Introduction ix

CHAPTER 1

Introduction to SketchUp 1

The SketchUp Concept 2

Edges and Surfaces 2

Multiple Edges and Surfaces on a Same Plane 3

Representation of Curves 3

Connection (Stickiness) of Surfaces 4

Welcome Screen and Templates 5

SketchUp Templates 6

SketchUp Application Window 8

Main SketchUp Application Window 9

Tools and Toolsets 18

Edge Creator Tools 20

Line and Freehand Tools 21

Face Creator Tools 25

Modification Tools 31

Assistant Tools 36

The Inference Engine 40

Components and Groups 41

1. Prevention of Accidental Modification 41

2. Easy Modification and Full Replacement Option 42

3. Building a Personal Library 45

4. Decreasing the File Size 47

CHAPTER 2

SketchUp and Resources 49

3D Warehouse 49

Extension Warehouse and Extensions 51

Web-Based Resources 52

CHAPTER 3

Importing Files, AutoCAD, and SketchUp 55

Importing Files 56

Overview—AutoCAD Files and SketchUp 57

Preparing Your AutoCAD File for Importing 57

Importing Issues with AutoCAD Files 59

Importing AutoCAD Files to SketchUp 59

Part 1—Importing of AutoCAD Files 60

Layers (Tags), Scenes, and Proper Setup of AutoCAD Files in SketchUp 65

Layers (Tags) Inspector 65

Entity Info Inspector 66

Scenes Inspector 67

Part 2—Proper Setup of AutoCAD Files 68

CHAPTER 4

Introduction to Information Modeling and Organization 73

CHAPTER 5

Modeling of Substructure Components 85

Pier Footing 86

CHAPTER 6

Modeling of Steel Reinforcement 103

Reinforcement Bar Sizes 105

Stirrup Bend Modeling 106

Section 1—Stirrup Modeling 107

Section 2—Create a Stirrup Component 113

Section 3—Pairing of Reinforcement Bars 120

Modeling a Steel-reinforced Concrete Pier 127

Modeling Tips for Reinforcement Drawings 134

CHAPTER 7

Modeling of Various Bridge Components and Accessories 135

Post-tensioning Components 136

Modeling of Anchorage 136

Post-tensioning Spiral Reinforcement Bar (Bursting Steel) 144

Layout of Post-tensioning Ducts and Creation of the Entire Unit 154

Modeling Work	155
Drainage and Fire Suppression Components	162
Drainage Elbow	164
Modeling of Parapet Wall	169
Formwork Components	174
Organization Steps	174
Organizational Workflow Example	174

CHAPTER 8

Modeling of Bridge Decks and Girders	181
--------------------------------------	-----

Modeling of Noncomplex Bridge Decks	182
Modeling of Complex Bridge Decks	188
Modeling of Girders	193
Steel Girders	193

CHAPTER 9

Site Modeling and Use of Site Creation Tools	203
--	-----

Importing of Geo-location Data	205
Add Location Window	206
Constructing of Contour Lines	209
Introduction to Sandbox Tools and Terrain Creation	216
Three-Dimensional Terrain Modeling	216
Utilization of Terrain Models	225

CHAPTER 10

Modeling of Construction Mechanization	241
--	-----

Modeling of Construction Equipment and Range of Movement	244
Dynamic Components and Construction Equipment	248
Conclusion	257

CHAPTER 11

Styles Inspection Window	259
--------------------------	-----

Select Submenu	262
Edit Submenu	264
Edge	264
Face	268
Background	269
Watermark	270
Modeling	272
Mix Submenu	273

CHAPTER 12

Introduction to Scenes, Section Cuts, Shadow, and Fog	275
---	-----

Scenes	276
Section Cuts	278
Section Plane Tool	280
Shadow Tool	285
Fog Tool	289

Index	293
-------	-----
