Volume 2 (From Energy Storage to Photofunctional Materials)

Preface — V

List of contributors — XV

5 Energy storage and conversion — 1

5.1 Battery materials — 1

Michael Ghidui, Theodoor Hendriks, Wolfgang Zeier

5.2 Magnetocaloric materials — 12

Yaroslav Mudryk, Vitalij K. Pecharsky

5.3 Materials for thermoelectric devices — 26

Ananya Banik, Matthias Agne, Wolfgang Zeier

5.4 Hydrogen storage materials — 39

Holger Kohlmann, Leonhard Dorsch

5.5 Solar cell materials — 54

Konrad Mertens

5.6 Thermal energy storage materials — 69

Thomas Bauer

5.7 High-energy materials — 81

Thomas M. Klapötke

5.8 Nuclear materials — 96

Nils Haneklaus

6 Ionic solids — 101

6.1 Resources: minerals, recycling and urban mining — 101

Martin Bertau, Peter Fröhlich, Sandra Pavón

6.2 Phosphates — 131

Robert Glaum, Thomas Staffel

- 6.3 Borate applications — **153**
Hubert Huppertz, Raimund Ziegler
- 6.4 Slags as materials resource — **166**
Oliver Janka, Martin Bertau, Rainer Pöttgen
- 6.5 Salts in nutrition products — **179**
Heiko Hayen
- 6.6 Fertilizers — **192**
Robert Glaum
- 6.7 Natural and synthetic gemstones — **218**
Lothar Ackermann, Tom Stephan
- 7 Catalytic and active framework materials — 233**
 - 7.1 Homogeneous catalysis — **233**
Markus Seifert, Jan J. Weigand
 - 7.2 Heterogeneous catalysts — **264**
Klaus Stöwe
 - 7.3 Zeolites for ion exchange, adsorption and catalysis — **279**
Hubert Koller
 - 7.4 Metal-organic frameworks — **304**
Christoph Janiak
- 8 Photofunctional materials — 313**
 - 8.1 Solid-state lighting materials — **313**
Thomas Jüstel, Florian Baur
 - 8.2 Upconverters — **331**
Florian Baur, Thomas Jüstel
 - 8.3 Organometallic Ir(III) and Pt(II) complexes in phosphorescent OLEDs: an industrial perspective — **342**
Ilona Stengel, Stefan Schramm

- 8.4 Luminescent thermometry materials — **359**
Miroslav Dramicanin
- 8.5 Crystals for solid-state lasers — **371**
Christian Kränkel
- 8.6 NLO materials — **407**
Shilie Pan, Wenqi Jin, Zhihua Yang
- 8.7 Excimer, mercury and sodium dischargers — **454**
Manfred Salvermoser
- 8.8 Inorganic scintillators — **470**
Florian Baur, Thomas Jüstel

Subject index — 481

Formula index — 497

Volume 1 (From Construction Materials to Technical Gases)

1 Construction materials and coatings

- 1.1 Basics of cement chemistry
Peter Boos
- 1.2 Inorganic insulation materials
Rainer Pöttgen, Thomas Fickenscher
- 1.3 Conservation: silicon chemistry in building protection
Markus Boos
- 1.4 Inorganic pigments
Sascha Broll, Rainer Pöttgen, Cristian A. Strassert
- 1.5 Anodized aluminum and particle coatings
Thomas Jüstel, Konstantin Lider
- 1.6 Vitreous enamel
Jörg Wendel
- 1.7 Flame retardants
Andreas Termath

2 Metals and intermetallics

- 2.1 Resources: ores, recycling and urban mining
Martin Bertau
- 2.2 Special steels and alloys for industrial use
Rainer Behrens
- 2.3 Metallic light-weight alloys: Al, Ti, Mg
Oliver Janka
- 2.4 Copper and copper alloys
Bernd E. Langner
- 2.5 Solder materials in electronics
Jörg Trodler

- 2.6 Metallic coatings
Ralf Feser
- 2.7 Be and Be alloys
Magnus Buchner, Oliver Janka
- 2.8 Metals for implants and prosthesis
Detlef Behrend, Mareike Warkentin
- 2.9 Precious metals
Egbert Lox, Oliver Niehaus
- 2.10 Shape memory alloys
Stefan Engel, Oliver Janka
- 2.11 Bulk metallic glasses
Stefan Engel, Oliver Janka

3 Technical glasses

- 3.1 Ultra-strong glasses and glass-ceramics and bioactive materials
Hellmut Eckert, Martin Letz
- 3.2 Special glasses for optical and electrical device applications
Martin Letz, Hellmut Eckert
- 3.3 Glass fibers
Florian Winter

4 Technical gases

- Martin V. Dewalsky, Rainer Pöttgen

Volume 3 (From Magnetic to Bioactive Materials)

9 Electronic and magnetic materials

- 9.1 Semiconductors
Michael Bredol, Dominik Voigt
- 9.2 Superconductors
Dirk Johrendt
- 9.3 Inorganic materials for chemical sensors
Michael Schäferling
- 9.4 Transparent conducting oxides
Hideo Hosono
- 9.5 Inorganic detector materials
Wilfried Hermes, Robert Lovrincic, Thomas Jüstel, Rainer Pöttgen,
Cristian A. Strassert, Frank Busch
- 9.6 Soft magnets
Torsten Rieger
- 9.7 Permanent magnets
Martin Grönefeld, Iulian Teliban, Jacek Krzywinski
- 9.8 Data storage materials
Günter Reiss
- 9.9 Piezo- and pyroelectric materials
Adam Slabon

10 Technical ceramics and hard materials

- 10.1 Sanitary ceramics, tableware, porcelain
Marcel Engels, Christoph Piribauer
- 10.2 Separation membranes
Ingolf Voigt

10.3 Functional ceramics

Jan Werner

10.4 Structural ceramics

Nadja Kratz

10.5 Refractories

Peter Quirnbach, Almuth Sax

10.6 Carbides, borides, silicides

Markus F. Zumdick

10.7 Abrasives and hard transition metal oxides

Dominik Wilhelm

10.8 Surface hardening and hard coatings

Torben Buttler

11 Carbon- and sulfur-based materials

11.1 Carbon

Dogukan H. Apaydin, Bernhard C. Bayer, Jean-Charles Arnault,
Dominik Eder

11.2 Sulfur

Cristian A. Strassert, Rainer Pöttgen

12 Water, mineral acids and bases

Jens Haberkamp, Thomas Jüstel, Rainer Pöttgen

13 Biomedical and bioactive materials

13.1 Disinfection and inorganic biocides

13.1.1 Hydrogen peroxide and ozone

Rainer Pöttgen, Thomas Fickenschner

13.1.2 Chlorine-based disinfectants

Rainer Pöttgen, Cristian A. Strassert

13.1.3 Iodine-based disinfection materials

Jonas. R. Schmid, Christian Matschke, Sebastian Riedel

- 13.1.4 Copper-based biocides
Rainer Pöttgen, Thomas Fickenscher
- 13.1.5 Antifouling Coatings
Thomas Schupp
- 13.2 Radiotracers for diagnostic imaging
Andreas Faust
- 13.3 Radiotherapeutics
Andreas Faust
- 13.4 Active inorganic drugs and excipients
Fabian Herrmann
- 13.5 Inorganic biomaterials
Reinhard Maletz, Matthias Epple
- 14 Criticality of inorganic resources**
Michael Binnewies
- 15 Toxicology of inorganic compounds**
Thomas Schupp
- 16 Chemical products: gradients, energy balances, entropy**
Martin Bertau, Thomas Jüstel, Rainer Pöttgen, Cristian A. Strassert
