PREFACE	xi
CHAPTER 1 Introduction: Materials and Design	1
1.1 Introduction and Synopsis	1
1.2 Materials in Design	2
1.3 The Design Process	3
1.4 Types of Design	7
1.5 Design Tools and Materials Data	8
1.6 Function, Material, Shape and Process	10
1.7 Case Study: Devices to Open Corked Bottles	11
1.8 Summary and Conclusions	14
1.9 Further Reading	15
General Texts on Design Methodology	15
General Texts on Materials Selection in Design	16
And on Corks and Corkscrews	16
1.10 Exercises	17
CHAPTER 2 Engineering Materials and Their Properties	19
2.1 Introduction and Synopsis	19
2.2 The Families of Engineering Materials	20
2.3 Materials Information for Design	23
2.4 Material Properties and Their Units	25
2.5 Summary and Conclusions	46
2.6 Further Reading	47
2.7 Exercises	47
CHAPTER 3 Materials Property Charts	55
3.1 Introduction and Synopsis	56
3.2 Exploring Material Properties	56
3.3 The Material Property Charts	60

	3.4	Summary and Conclusions	97
	3.5	Further Reading	98
	3.6	Exercises	99
CHAPTER 4		Materials Selection – The Basics	105
	4.1	Introduction and Synopsis	106
	4.2	The Selection Strategy	107
	4.3	Attribute Limits and Material Indices	115
	4.4	The Selection Procedure	123
	4.5	Computer-Aided Selection	128
	4.6	The Structural Index	129
	4.7	Summary and Conclusions	131
	4.8	Further Reading	131
	4.9	Exercises	132
CHAPTER 5		Materials Selection – Case Studies	145
	5.1	Introduction and Synopsis	145
	5.2	Materials for Oars	146
	5.3	Mirrors for Large Telescopes	149
	5.4	Materials for Table Legs	154
	5.5	Cost: Structural Materials for Buildings	157
	5.6	Materials for Flywheels	162
	5.7	Materials for Springs	166
	5.8	Elastic Hinges and Couplings	170
	5.9	Materials for Seals	173
	5.10	Deflection-Limited Design with Brittle Polymers	176
	5.11	Safe Pressure Vessels	180
	5.12	Stiff, High Damping Materials for Shaker Tables	184
	5.13	Insulation for Short-Term Isothermal Containers	188
	5.14	Energy-Efficient Kiln Walls	191
	5.15	Materials for Passive Solar Heating	195
	5.16	Materials to Minimize Thermal Distortion in Precision Devices	198
	5.17	Materials for Heat Exchangers	201
	5.18	Heat Sinks for Hot Microchips	206
	5.19	Materials for Radomes	208
	5.20	Summary and Conclusions	213
CHAPTER 6		Processes and Their Effect on Properties	215
	6.1	Introduction and Synopsis	215
	6.2	Classifying Processes	217
	6.3	The Processes: Shaping, Joining, Finishing	220

6.4	Process—Property Trajectories	235
6.5	Summary and Conclusions	248
6.6	Further Reading	249
6.7	Exercises.....	250

CHAPTER 7	Processes Selection and Cost	253
7.1	Introduction and Synopsis	253
7.2	Process Selection: The Strategy.....	254
7.3	Implementing the Strategy: Selection Matrices.....	257
7.4	Limitations and Quality.....	262
7.5	Ranking: Process Cost	275
7.6	Computer-Aided Process Selection	280
7.7	Summary and Conclusions	280
7.8	Further Reading	282
7.9	Exercises.....	283

CHAPTER 8	Multiple Constraints and Conflicting Objectives	293
8.1	Introduction and Synopsis	293
8.2	Selection with Multiple Constraints.....	294
8.3	Conflicting Objectives	299
8.4	Summary and Conclusions	308
8.5	Further Reading	308
8.6	Appendix: Weight Factors and Fuzzy Methods.....	309
8.7	Exercises.....	313

CHAPTER 9	Multiple Constraints and Conflicting Objectives — Case Studies.....	323
9.1	Introduction and Synopsis	323
9.2	Multiple Constraints: Light Pressure Vessels	324
9.3	Multiple Constraints: Con-Rods for High-Performance Engines	326
9.4	Multiple Constraints: Windings for High-Field Magnets	332
9.5	Conflicting Objectives: Table Legs Again	335
9.6	Conflicting Objectives: Wafer-Thin Casings for Must-Have Electronics	337
9.7	Conflicting Objectives: Cost-Effective Bumpers.....	341
9.8	Conflicting Objectives: Materials for a Disk-Brake Caliper.....	343
9.9	Summary and Conclusions	347

