Preface.....ix

Authors.....xi

Chapter 1 Ocean Waves and Wind Forces: Basics.....1

1.1 Ocean Environment.....1

1.2 Wave Theories.....2

1.3 Stoke’s Fifth-Order Theory.....6

1.4 Wave Spectra.....16

1.4.1 PM Spectrum for Wave Loads.....16

1.4.2 Modified PM Spectrum (Two Parameters, H_s, ω_0).....16

1.4.3 International Ship Structures Congress (ISSC) Spectrum (Two Parameters, $H_s, \bar{\omega}$).....16

1.4.4 Joint North Sea Wave Project (JONSWAP) Spectrum (Five Parameters, $H_s, \omega_{00}, \gamma, \tau_a, \tau_b$).....17

1.5 Wind and Current.....22

1.5.1 Wind Spectra.....28

1.5.2 Current.....31

Exercises.....32

Chapter 2 Perforated Cylinders and Applications.....33

2.1 Introduction.....33

2.2 Force Reduction in the Inner Cylinder.....33

2.3 Effect of Annular Spacing and Perforation Ratio on Force Reduction.....37

2.4 Effect of Perforation Parameters on Force Reduction.....41

2.5 Twin Perforated Cylinders.....47

Exercises.....59

Chapter 3 Floating Wave Energy Converter.....61

3.1 Introduction.....61

3.2 Wave-to-Wire Transfer.....65

3.3 Numerical Modeling.....66

3.4 Frequency-Domain Modeling.....69

3.5 Time-Domain Modeling.....74

3.5.1 Linear Time-Domain Model (LTD).....75

3.6 Computational Tools.....77

3.7 Multibody Floating Wave Energy Converter.....77

3.8 Hydrodynamic Coefficients of Floating Wave Energy Converters.....91

3.9	Wave Power.....	94
3.9.1	Regular Waves.....	94
3.9.2	Irregular Waves.....	95
3.10	Performance Curves with Virtual Power Take-Off System.....	100
3.11	Analysis with Hydraulic Power Take-Off System	104
3.11.1	Governing Parameters	104
3.12	Practical Guide to Design of Hydraulic Power Take-Off System.....	109
3.13	Numerical Studies on Hydraulic Power Take-Off Systems	110
3.14	Floating Wave Energy Converter Response without Power Take-Off System	116
3.15	Floating Wave Energy Converter with a Novel Hydraulic Power Take-Off System	124
3.16	Failure Assessment of Floating Wave Energy Converter.....	134
	Exercises.....	141

Chapter 4	Double-Rack Mechanical Wave Energy Converter	143
4.1	Introduction.....	143
4.2	Mechanical Wave Energy Converter	144
4.2.1	Equation of Motion	145
4.2.2	Power Take-Off System Design	147
4.2.3	Experimental Studies.....	152
4.3	Double Rack Mechanical Wave Energy Converter	155
4.3.1	Experimental Studies on Double Rack Mechanical Wave-Energy Converters	156
4.4	Failure Assessment.....	158
4.4.1	Conducting Design Failure Mode and Effect Analysis	160
4.5	Failure Mode and Effect Analysis of Mechanical Wave-Energy Converter	162
4.6	Deep-Ocean Wave Energy Converter: Conceptual Design.....	163
4.6.1	Geometric Design of the Device	163
4.7	Working Principle of Deep Ocean Wave Energy Converters.....	166
4.8	Experimental Investigations on Deep Ocean Wave Energy Converters	168
4.8.1	Cylindrical Float.....	172
4.8.2	Cylindrical Float Integrated with Fin	176
4.9	Multi-Utility Development Devices.....	185
4.9.1	Applications of TSUSUCA-DOLPHIN	196
4.9.2	Workable Alternatives	197
4.9.3	Cost Benefits	199
	Exercises.....	201

Chapter 5 Offshore Wind Turbines203

 5.1 Introduction.....203

 5.1.1 Support Systems for Wind Turbines.....204

 5.2 Wind Power.....206

 5.3 Numerical Tools.....207

 5.4 Offshore Wind Turbine Classifications208

 5.5 Offshore Floating Wind Turbine: Components.....209

 5.6 Offshore Floating Wind Turbines.....209

 5.6.1 Single Point Anchor Reservoir Type210

 5.6.2 Tension-Leg Platform Type212

 5.6.3 Pontoon (Barge) Type.....213

 5.6.4 Semi-Submersible Type.....214

 5.6.5 Triceratops.....215

 5.6.6 Triceratops-Supported Wind Turbines.....219

 5.7 Experimental and Numerical Analyses220

 5.8 Mathematical Background222

 5.8.1 Blade Momentum Theory222

 5.8.2 Blade Element Theory.....225

 5.9 Aero-Elastic Model.....227

 5.9.1 Kane Method.....228

 5.9.2 Wind Load228

 5.9.3 Wind Shear Effect229

 5.10 Normal Turbulence Model.....229

 5.11 Wind Spectrum230

 5.12 Numerical Analysis of Triceratops-Supported
 Wind Turbine230

 5.13 Responses under Operable Loads and Parked Conditions.....236

 5.14 Dynamic Tension Variation of Tethers.....238

 Exercises.....241

References.....243

Index.....255
