
Contents

1	Introduction	1
1.1	Course Background	1
1.1.1	Why Offer a Research–Discussion Course?	1
1.1.2	What Is the Significance of Offering This Course?	2
1.2	General Concept of Teaching and Learning	3
1.2.1	Why Choose Circular Economy and Sustainable Development Enterprise as a Study Topic?	3
1.2.2	What Should Be Taught?	4
1.2.3	Method to Begin Teaching, Learning and Studying	4
1.2.4	What is the Difference from the Traditional Teaching Model?	7
1.3	Assessment and Evaluation	8
	Course Resources	8
	Recommended and Referenced Literatures	8
2	Environmental Issues	11
2.1	Presentation of Core Issues	11
2.2	What Are the Environment and Environmental Problems?	12
2.2.1	What Is the Environment?	12
2.2.2	What Are the Environmental Problems?	12
2.3	Methods to Identify the Emergence of Environmental Problems	13
2.3.1	Example of Identifying a Resource Shortage	13
2.3.2	Example of Identifying Environmental Pollution	14
2.4	How Environmental Problems Are Formed	15
2.4.1	The Relationship Between Human Beings and the Environment	15
2.4.2	Environmental Load and Carrying Capacity	16
2.4.3	The Essence of Environmental Problems	17
	Classroom Discussions and Assignments	18
	Recommended and Referenced Literatures	23

3	Sustainable Development Management	25
3.1	Presentation of Core Issues	25
3.2	How Sustainable Development Was Historically Managed	25
3.2.1	What Is Sustainable Development?	25
3.2.2	How to Establish Overall Management Objectives	26
3.2.3	Is It Possible to “Cross the Environmental Mountain”? A Case Analysis	29
3.3	What Is the Quantitative Relationship Between Human Beings and the Environment?	30
3.3.1	What Is Ecological Efficiency?	31
3.3.2	Under What Circumstances Will the Environmental Quality Improve? A Theoretical Analysis	32
3.4	How to Perform Environmental Management	34
3.4.1	Environmental Load Characteristic Curve	35
3.4.2	Curve of Ecological Efficiency	36
3.4.3	Characteristic Curve of Environmental Management	37
3.4.4	Example: The Management Plan for the Chinese Lead Environmental Load	38
3.5	Method to Promote Human Sustainable Development	40
3.5.1	Resource Protection and Rational Use	40
3.5.2	Sustainable Consumption	41
3.5.3	Circular Economy	42
3.5.4	Environmental Governance	43
3.5.5	Improvement of the Political System	43
	Classroom Discussion and Assignments	44
	Recommended and Referenced Literatures	47
4	Cyclic Flow of Material: Concepts and Classifications	49
4.1	Presentation of Core Issues	49
4.2	What Is the Natural Flow of Material?	49
4.2.1	The Concept of the Natural Flow of Material	49
4.2.2	Classification of the Natural Cycle of Material	50
4.2.3	Basic Characteristics of the Natural Flow of Material	52
4.2.4	Ecological Significance of the Natural Circulation of Material	53
4.3	What Is the Anthropogenic Flow of Material?	55
4.3.1	Concept of the Anthropogenic Flow of Material	55
4.3.2	Classification of the Anthropogenic Flow of Material	56
4.3.3	Basic Characteristics of an Anthropogenic Flow	58
4.4	What Is the Relationship Between the Anthropogenic Flow of Material and Natural Circulation?	59

