

Contents

Part I Introduction

State of the Art and Future Developments in LCA	3
Tobias Viere	

Part II New Methodological Developments

Using Network Analysis for Use Phase Allocations in LCA Studies of Automation Technology Components	9
Mercedes Barkmeyer, Felipe Cerdas and Christoph Herrmann	

Eco-indicators of Machining Processes	17
Sandra Eisenträger and Ekkehard Schiefer	

Enhancing the Water Footprint Method to a Region Specific Management Tool	27
Natalia Finogenova, Markus Berger and Matthias Finkbeiner	

Product System Modularization in LCA Towards a Graph Theory Based Optimization for Product Design Alternatives	37
Chris Gabrisch, Felipe Cerdas and Christoph Herrmann	

Integrating Life-Cycle Assessment into Automotive Manufacturing—A Review-Based Framework to Measure the Ecological Performance of Production Technologies	45
Malte Gebler, Felipe Cerdas, Alexander Kaluza, Roman Meininghaus and Christoph Herrmann	

Part III Product System and Inventory Modelling

Hydrothermal Carbonization (HTC) of Sewage Sludge: GHG Emissions of Various Hydrochar Applications	59
Fabian Gievers, Achim Loewen and Michael Nelles	

Uncertainty Information in LCI-Databases and Its Propagation Through an LCA Model 69
Alexandra Opitz and Christof Menzel

LCA of Energy and Material Demands in Professional Data Centers: Case Study of a Server 79
F. Peñaherrera, J. Hobohm and K. Szczepaniak

Identification of Potentials for Improvement in Paint Production Process Through Material Flow Cost Accounting—A Step Towards Sustainability 89
Esther Peschel, André Paschetag, Mandy Wesche, Helmut Nieder and Stephan Scholl

Part IV Case Studies

Development of a Functional Unit for a Product Service System: One Year of Varied Use of Clothing 99
Felix M. Piontek, Max Rehberger and Martin Müller

LCA in Process Development: Case Study of the OxFA-Process 105
Simon Rauch, Frank Piepenbreier, Dorothea Voss, Jakob Albert and Martin Hartmann

Using Energy System Modelling Results for Assessing the Emission Effect of Vehicle-to-Grid for Peak Shaving 115
Anika Regett, Constanze Kranner, Sebastian Fischhaber and Felix Böing

Assessment of Social Impacts Along the Value Chain of Automation Technology Components Using the LCWE Method 125
Friederike Schlegl, Mercedes Barkmeyer, Alexander Kaluza, Eva Knüpffer and Stefan Albrecht

Life Cycle Assessment of Industrial Cooling Towers 135
Christine Schulze, Sebastian Thiede and Christoph Herrmann

Bioplastics and Circular Economy—Performance Indicators to Identify Optimal Pathways 147
Sebastian Spierling, Venkateshwaran Venkatachalam, Hannah Behnsen, Christoph Herrmann and Hans-Josef Endres

Spatially Differentiated Sustainability Assessment of Products 155
Christian Thies, Karsten Kieckhäfer, Thomas S. Spengler and Manbir S. Sodhi

Life Cycle Assessment of German Energy Scenarios 165
Nils Thonemann and Daniel Maga
