Preface..... xv

Acknowledgments..... xvii

Authors..... xix

Chapter 1 Introduction..... 1

1.1 ANNs in Control..... 4

1.2 FL/S in Control 5

1.3 Evaluation of Aircraft Control–Pilot Interactions..... 6

1.4 Chapter Highlights 7

References..... 9

Chapter 2 Mathematical Model Building..... 11

2.1 Introduction 11

2.2 Mathematical Model Structures 15

2.2.1 TF Models..... 16

2.2.1.1 Continuous-Time Model 17

2.2.1.2 Discrete-Time Model 22

2.2.1.3 Delta Form TF..... 23

2.2.2 State-Space Models..... 26

2.2.2.1 State-Space Representations..... 28

2.2.2.2 General Model..... 33

2.2.3 Time-Series Models 34

2.3 Models for Noise/Error Processes..... 37

2.3.1 Continuous-Time/Discrete-Time White/Correlated Noise Processes..... 37

2.4 ANN Modeling 38

2.4.1 Feed Forward Neural Networks..... 42

2.4.2 A Training Algorithm for FFNN..... 42

2.4.3 Recurrent Neural Networks 44

2.5 FL-Based Modeling 45

2.5.1 Additive Fuzzy System..... 46

Epilogue 50

Exercises 50

References..... 51

Chapter 3 Equations of Motion..... 53

3.1 Introduction 53

3.2 Rigid Body EOM..... 54

3.3	Resolution of Inertial Forces and Moments	60
3.4	Resolution of Aerodynamics, Gravity Forces, and Thrust Forces	62
3.5	Complete Sets of EOM.....	67
3.5.1	Rectangular Form.....	68
3.5.2	Polar Form	69
3.6	Missile Dynamic Equations	71
3.7	Rotorcraft Dynamics	72
3.7.1	Momentum Theory	74
3.7.2	Blade-Element Theory	76
3.7.3	Rotorcraft Modeling Formulations	76
3.7.4	Limitations of Rigid Body Model	78
	Epilogue	79
	Exercises	79
	References	80

Chapter 4 Aerodynamic Derivatives and Modeling..... 83

4.1	Introduction	83
4.2	Basic Aerodynamic Forces and Moments	84
4.3	Aerodynamic Parameters	86
4.3.1	Definition of Aerodynamic Derivatives.....	87
4.3.2	Longitudinal Derivatives.....	90
4.3.3	Lateral-Directional Derivatives	100
4.3.4	Compound Lateral-Directional Derivatives.....	106
4.4	Missile Aerodynamic Derivatives.....	107
4.4.1	Longitudinal Derivatives.....	109
4.4.2	Lateral-Directional Derivatives	109
4.4.2.1	Roll Derivatives	109
4.4.2.2	Yaw Derivatives.....	110
4.5	Rotorcraft Aerodynamic Derivatives	111
4.6	Role of Derivatives in Aircraft Design Cycle and Flight Control Law Development.....	113
4.7	Aircraft Aerodynamic Models	116
	Epilogue	118
	Exercises	118
	References	119

Chapter 5 Simplification of Equations of Motion and Transfer-Function Analysis

5.1	Introduction.....	121
5.2	Strategies for Simplification.....	122
5.2.1	Choice of Coordinate Systems	122
5.2.2	Linearization of Model Equations	123
5.2.3	Simplification Using Measured Data.....	124

5.3	Longitudinal Models and Modes	125
5.3.1	Short Period Mode	128
5.3.2	Phugoid	133
5.4	Lateral-Directional Models and Modes	136
5.4.1	DR Mode	137
5.4.2	Spiral Mode.....	139
5.4.3	Roll Mode	140
5.5	Missile Aerodynamic Transfer Functions.....	142
5.6	Rotorcraft Linear Modeling	145
5.6.1	Rotor Plus Body Models	146
5.6.2	Stability Derivative Models	147
5.6.3	Rotor-Response Decomposition Models	148
5.6.4	Evaluation/Validation of Linear Flight Dynamics Models	149
5.7	UAV Dynamics.....	150
5.8	MAV Dynamics	151
5.9	Lighter-than-Air Vehicle/BLIMP Dynamics.....	153
	Epilogue	154
	Exercises	155
	References	156

