
Table of Contents

Preface.....	xi
Author	xv
Foreword	xvii

Chapter 1 “Extra-Ordinary” Individuals and Groups of People	1
Introduction.....	1
Overview	2
Defining Ergonomics	2
Task Demands on the Person.....	2
Human Capabilities and Limitations	3
Defining “Extra-Ordinary” Individuals and Population Groups	3
A Day in the Life of My Mother	5
Differing From the Norm	6
Anthropometry	7
Anthropometry of the U.S. Population	7
Physical Capabilities	9
Ability To Do Strenuous Work	10
Muscle Strength.....	10
Thermoregulation of the Body	12
Capabilities of the Mind.....	15
The Nervous System	16
Sensors	17
Workload and Stress.....	17
Sensing the Environment.....	18
The Vision Sense.....	18
Mobility of the Eyes.....	19
Line of Sight.....	19
Size of the Visual Target	19
Visual Acuity	20
Accommodation.....	22
Visual Problems.....	22
The Hearing Sense	23
Hearing in Noise	24
The Senses of Smell and Taste.....	26
Smell	26
Taste	26
The Cutaneous Senses	27

Sensing Touch.....28

Sensing Warmth and Coldness.....28

Sensing Pain28

Research Needs29

Responding to Stimuli29

Reaction Time29

Motion Time.....30

Response Time30

Summary30

Chapter 2 Assessment Methods and Techniques33

Overview33

Measurement Teams33

Anthropometric Techniques.....34

Assessing Energetic Capabilities.....35

Assessing Muscle Strength.....37

Assessing Mental Workload39

Assessing Vision Capabilities.....40

Assessing Auditory Capabilities.....41

Assessing Smelling and Tasting Capabilities.....42

Odorants and Odors42

Gustation42

Assessing Taction Senses43

Assessing Response Times44

Reaction Time44

Motion Time.....45

Response Time46

Assessing Complex Capabilities46

Activities of Daily Living.....47

Systematic Gathering of Information.....48

Intrinsic Performance Elements.....48

The “Allied IPE” Model49

Review of Existing Assessments49

Gerontology50

Medicine50

Physiology51

Psychology.....51

Biomechanics.....52

Sports Sciences.....52

Anthropometry.....52

Rehabilitation Engineering.....53

Industrial Engineering53

Conclusions Drawn From the Review of Existing Tests54

Possible Solutions55

Summary55

Chapter 3 Principles of Human Factors Engineering.....57

Overview57

Striving for Better Designs.....57

 Designing for Safety58

 Designing for Ease of Use.....58

 Designing for Variability.....59

 Using Statistics.....61

 Phantoms, Ghosts, and the “Average Person” Manikin61

Proper Design Procedures64

 Single Cutoff65

 “Max *or* Min” Design65

 Dual Cutoff.....65

 “Min *and* Max” Design.....65

 Use of Average Values66

 How to Determine Critical Design Values66

 Statistical Procedures67

 Determining a Single Percentile as Cutoff Point (“Max *or* Min”)67

 Determining the Upper and Lower Limits of a Range

 (“Min” *and* “Max”)67

 Combining Anthropometric Data Sets69

 How to Get Missing Data70

Designing for Body Strength71

Designing the “Signal Loop”72

Designing for Groups of People and for Individuals76

Summary77

Chapter 4 Design for Movement: With Special Solutions for the Very Small and Big, for Those With Lower Back Problems, and for Bedridden Persons.....79

Overview79

Design for Motion Instead of Posture.....79

Design to Fit Body Dimensions.....86

Design for Very Small and Very Big People97

 What Data to Use?.....97

 Calculating Data.....98

 Measuring Data99

Design to Avoid Harm and Injury.....100

 Medical Errors.....100

 Repetition-Caused Injuries.....101

Low Back Problems.....	102
Beds and Chairs	104
Lift Belts	105
Nurses and Their Patients	105
Summary	107

Chapter 5 Design for Persons with Disabilities 109

Overview.....	109
Defining and Measuring Disabilities.....	109
Performance Impairments and Disabilities.....	110
Problem Identification Matrix.....	113
“Ergonomics for One”	113
Locomotion Aids	118
Wheelchairs	118
Automobiles	118
Use of Computers.....	120
Ergonomic Design of Telesupport Systems	122
Consumer Products.....	123
Selection of Assistive Technology.....	123
Sources of Information and Advice	124
Summary	125

Chapter 6 Design for Aging..... 127

Overview.....	127
What to Expect as One Ages	127
Demographics.....	127
Terminology	128
Life Expectancy	128
How We Age	128
“Successful Aging”	129
Aging-Related Changes and Their Ergonomic Counteractions.....	130
Changes in Anthropometry	130
Changes in Musculoskeletal Attributes	131
Changes in Respiration and Circulation.....	132
Changes in Nervous Functions	133
Changes in the Brain	133
Changes in the Capacity for Physical Work.....	134
Changes in Visual Functions	135
Eye Movements	135
Accommodation Problems	135
Less Light Passing Through the Pupil.....	136
Cataracts	136
Yellowing of Lens and Humor.....	136

Floaters, Veil, and Glare	136
Loss of Cones, Rods, or Retinal Pigment	137
Self-Reported Vision Problems	137
Recommended Checkups	137
Changes in Hearing	137
Changes in Taste and Smell	138
Changes in Somesthetic Sensitivity	138
Changes in Sensory and Psychomotor Performance	139
Designing for the Older Person	140
Designing for the Aging Eye	142
Designing for the Aging Driver and Passenger	143
Designing Computer Systems for the Aging	144
Designing Internet Health Information	146
Designing Living Quarters for the Aging	146
A Home Suitable for Older Persons	148
Kitchen	150
Bathroom	150
Bedroom	152
Designing Nursing Homes	152
Remodeling an Existing Habitat	154
Sources of Information and Advice	159
Summary	159
 Chapter 7 Design for Expectant Mothers	 163
Overview	163
Special Designs for Women?	163
Changes in Body Dimensions of Expectant Mothers	165
Using Seat Belts	167
Changes in Work Capacity During Pregnancy	169
Ergonomic Design Recommendations	172
Summary	172
 Chapter 8 Design for Children and Adolescents	 175
Overview	175
Children Grow Into Adolescents	175
Anthropometry of Children and Adolescents	176
Overweight and Obesity	178
Growing Bodies	179
Growth Charts	181
Body Mass of Children and Adolescents	183
Body Strength of Children and Adolescents	189
Designing for Children and Adolescents	190
Designing Safe Openings	191

Designing Furniture for Play and Work 192

 School Furniture 194

 Computer Play Stations and Workplaces 196

Summary 198

References 199

Appendix 221

Index 251