Classroom Discussions and Assignments	60
Thesis Title and Introduction Example	60
Recommended and Referenced Literatures	63
5 Circulation of Substances: Analysis of Logistics	65
5.1 Presentation of Core Issues	65
5.2 Method to Analyze the Man-Made Flow of Material	66
5.2.1 What Is Material Flow Analysis?	66
5.2.2 Which Steps Should Be Followed in the Material Flow Analysis?	66
5.2.3 Method to Apply Material Flow Analysis	70
5.3 What Is the Law of Human Circulation Flow?	71
5.3.1 Resource Efficiency	72
5.3.2 Environmental Efficiency	74
5.3.3 Relationship Between Resource Efficiency and Environmental Efficiency	75
5.4 Another Expression of the Law of Man-Made Circulation of Material	76
5.5 The Ideal Model of Man-Made Material Circulation	78
5.6 Method to Apply a Case Analysis	79
5.6.1 Application Example 1: Establishing Evaluation Indicators and Incorporating Them into Management Applications	80
5.6.2 Application Example 2: Practical Application Validation and Applying Management Measures	80
5.6.3 Application Example 3: The Sources of Logistics Analysis Data	84
Classroom Discussions and Assignments	85
Recommended and Referenced Literatures	86
6 Circulation Flow of Material: Fixed-Point Logistics Analysis	87
6.1 Presentation of Core Issues	87
6.2 Method to Select a Substance for Study	87
6.3 Using the Fixed-Point Method to Analyze Material Flow	88
6.3.1 The Logistics Analysis Framework of the Fixed-Point Method	88
6.3.2 Logistics Analysis Example of the Fixed-Point Method: Lead Flow Analysis	90
6.4 What Is the Result of Man-Made Flow? Example 1: Social Effects	92
6.4.1 What Is the Use Accumulation of Material?	92
6.4.2 Method to Estimate the Use Accumulation of Material	94
6.4.3 Case Analysis—The Accumulation of Lead	96

6.5	What Is the Result of the Man-Made Flow? Example 2: Environmental Effects	98
6.5.1	The Accumulation of Environmental Emissions in the Environment	98
6.5.2	The Environmental Cumulative Estimation Method for Environmental Releasers	99
6.6	What Are the Uses of Material Flow Analysis?	99
	Classroom Discussions and Assignments	100
	Recommended and Referenced Literatures	101
7	Flow of Energy	103
7.1	Presentation of Core Issues	103
7.2	What Is the Flow of Energy?	103
7.3	What Is the Natural Flow of Energy?	104
7.3.1	Natural Flow of Energy	104
7.3.2	Natural Flow Characteristics of Energy	105
7.3.3	Evaluation of the Natural Energy Flow—Energy Conversion Efficiency	106
7.4	What Is the Anthropogenic Flow of Energy?	107
7.4.1	Concept of the Anthropogenic Flow of Energy	107
7.4.2	Anthropogenic Flow Process of Energy	108
7.4.3	Evaluation of the Anthropogenic Flow of Energy—Energy Efficiency	116
7.5	Case Analysis: What Is the Energy Consumption Situation in Our Country?	117
7.5.1	Structure of Energy Consumption	117
7.5.2	What Is the Energy Efficiency of Industrial Sectors in Our Country?	118
	Classroom Discussions and Assignments	124
	Recommended and Referenced Literatures	126
8	Value Flow of a Circular Economy	127
8.1	Presentation of Core Issues	127
8.2	Review of Several Basic Concepts of Economics: What Is Value	127
8.3	Method to Build the Value Flow Framework in a Circular Economy	128
8.3.1	Method to Build the Relationship Between Material and Value	128
8.3.2	Method to Build a Value Flow Framework	131
8.4	What Are the Earnings of a Circular Economy?	136
8.4.1	How Are the Earnings Defined?	136

8.4.2	What Amount of Earnings Does a Material's Circular Flow Provide?	138
8.4.3	How Much Economic Benefit Does a Value Circular Flow Bring?	141
8.4.4	Example Analysis—Analysis of the Earnings of a Pb Circular Flow in a Lead-Acid Battery System	144
	Classroom Discussions and Assignments	147
	Recommended and Referenced Literatures	149
9	Implementation of a Circular Economy	151
9.1	Presentation of Core Issues	151
9.2	What Is the Economic Form of a Circular Economy?	152
9.2.1	What Is a Circular Economy?	152
9.2.2	What Type of Material Is Suitable for Recycling? How Should It Be Recycled?	155
9.3	What Are the Progression Patterns of a Circular Economy?	158
9.3.1	Construction of an Ecological Park	158
9.3.2	Construction of an Ecosystem Industry System	159
9.3.3	Gradient Utilization of Energy Sources	162
9.3.4	Management of Ecological Efficiency	164
9.3.5	Demonstration Area of a Circular Economy	166
	Classroom Discussions and Assignments	168
	Recommended and Referenced Literatures	169
10	Circular Economy Guarantee System	171
10.1	Presentation of Critical Issues	171
10.2	What Type of Guarantee System Should a Circular Economy Have?	172
10.2.1	What Is a Guarantee System?	172
10.2.2	What Are the Influential Factors in a Circular Economy?	175
10.2.3	What Should Be the Structure of a Circular Economy Guarantee System?	182
10.3	Method to Guarantee the Implementation of a Circular Economy	184
10.3.1	Overseas Example: Development Status of the Japanese Circular Economy	185
10.3.2	Our Country's Circular Economy Law	188
10.3.3	Comparison Between China and Foreign Countries' Circular Economy Promotion Acts	196
	Classroom Discussions and Assignments	197
	Recommended and Referenced Literatures	198

