

Contents

1	Introduction	1
1.1	Sound as a Wave	1
1.2	The Case of a Stretched String	4
1.2.1	Perfect Elastic String Under Tension	5
1.2.2	A Stretched String Under Point Load	7
1.3	Aerial Waves in Tubes and Closed Rooms	9
1.4	Relations Between Pressure, Density, and Velocity Fluctuations	14
1.5	Periodic Phenomena	14
1.6	Probability, Correlations, and Spectra	16
1.7	Units	19
1.8	Examples of Aircraft Noise	25
1.9	Examples of Vehicular Horns and Whistles	25
1.10	Sounds of Music	26
1.11	Exercises	29
2	Monopole, Dipole, and Quadrupole Models	31
2.1	Fluctuating Monopole	31
2.1.1	Fluctuating Point Mass Source	31
2.1.2	Wave Propagation of a Pulsating Balloon	33
2.1.3	Spherical Wave Propagation	36
2.2	Fluctuating Dipole	41
2.3	Fluctuating Quadrupole	46
2.4	Exercises	51
3	Lighthill's Theory of Aerodynamic Noise	53
3.1	Lighthill's Equation of Sound	53
3.2	Lighthill's Analogy	56
3.3	Green's Formulation for Wave and Poisson Equation	59
3.4	Exercises	60
4	Subsonic Jet Without Considering Convection	61
4.1	Dimensional Analysis by Lighthill	61

4.2	Self and Shear Noise	65
4.3	Estimation of Jet Noise by Proudman	70
4.4	Exercises	71
5	Subsonic Jet Noise (Including Effect of Convection)	73
5.1	Doppler Effect	74
5.2	Experimental Determination of the Convection Velocity	75
5.3	Sound of a Convected Quadrupole	76
5.4	Exercises	82
6	Computational Aeroacoustics	83
6.1	Numerical Nondissipative Schemes	85
6.2	Turbulence Flow Equations	89
6.2.1	Basic Governing Equations	89
6.2.2	Turbulence Flow Equations	90
6.2.3	Two-Equation Model	92
6.3	Numerical Solution of Acoustic Propagation of Turbulence	94
6.3.1	Numerical Solution Through Lighthill's Analogy	94
6.3.2	Kolmogorov Scale	96
6.3.3	Smagorinsky model	97
6.3.4	Kirchoff Surface Formulation	99
6.3.5	Boundary Conditions	101
6.4	Various Computational Aeroacoustic Methods	104
6.4.1	Direct Numerical Simulation and Direct Noise Computation Methods	104
6.4.2	Linearized Euler Equations	107
6.4.3	Limited Numerical Scales Concepts	109
6.4.4	Detached Eddy Simulation	110
6.4.5	Large Eddy Simulation	113
6.4.6	Reynolds-Averaged Navier–Stokes Equations	116
6.4.7	RANS-LES Simulation	117
6.4.8	Aeroelastic-Acoustic Simulation	121
6.5	Propeller Noise	122
6.6	Helicopter Noise	125
6.7	Exercises	127
7	Further Topics in Aerodynamic Noise	129
7.1	Supersonic Jet Noise	129
7.2	Sound at Solid Boundaries	133
7.3	Combustion Noise	134
7.4	Sonic Boom	135
7.5	Measurement Techniques	140
7.6	Reduction and Optimization Problems of Noise	142
7.7	Exercises	149