CHAPTER 10	Selection of Material and Shape	349
10.1	Introduction and Synopsis	349
10.2	Shape Factors	351
10.3	Limits to Shape Efficiency	363
10.4	Exploring Material-Shape Combinations	367
10.5	Material Indices That Include Shape	369
10.6	Graphical Coselecting Using Indices	375
10.7	Architected Materials: Microscopic Shape	377
10.8	Summary and Conclusions	381
10.9	Further Reading	382
10.10	Exercises	383
 CHAPTER 11	 Material and Shape: Case Studies	 391
11.1	Introduction and Synopsis	391
11.2	Spars for Human-Powered Planes	392
11.3	Forks for a Racing Bicycle	396
11.4	Floor Joists: Wood, Bamboo or Steel?	399
11.5	Table Legs Yet Again: Thin or Light?	401
11.6	Increasing the Stiffness of Steel Sheet	403
11.7	Shapes that Flex: Leaf and Strand Structures	406
11.8	Ultra-Efficient Springs	407
11.9	Summary and Conclusions	411
 CHAPTER 12	 Designing Hybrid Materials	 413
12.1	Introduction and Synopsis	413
12.2	Holes in Material—Property Space	416
12.3	Key Concepts for Hybrid Design	417
12.4	Composites	427
12.5	Cellular Structures: Foams and Lattices	436
12.6	Sandwich Structures and Multilayers	445
12.7	Segmented Structures	457
12.8	Summary and Conclusions	457
12.9	Further Reading	457
	Hybrid Materials — General	457
12.10	Appendix: The Stiffness and Strength for MultiLayers	459
12.11	Exercises	462
 CHAPTER 13	 Hybrids: Case Studies	 469
13.1	Introduction and Synopsis	469
13.2	Designing Metal Matrix Composites	470

13.3	Natural Fiber Composites	472
13.4	Materials for Long-Span Power Cables.....	473
13.5	Conducting Elastomers	475
13.6	Extreme Combinations of Thermal and Electrical Conduction.....	477
13.7	Refrigerator Walls	479
13.8	Materials for Microwave-Transparent Enclosures	482
13.9	Connectors that Don't Relax Their Grip.....	484
13.10	Exploiting Anisotropy: Heat-Spreading Surfaces	486
13.11	The Mechanical Efficiency of Natural Materials	488
	Further Reading: Natural Materials.....	495

CHAPTER 14	Materials and the Environment	497
14.1	Introduction and Synopsis	497
14.2	The Material Life-Cycle	498
14.3	Material and Energy-Consuming Systems	499
14.4	The Eco-Attributes of Materials	500
14.5	Life-Cycle Assessment, Eco-Audits and Energy Fingerprints.....	505
14.6	Eco-Selection	509
14.7	Case Studies: Drink Containers and Crash Barriers.....	514
14.8	Summary and Conclusions	518
14.9	Further Reading	519
14.10	Exercises	519

CHAPTER 15	Materials and Industrial Design	527
15.1	Introduction and Synopsis	528
15.2	The Requirements Pyramid	528
15.3	Product Character	530
15.4	Using Materials and Processes to Create Product Personality.....	532
15.5	Case Studies: Analysing Product Personality	540
15.6	Summary and Conclusions	544
15.7	Further Reading	545
15.8	Exercises	546

CHAPTER 16	Sustainable Response to Forces for Change	555
16.1	Introduction and Synopsis	555
16.2	Market-Pull and Science-Push.....	557
16.3	Growing Population and Wealth, and Market Saturation....	562

16.4	Product Liability and Service Provision.....	562
16.5	The Information Economy, Critical Materials and Circularity	563
16.6	Response to Forces for Change: Sustainable Development.....	567
16.7	Summary and Conclusions	570
16.8	Further Reading	571
 APPENDIX A: DATA FOR ENGINEERING MATERIALS		573
APPENDIX B: USEFUL SOLUTIONS FOR STANDARD PROBLEMS		597
APPENDIX C: MATERIAL INDICES		633
INDEX		639