11 Sustainable Development Enterprise	201
11.1 Presentation of Core Issues	201
11.2 What Is a Sustainable Development Enterprise?	202
11.2.1 What Are the Requirements of a Circular Economy for an Enterprise?	202
11.2.2 Which Essential Characteristics Should an Enterprise Possess?	202
11.2.3 What Is a Sustainable Development Enterprise?	204
11.3 Method to Evaluate the Environmental Performance of an Enterprise	205
11.3.1 Overview	206
11.3.2 Definition of Purpose and Scope	207
11.3.3 Inventory Analysis	210
11.3.4 Environmental Impact Assessment	214
11.3.5 Discussion and Explanation	217
11.3.6 Writing the Research Report	219
Classroom Discussions and Assignments	220
Recommended and Referenced Literatures	221
12 Eco-Design	223
12.1 Presentation of Core Issues	223
12.2 What Is an Eco-Design?	224
12.2.1 What Activities and Influential Factors Should Be Considered in an Eco-Design?	224
12.2.2 What Type of Design Can Be Called an Eco-Design?	225
12.2.3 What Are Its Differences from the Traditional Design?	226
12.3 What Technical Measures Can Be Taken to Reduce Environmental Impact?	227
12.3.1 Material Selection	228
12.3.2 Product Packaging and Transportation	230
12.3.3 Design of Other Elements	232
Classroom Discussions and Assignments	235
Recommended and Referenced Literatures	236
13 Assessment of Environmentally Friendly Enterprises	237
13.1 Presentation of Core Issues	237
13.2 Why Do We Perform Assessments of Environmentally Friendly Enterprises?	238
13.3 What Qualifications Should an Assessor Possess?	238
13.3.1 Professional Qualifications of an Assessor	238
13.3.2 Assessors in Our Country	239
13.4 Method to Perform the Assessment of an Environmentally Friendly Enterprise	240

13.4.1	Formulating the Indicator System	241
13.4.2	Indicator System for an Environmentally Friendly Enterprise	242
13.4.3	Examples of an Indicator System	242
13.4.4	Examples in the Elimination Directory	250
13.4.5	Assessment Requirement	253
13.5	Method to Perform the Application and Review	256
13.5.1	Basic Conditions of the Application	256
13.5.2	Application Procedure	257
13.5.3	Review and Others	262
13.6	Case Analysis of Jinan Iron and Steel Co., Ltd.	263
13.6.1	Overview of Establishment Activities	263
13.6.2	Emphasis of the Establishment Activities	264
13.6.3	Effect of the Establishment	268
	Classroom Discussions and Assignments	270
	Recommended and Referenced Literatures	271
14	Enterprise Environmental Management	273
14.1	Presentation of Core Issues	273
14.2	What Are the Management Requirements of an Enterprise? ...	274
14.2.1	General Requirements of Business Management	274
14.2.2	Quality of the Enterprise Manager	275
14.2.3	Emphasis on Environmental Management	276
14.3	Method to Perform Standardized Management Within the Enterprise	279
14.3.1	Overview of an Environment Management System ...	279
14.3.2	ISO 14000 Standard Series	280
14.3.3	Examples of International Standards Content	280
14.4	What Are the Improvement Measures?	290
14.4.1	Green Product Certification	290
14.4.2	Extended Producer Responsibility (EPR)	292
14.4.3	Green Marketing	295
14.4.4	Establishment of an Environmental Management System	297
	Classroom Discussions and Assignments	301
	Pre-graduation Thesis of the Curriculum	302
	Recommended and Referenced Literatures	303
