

Contents

Opening Address	Page 1
H. POWELL	
Data Acquisition in Mass Spectrometry	5
K. BIEMANN	
A Low-Cost Data Acquisition System for Use in Gas Chromatographic-Mass Spectrometers	23
J. A. HARDY AND R. I. REED	
A Simple Data Handling System for Gas Chromatography	29
R. L. ERSKINE AND N. G. McTAGGART	
Real-Time Peak Detection and Area Apportionment of Unknown Chromatograms	41
A. FOZARD, J. J. FRANCES, AND A. J. WYATT	
A GLC/Quadrupole MS/Computer System	50
J. BARGER, J. FARREN, R. HALLETT, J. HAWKE, D. A. SMITH, AND J. W. YOUREN	
Fourier Transform Spectroscopy	61
RICHARD R. ERNST	
The Application of Fourier Transformation NMR to the Measurement of Nuclear Relaxation Times	76
D. SHAW	
A Computer-Controlled Gas Chromatograph-Quadrupole Mass Spectrometer System	87
E. J. BONELLI, S. H. MULLER, AND R. D. SMITH	
A Fully Automated NMR Spectroscopy System	101
G. MICHEL, H. P. SAUTER, AND A. STUBLI	
Organization and Programming Techniques in a Petrochemical Laboratory under Real-Time Computer Control	112
C. B. LANCASTER, P. MITCHELL, AND A. R. L. MOSS	
Information Systems for Chemists	129
D. C. VEAL	
Computer Techniques at the Mass Spectrometry Data Centre	148
W. M. SCOTT AND R. G. RIDLEY	
Manipulation of Chemical Structural Formulae on Computers: the Present Position	155
M. A. T. ROGERS	

The Computer and Chemical Structure Classification: Applications of the Wiswesser Line-Formula Notation E. HYDE AND G. PALMER	174
On Machine Intelligence Applied to Chemical Problems THOMAS L. ISENHOUR AND PETER C. JURS	189
Infra-red Band Shapes and their Interpretation R. P. YOUNG	206
Numerical Simulation of Physico-chemical Systems L. V. WOODCOCK	215
"Monte Carlo" Computer Simulation of Chain Molecules. IV. Equilibrium Shapes of <i>n</i> -Alkane Molecules M. LAL AND D. SPENCER	234
The Use of Computers in the Analytical Laboratory J. M. SKINNER	253
An Operational Multi-Instrument Computer System A. C. POPPE	259
A Time-Sharing Computer System for Laboratory Automation J. G. HALLETT, P. A. LAWSON, D. RICHARDS, AND H. M. STANIER	270