Chapter 6 Simulation of Flight Dynamics 159

6.1	Introduction	159
6.2	Aircraft Subsystems Data/Models	163
6.2.1	Aero Database	164
6.2.2	Mass, Inertia, and Center of Gravity Characteristics.....	164
6.2.3	Instrumentation System.....	165
6.2.4	Inertial Navigation System	165
6.2.5	Flight Management System	165
6.2.6	Actuator Models.....	166
6.2.7	Engine Model.....	167
6.2.8	Landing Gear	168
6.2.9	Control Loading and Sound Simulation	168
6.2.10	Motion Cues.....	169
6.2.11	Turbulence and Gust Models.....	170
6.2.12	Sensor Modeling	170
6.2.13	Flight Dynamics.....	171
6.3	Steady-State Flight and Trim Conditions	171
6.3.1	Rate of Climb and Turn Coordination Flights	174
6.3.2	Computation of Linear Models for Control Law Design.....	176
6.4	Six DOF Simulation and Validation.....	178
6.4.1	Flight Simulation Model Validation for a Rotorcraft.....	180
6.4.2	Flight Simulation Model Validation Using the Concept of Coefficient Matching	181
6.4.3	Flight Simulation Model Validation Using Direct Update.....	183

6.5	PC MATLAB [®] /SIMULINK [®] -Based Simulation	184
	Epilogue	188
	Exercises	189
	References	190
Chapter 7	Flight Test Maneuvers and Database Management	193
7.1	Introduction	193
7.2	Planning of Flight Test Maneuvers	194
7.2.1	Flight Test Evaluation of a Transport Aircraft	196
7.2.2	Takeoff and Landing Tasks	196
7.2.2.1	Approach and Landing Task	196
7.2.2.2	Takeoff Task	197
7.2.3	Other Maneuvers	198
7.3	Specific Flight Test Data Generation and Analysis Aspects	198
7.3.1	Longitudinal Axis Data Generation	199
7.3.2	LD Data Generation	201
7.4	Quality of Flight Test Maneuvers	201
7.5	Input Signals for Exciting Maneuvers	202
7.5.1	Design Consideration for Input Signals	202
7.5.2	Specific Input Types	204
7.6	Specific Maneuvers for Aerodynamic Modeling	204
7.6.1	Small Amplitude Maneuvers	204
7.6.1.1	Longitudinal Short-Period Maneuver	205
7.6.1.2	Phugoid Maneuver	205
7.6.1.3	Thrust Input Maneuver	205
7.6.1.4	Flaps Input Maneuver	205
7.6.1.5	LD Maneuvers	206
7.6.1.6	Aileron Input Roll Maneuver	207
7.6.1.7	Rudder Input Maneuver	208
7.6.1.8	DR Maneuver	208
7.6.1.9	Steady Heading Sideslip Maneuver	208
7.6.2	Large Amplitude Maneuvers	208
7.7	Specific Dynamic Maneuvers for Determination of Drag Polars	211
7.7.1	Roller Coaster (Pullup/Pushover) Maneuver	213
7.7.2	SD Maneuver	213
7.7.3	Acceleration and Deceleration Maneuver	213
7.7.4	WUT Maneuver	214
7.8	Specific Maneuvers for Rotorcraft	217
7.9	Flight Test Database Management	219
7.9.1	Basic Requirements	220
7.9.2	Selection and Classification of Flight Data	220
7.9.2.1	Classification Based on Type of Maneuvers	220
7.9.2.2	Classification Based on Flight Conditions	221
7.9.2.3	Classification Based on Aircraft Configuration	221

7.9.3	Data Storage and Organization	221
7.9.4	Flight Test Database in Oracle	221
7.9.5	Brief Description of a Typical Program	225
7.9.5.1	Transactions	225
7.9.5.2	Graphs/Reports	225
7.9.5.3	User Maintenance.....	226
Epilogue		226
Exercises		226
References		228
Chapter 8	Reconfiguration and Fuzzy Control Analysis	229
8.1	Introduction	229
8.2	Requirements of Flight Control	229
8.3	Stability/Control Augmentation Strategies.....	233
8.4	Performance Requirements and Criteria.....	236
8.5	Procedure for the Design and Evaluation of Control Laws	236
8.6	Fuzzy Logic Control	238
8.7	Fault Detection, Identification, and Isolation.....	246
8.7.1	Models for Faults.....	246
8.8	Aircraft Reconfigurable/Restructurable Control System.....	247
8.8.1	Sensor Fault Detection Scheme	250
8.8.2	Actuator Fault Detection Scheme	253
8.8.2.1	Reconfiguration Concept.....	254
8.8.3	Non-Model-Based Approach	256
Epilogue		258
Exercises		259
References		260
Chapter 9	System Identification and Parameter Estimation	263
9.1	Introduction	263
9.2	System Identification.....	266
9.2.1	Time-Series/Regression Model Identification	266
9.2.2	Comparison of Several Model Order Criteria	268
9.2.3	Transfer Function Models from Real-Flight Data.....	271
9.2.4	Expert Systems for System Identification.....	272
9.3	Aircraft Parameter Estimation.....	272
9.3.1	Maneuvers, Measurements, and Mathematical Models.....	273
9.3.2	Parameter-Estimation Methods	274
9.3.2.1	Equation Error Method	274
9.3.2.2	Maximum Likelihood/OEM	275
9.3.2.3	Filtering Methods.....	279
9.3.2.4	Parameter-Estimation Approaches for Inherently Unstable/Augmented Aircraft.....	282

