Preface	i
Conference Program	v
Invited Lectures	
Fernando Cobos	
<i>Spaces of trilinear forms on Hilbert space</i>	1
Henryk Hudzik	
<i>Geometry of some classes of Banach function spaces</i>	17
Thomas Kühn	
<i>Compact embeddings of function spaces</i>	59
Lech Maligranda	
<i>Type, cotype and convexity properties of quasi-Banach spaces</i>	83
Kichi-Suke Saito	
<i>Absolute norms on $\mathbb{C}^n$ and the geometrical structure</i>	121
Wataru Takahashi	
<i>Convergence theorems and nonlinear projections in Banach spaces</i>	145
Contributed Talks	
Sachiko Atsushiba	
<i>Strong convergence theorems for commutative nonexpansive semigroups in general Banach spaces</i>	175
Luz M. Fernández-Cabrera	
<i>On inclusion indices of function spaces</i>	185
Jun Ichi Fujii, Masatoshi Fujii, Yuki Seo and Masaru Tominaga	
<i>On generalized Kantorovich inequalities</i>	205
Amiran Gogatishvili, Shinya Moritoh, Miyuki Niwa and Takuya Sobukawa	
<i>Interpolation theorems for block-Lorentz spaces</i>	215
Aoi Honda, Yoshiaki Okazaki and Hiroshi Sato	
<i>Absolute continuity of discrete one-sided random translation</i>	225

Mikio Kato and Takayuki Tamura	
<i>Some geometric conditions related to fixed point property for</i>	
<i>ψ-direct sums of Banach spaces $X \oplus_{\psi} Y$</i>	243
Jun Kawabe	
<i>Weak convergence of vector measures</i>	253
Misako Kikkawa and Wataru Takahashi	
<i>Iterative method for approximation of common fixed points of</i>	
<i>infinite nonexpansive mappings in a Hilbert space</i>	279
Yasunori Kimura	
<i>On Mosco convergence for a sequence of closed convex subsets of</i>	
<i>Banach spaces</i>	291
Fumiaki Kohsaka and Wataru Takahashi	
<i>Minimization theorems in Banach spaces with applications</i>	301
Ken-ichi Mitani and Kichi-Suke Saito	
<i>The James constant and von Neumann-Jordan constant of</i>	
<i>absolute norms on $\mathbb{R}^2$</i>	315
Eiichi Nakai	
<i>Generalized fractional integrals on Orlicz-Morrey spaces</i>	323
Takuya Sobukawa	
<i>Results and problems in extrapolation theorem on L^p spaces</i>	335
Tomonari Suzuki and Wataru Takahashi	
<i>Fixed point theorem and strong convergence theorem for one-</i>	
<i>parameter nonexpansive semigroups in general Banach spaces</i>	345
Yasuji Takahashi, Yasutaka Yamada and Mikio Kato	
<i>On Hanner-type inequalities for Banach spaces</i>	359
Kenjiro Yanagi	
<i>Some inequalities appearing in classical and quantum information</i>	
<i>theory</i>	367
