Memorial Lecture

Lech Maligranda <i>Tosio Aoki (1910–1989)</i>	1
--	---

Invited Lectures

Francesco Altomare and Mirella Cappelletti Montano <i>On a class of vector lattices of continuous function spaces and related approximation/density problems</i>	25
Joan Cerdà <i>Function spaces and Choquet integral</i>	51
Kazimierz Goebel and Lukasz Piasecki <i>A new estimate for the optimal retraction constant</i>	77
Alexei Yu. Karlovich and Lech Maligranda <i>On the interpolation constant for subadditive operators in Orlicz spaces</i>	85
Toshihiko Nishishiraho <i>Rates of convergence of equi-uniform approximation processes of integral operators</i>	103
Lars-Erik Persson and James Adedayo Oguntuase <i>Refinement of Hardy's inequality for "all" p</i>	129
Gord Sinnamon <i>Fourier inequalities and a new Lorentz space</i>	145
Wataru Takahashi <i>Proximal point algorithms and four types of nonlinear retractions</i> . .	157

Yasuji Takahashi	
<i>Some geometric constants of Banach spaces—a unified approach . .</i>	191
Yu-Wen Wang, Ying Fan and Guanqi Liu	
<i>Perturbation of generalized inverse of linear operator in Banach space and applications</i>	221
Witold Wnuk	
<i>Selected topics in quotient Riesz spaces—a short survey</i>	243

Contributed Talks

Asuman G. Aksoy, Matthew S. Borman and Allison L. Westfahl	
<i>Compactness and measures of noncompactness in metric trees . . .</i>	277
Sachiko Atsushiba	
<i>Strong convergence theorems of Browder's type for a countable family of nonexpansive mappings in Banach Spaces</i>	293
Aoi Honda, Yoshiaki Okazaki and Hiroshi Sato	
<i>A class of sequence spaces defined by a non-negative integrable function</i>	309
Suvicha Imnang and Suthep Suantai	
<i>Strong and weak convergence theorems for common fixed points of three asymptotically nonexpansive mappings</i>	319
Jun Kawabe	
<i>Some properties on the regularity of Riesz space-valued non-additive measures</i>	337
Yasunori Kimura	
<i>Equilibrium problems and convergence of resolvents for a sequence of functions</i>	349
Fumiaki Kohsaka and Wataru Takahashi	
<i>The set of common fixed points of an infinite family of relatively nonexpansive mappings</i>	361
Katsuo Matsuoka	
<i>On some weighted Herz spaces and the Hardy-Littlewood maximal operator</i>	375

Ken-Ichi Mitani and Kichi-Suke Saito	
<i>A new geometrical constant and ψ-direct sums of Banach spaces . .</i>	385
Eiichi Nakai	
<i>Calderón-Zygmund operators on Orlicz-Morrey spaces and modular inequalities</i>	393
Somyot Plubtieng, Tomonari Suzuki and Rabian Wangkeeree	
<i>Moudafi's viscosity approximations for Lipschitzian mappings in Banach spaces</i>	411
Somyot Plubtieng and Kasamsuk Ungchittrakool	
<i>Strong convergence to common fixed points of two asymptotically nonexpansive mappings</i>	421
Tomonari Suzuki	
<i>Some notes on common fixed points of one-parameter nonexpansive semigroups</i>	431
Takayuki Tamura and Mikio Kato	
<i>Weak modulus of nearly uniform smoothness, García-Falset coefficient and degree of WORTHness</i>	437
Kenjiro Yanagi, Shigeru Furuichi and Ken Kuriyama	
<i>Some operator inequalities and trace inequalities related to Tsallis entropy</i>	445
Author Index	455
