

CONTENTS

Introduction

| | | |
|-------------------|---|-----------|
| Section I | SYNFUELS: AN OVERVIEW | 1 |
| | <i>Outlook</i> | |
| | Slow launch for U.S. synfuels | 3 |
| | Synfuels bill is signed—amid some acrimony | 5 |
| | U.S. synfuels—an overview | 6 |
| | Synergy accents synfuels debate | 9 |
| | Energy: What are the best alternatives? | 13 |
| | <i>Projects</i> | |
| | DOE funds 79 synfuel projects | 18 |
| | DOE takes its pick of synfuels proposals | 19 |
| | Chemtators: Labor and equipment supplies/Capital expenditures | 21 |
| | <i>Manpower</i> | |
| | Synfuels: An engineering manpower crunch ahead? | 22 |
| | <i>Instrumentation</i> | |
| | Designers find answers for synfuels processing | 25 |
| | <i>Water</i> | |
| | Western water supply OK | 28 |
| | There's plenty of water for synfuels | 31 |
| | <i>Health/Safety</i> | |
| | No health risks are seen yet for synfuel workers | 32 |
| | Synfuels makers seek guidance on pollutants | 34 |
| | <i>Oxygen</i> | |
| | Synfuels market makes oxygen producers giddy | 36 |
| | <i>Recent Editorials</i> | 37 |
| Section II | COAL CONVERSION | 45 |
| | <i>General Challenges</i> | |
| | Coal conversion technology | 47 |
| | Materials, equipment for conversion of coal | 62 |

| | |
|---|-----|
| Materials challenges of coal liquefaction | 66 |
| Coal conversion: How to deal with valve problems | 71 |
| Biological, mechanical methods compete for wastewater-cleanup job | 73 |
| Looking at catalysts for improving liquefaction routes | 76 |
| Coal-liquefaction: Shooting for better catalysts | 78 |
| Solid/liquid separation routes are nearing demonstration stage | 81 |
| Guide to coal-cleaning methods | 83 |
| Feeding coal to pressurized systems | 86 |
| <i>Synthetic Gas</i> | |
| Gas-from-coal: An update | 90 |
| Deep coal: Don't bury it yet | 94 |
| Chemtator: In-situ coal gasification | 96 |
| Deep-coal gasification holds faraway promise | 97 |
| Substitute natural gas: Processes, equipment, costs | 99 |
| Methanation routes ready | 114 |
| Slagging gasifier aims for SNG market | 116 |
| Hygas at the crossroads | 118 |
| Coal-gasification project gets underway at TVA | 122 |
| World's biggest gasifiers set to come onstream | 123 |
| Rocket systems boost coal-conversion plans | 124 |
| Partial-oxidation plans turn to coal feed | 126 |
| Scaleup is being sought for entrained-flow route | 127 |
| Data deficiency hampers coal-gasification plant design | 128 |
| Energy-related meeting focuses on new routes | 132 |
| Breakthroughs ahead for cleaning hot gases? | 134 |
| <i>Liquids/Chemicals</i> | |
| <i>Fuels</i> | |
| A U.S./South African link for synfuels? | 137 |
| Coal technology reigns at AIChE gathering | 140 |
| Squeezing spent solvents to yield synthetic fuel oil | 143 |
| Jet fuel from coal: Feasible, but costly | 144 |
| <i>Solvent-Refined Coal</i> | |
| Pilot plant to upgrade coal | 145 |
| Solvent-refined coal keeps flue gas clean | 147 |
| Chemtators: Test burns of solvent-refined coal | 149 |
| Policy changes torpedo SRC-II | 150 |
| <i>Chemicals in General</i> | |
| Chemicals from coal: Management is the key | 151 |
| Synthetic gas and chemicals from coal: Economic appraisals | 154 |
| Predicting thermodynamic properties for fossil-fuel chemicals | 158 |
| <i>Methanol</i> | |
| Coal stars as 1980s methanol feed | 168 |
| Methanol from coal: cost projections to 1990 | 171 |
| A big boost for gasoline-from-methanol | 176 |
| Gasoline or olefins from an alcohol feed | 179 |
| Methanol supplies: Too much or too little | 182 |
| <i>Ammonia</i> | |
| Ammonia from coal | 186 |
| Ammonia from coal: A technical/economic review | 190 |
| New feeds and processes perk ammonia production | 193 |

| | |
|---|-----|
| <i>Outside the U.S.</i> | |
| Common Market boosts its spending on synthetic fuel | 197 |
| Coal research: Momentum builds in Germany, U.K. | 199 |
| Coal-based processes evaluated in Germany | 203 |
| India switches its thinking on synfuels-from-coal plant | 206 |
| The Netherlands aims to be the European coal hub | 207 |
| South Africa's CPI spending boom | 210 |
| Coal-to-chemicals in South Africa | 212 |
| South Africa gambles on coal | 213 |
| Imported technology still significant in Brazil's coal-gasification efforts | 215 |
| The Soviet Union pushes coal-liquefaction work | 216 |

| | |
|------------------------|-----|
| <i>Bits and Pieces</i> | |
| Gasification | 218 |
| Liquefaction | 228 |
| Chemicals | 231 |

Section III SHALE OIL

| | |
|---|-----|
| <i>Overview</i> | |
| Shale oil gets the final nod | 235 |
| Oil shale commercialization: The risks and the potential | 238 |
| Shale-oil development efforts quickening around the world | 243 |
| Shale oil—Process choices | 245 |
| Move's on to exploit rich Eastern oil shale | 248 |
| Soviet oil-shale processes offered for U.S. licensing | 249 |

| | |
|---|-----|
| <i>Outside the U.S.</i> | |
| Shale venture gains Down Under | 251 |
| Esso shakes up its Australian oil-shale plans | 252 |
| Brazil bleeds oil from rock | 253 |
| Brazil: An oil shale update | 254 |
| Israel sees shale as an energy solution | 256 |
| Israelis eye oil-shale resource | 257 |
| Will the U.S. play a part in Morocco's shale development? | 258 |

Section IV OIL SANDS

| | |
|--|-----|
| <i>Overview</i> | |
| Oil-sands route looks for jobs in Canada, U.S. | 263 |
| Mired oil-sand projects now on the move again | 264 |
| Giant oil-sands plant comes onstream | 267 |
| Tar-sand projects stuck | 270 |

| | |
|------------------------|-----|
| <i>Bits and Pieces</i> | 273 |
|------------------------|-----|

| | |
|--------------|-----|
| Index | 276 |