9.4	Determination of Stability and Control Derivatives from Flight Data—Case Studies	283
9.4.1	Fighter Aircraft FA1	284
9.4.2	Fighter Aircraft FA2	285
9.4.3	Basic and Modified Transport Aircraft	285
9.4.4	Trainer Aircraft	287
9.4.5	Light Canard Research Aircraft	288
9.4.6	Helicopter	288
9.4.7	AGARD Standard Model	290
9.4.8	Dynamic Wind-Tunnel Experiments	290
9.4.9	Iron Bird Results	291
9.5	Approaches for Determination of Drag Polars from Flight Data	292
9.5.1	Model-Based Approach for Determination of Drag Polar	293
9.5.2	Non-Model-Based Approach for Drag Polar Determination	293
9.6	Analysis of Large Amplitude Maneuver Data	294
9.7	Global Nonlinear Analytical Modeling	296
9.8	ANN-Based Parameter Estimation	298
9.8.1	FFNN Scheme	299
9.8.2	RNN for Parameter Estimation	300
9.9	Fuzzy Logic-Based Methods for Estimation	303
9.9.1	ANFIS for Parameter Estimation	303
9.9.2	Fuzzy Kalman Filter for State Estimation	305
9.9.2.1	Tracking of Maneuvering Target	309
9.10	Derivative-Free Kalman Filter for State Estimation	311
	Epilogue	317
	Exercises	317
	References	319
Chapter 10	Handling Qualities Analysis	323
10.1	Introduction	323
10.2	Pilot Opinion Rating	323
10.3	Human Operator Modeling	324
10.3.1	Motion Plus Visual and Only Visual Cue Experiments	325
10.4	Handling Qualities Criteria	328
10.4.1	Longitudinal HQ Criteria	329
10.4.1.1	Lower-Order Equivalent TF	329
10.4.1.2	Control Anticipation Parameter	329
10.4.1.3	Bandwidth Criterion	331
10.4.1.4	Neal-Smith Criterion	331
10.4.1.5	Closed Loop Criterion	332
10.4.1.6	Pitch Rate Response	332
10.4.1.7	C* Criterion	332
10.4.1.8	Gibson's Criteria	333
10.4.2	Lateral-Directional HQ Criteria	334
10.4.2.1	Lower-Order Equivalent TF	334

10.4.2.2	Roll Angle–Sideslip Mode Ratio.....	334
10.4.2.3	LD Modes	334
10.4.2.4	Roll Rate and Bank Angle Oscillations	335
10.4.2.5	Roll Performance	336
10.4.2.6	Sideslip Excursions.....	337
10.5	Evaluation of HQ Criteria.....	337
10.5.1	HQ for Large Transport Aircraft.....	337
10.5.2	Rotorcraft Handling Qualities	338
10.5.3	Handling Qualities Analysis Tool.....	340
10.5.3.1	Hover and Low-Speed Requirements (HLSR)—Pitch Axis Response Criteria	341
10.5.3.2	HLSR—Roll Axis Response Criteria	341
10.5.3.3	HLSR—Yaw Axis Response Criteria	343
10.5.3.4	HLSR—Heave Axis Response Criteria.....	343
10.6	HQ Aspects for Unmanned Aerial Vehicles.....	343
10.7	Pilot–Aircraft Interactions.....	345
10.7.1	Longitudinal PIO Criteria	345
10.7.1.1	Ralph–Smith Criterion	346
10.7.1.2	Smith–Geddes Criterion	346
10.7.1.3	Phase Rate Criterion	346
10.7.1.4	Loop Separation Parameter.....	347
10.7.1.5	Neal–Smith Time-Domain Criterion	347
10.7.1.6	Bandwidth PIO Criterion.....	347
10.7.2	Lateral PIO Criteria.....	347
10.7.2.1	Ralph–Smith	348
10.7.2.2	Phase Rate.....	348
10.8	Model Order Reduction for Evaluations of HQ	348
	Epilogue	349
	Exercises	349
