1 Heat Transfer in Buildings Structures and Thermal Comfort	
in Buildings	1
1.1 Symbols for Quantities and Units	2
1.2 Energy and Heat	6
1.2.1 Energy Measurement Units	7
1.2.2 Energy Quality	8
1.2.3 Primary Energy, Final Energy and Useful Energy	9
1.3 Heat Transfer	11
1.3.1 Heat Transfer by Conduction	11
1.3.2 Heat Transfer by Radiation	25
1.3.3 Radiant Heat-Transfer Coefficient	35
1.3.4 Determining the Emissivity of Construction Materials	36
1.4 Heat Transfer in Building Structures	37
1.5 Thermal Transmittance of Building Structures	39
1.5.1 Thermal Transmittance of Homogeneous Building Structures	40
1.5.2 Thermal Transmittances of Simple Nonhomogeneous Building Structures	48
1.5.3 Heat Transfer and Thermal Transmittances of Building Structures with a Cavity or Gap	51
1.5.4 Heat Transfer in Greened Building Structures	66
1.5.5 Heat Transfer in Building Structures in Contact with the Ground	71
1.5.6 Heat Transfer in Building Structures with Thermal Bridges	83
1.5.7 Overall Thermal Transmittance of the Building Envelope	93
1.5.8 Determination of the Thermal Transmittances of the Building Structures on Built Objects	95
1.5.9 Determination of Thermal Irregularities in the Envelope for Built Buildings	99
1.6 Thermal Insulation of Technical Installations	100

1.7	Transient Heat-Transfer in Building Structures	102
1.7.1	Modelling Transient Heat Transfer in Building Structures	103
1.7.2	Causes of Transient Heat Transfer in Building Structures	107
1.7.3	Modelling of the Transient Heat Transfer in Building Structures	113
1.8	Indoor Thermal Comfort	127
1.8.1	Indoor Thermal Comfort Requirements	129
1.8.2	Combined Thermal Comfort Indicators	134
1.8.3	Subjective Sensation of Thermal Environment	139
1.8.4	Thermal Comfort, Health and Productivity	140
