morrey-Campanato estimates and some estimates for singular integrals on central Morrey spaces and λ-CMO spaces</i>	325
Ken-Ichi Mitani, Kichi-Suke Saito and Yasuji Takahashi	
<i>On skewness and geometrical constants of Banach spaces</i>	337
Hiroyasu Mizuguch, Kichi-Suke Saito and Ryotaro Tanaka	
<i>On the Dunkl-Williams constant of normed linear spaces</i>	343
Toshihide Futamura, Yoshihiro Mizuta and Takao Ohno	
<i>Sobolev's theorem for Riesz potentials of functions in grand Morrey spaces of variable exponent</i>	353
Hiromichi Ohno	
<i>Entanglement of marginal tracial states</i>	367
Rieko Kubota and Yukio Takeuchi	
<i>On Ishikawa's strong convergence theorem</i>	377
Ryotaro Tanaka and Kichi-Suke Saito	
<i>A note on finite dimensional normed linear spaces</i>	391
Toshiharu Kawasaki and Masashi Toyoda	
<i>On the existence of solutions of second order ordinary differential equations</i>	403
Yohei Tsutsui	
<i>Convolution operators and div-curl lemma on weighted Hardy spaces with an application to time decay of solutions to Navier-Stokes equations</i>	415
Shuji Watanabe	
<i>Applications of fixed point theorems to the BCS gap equation for superconductivity</i>	425
Kenjiro Yanagi	
<i>Generalized metric adjusted skew information and uncertainty relation</i>	435
Index	443
