## 1 Introduction 1

---

1.1 Definition 1  
1.2 Types of Turbomachines 1  
1.3 Applications of Turbomachines 3  
1.4 Performance Characteristics 6  
1.5 Method of Analysis 8  
1.6 Historical Evolution of Turbomachines 12  
1.7 Organization of the Book 14  
References 16

## 2 Dimensional Analysis 17

---

2.1 Dimensions and Dimensional Homogeneity 17  
2.2 Buckingham Pi Theorem 19  
2.3 Other Nondimensional Parameters for Turbomachines 25  
2.4 Similarity Laws 27  
References 32  
Problems 32

## 3 Energy Transfer in Turbomachines 34

---

3.1 Review of Fluid Mechanics Related to Turbomachinery 34  
3.2 Energy in Flowing Fluids 39  
3.3 Euler Equation 40  
3.4 Equations for Axial-Flow Machines 45  
3.5 Equations for Mixed- and Radial-Flow Machines 47  
3.6 Degree of Reaction 50  
References 56  
Problems 56

## 4 Centrifugal Pumps 59

---

4.1 Basic Construction and Classification 59  
4.2 Basic Working Principles 60  
4.3 Performance Characteristics 65  
4.4 Cavitation 66  
4.5 Performance Modifications 72  
4.6 Preliminary Design Procedure 77  
4.7 Pump Performance Tests 87  
4.8 Pumping Systems 92  
4.9 Pump Applications 97  
4.10 Pump Selection 100

References	105
Problems	106

## 5 Axial-Flow Pumps and Fans 109

5.1	Introduction	109
5.2	Flow over Isolated Airfoil	110
5.3	Axial-Flow Cascade	116
5.4	Preliminary Design Procedure	118
5.5	Three-Dimensional Flow Effects: Radial Equilibrium Requirement	124
5.6	Fan Test	127
5.7	Fan Application	129
5.8	Fans and Systems	133
5.9	Fan Selection	137
5.10	Propellers	145
References		146
Problems		147

## 6 Centrifugal Fans, Blowers, and Compressors 149

6.1	Classification	149	
6.2	Performance Parameters and Characteristics	150	
6.3	Change of Performance	158	
6.4	Polytropic Efficiency	162	
6.5	Preliminary Design of Centrifugal Fans	165	
6.6	Preliminary Design of Centrifugal Compressors	171	
6.7	Application of Centrifugal Compressors	179	
6.8	Selection of Compressors	184	
References		188	
Problems		189	

## 7 Axial-Flow Compressors 191

7.1	Introduction	191
7.2	Basic Theory	193
7.3	Preliminary Design of Compressor Stage	200
7.4	Determination of Stage Efficiency	204

7.5	Effects of Compressibility and Shock Waves	205
7.6	Axial-Flow Compressor Stage Performance	207
7.7	Surge and Stall in Compressor and Remedies	209

References	212
Problems	212

## 8 Gas Turbines 215

8.1	Introduction	215
8.2	Thermodynamics of Axial-Flow Turbine	218
8.3	Degree of Reaction	219
8.4	Preliminary Design Procedure for Turbine Stage	223
8.5	Determination of Turbine Stage Efficiency	226
8.6	Axial-Flow Turbine Performance	227
8.7	Compressor and Turbine Matching	232
8.8	Radial-Inflow Gas Turbine	237
8.9	Thermodynamic Processes in Radial-Inflow Gas Turbine	239
8.10	Other Topics Related to Gas Turbine Engine	243
8.11	Applications of Gas Turbine Engines	249
References		254
Problems		255

## 9 Steam Turbines 257

9.1	Introduction	257
9.2	Velocity-Compounded Stage	258
9.3	Classification of Steam Turbines	262
9.4	Steam Turbine Parameters and Performance	265
9.5	Cogeneration and Combined-Cycle Plants	270
References		274
Problems		274

**10 Hydraulic Turbines 275**

---

10.1	Introduction to Hydropower	275
10.2	Types of Hydraulic Turbines	276
10.3	Selection of Hydraulic Turbines	278
10.4	Hydraulic Turbine Performance Characteristics	285
10.5	Pelton Turbine	288
10.6	Francis Turbine and Kaplan Turbine	290
References		294
Problems		294

**11 Wind Turbines 296**

---

11.1	Introduction to Wind Power	296
11.2	Actuator Theory	299
11.3	Types of Wind Turbines	301
11.4	Wind Turbine Characteristics and Preliminary Design Analysis	304
11.5	Variable-Speed Performance of Wind Turbines	311
11.6	Wind Turbine Applications	312
References		314
Problems		315

**A Review On Thermodynamics and Compressible Flow 317**

---

A.1	Thermodynamic Properties	317
A.2	Thermodynamic Processes	318
A.3	Other Thermoflow Properties	321
A.4	Adiabatic Efficiencies of Flow Components	322
A.5	Thermodynamic Cycles	326
A.6	Thermodynamic Cycles of Gas Turbine Engines	327

A.7	Rankine Cycles with Vapor	335
A.8	Compressible Flow through a Channel	336
A.9	Normal Shock Waves	341
A.10	Oblique Shock Waves	345
Problems		348

**B Airfoil Characteristics 350**

---

B.1	Flow over Objects	350
B.2	Airfoil Geometry	351
B.3	NACA Airfoil Specifications	352

**C CFD Applications to Turbo-machine Design and Flow Analysis 356**

---

References	357
