<b>1 Important Regulations and Directives</b>	<b>1</b>
<b>2 Fundamental Dimensions and Units</b>	<b>6</b>
2.1 The Greek alphabet	6
2.2 Units systems	7
2.3 Conversions	8
2.4 Consistency of units	20
2.5 Foolproof conversions: using unity brackets	21
2.6 Imperial–metric conversions	22
2.7 Dimensional analysis	22
2.8 Essential mathematics	25
2.9 Useful references and standards	47
<b>3 Symbols and Notations</b>	<b>49</b>
3.1 Parameters and constants	49
3.2 Weights of gases	49
3.3 Densities of liquids at 0°C	50
3.4 Notation: aerodynamics and fluid mechanics	50
3.5 The International Standard Atmosphere (ISA)	56
<b>4 Aeronautical Definitions</b>	<b>66</b>
4.1 Forces and moments	66
4.2 Basic aircraft terminology	70
4.3 Helicopter terminology	71
4.4 Common aviation terms	72
4.5 Airspace terms	75
<b>5 Basic Fluid Mechanics</b>	<b>76</b>
5.1 Basic properties	76
5.2 Flow equations	79

5.3	Flow regimes	86
5.4	Boundary layers	88
5.5	Isentropic flow	89
5.6	Compressible 1D flow	90
5.7	Normal shock waves	91
5.8	Axisymmetric flow	93
5.9	Drag coefficients	94
<b>6</b>	<b>Basic Aerodynamics</b>	<b>96</b>
6.1	General airfoil theory	96
6.2	Airfoil coefficients	96
6.3	Pressure distributions	98
6.4	Aerodynamic centre	100
6.5	Centre of pressure	101
6.6	Supersonic conditions	102
6.7	Wing loading: semi-ellipse assumption	103
<b>7</b>	<b>Principles of Flight Dynamics</b>	<b>106</b>
7.1	Flight dynamics – conceptual breakdown	106
7.2	Axes notation	106
7.3	The generalized force equations	110
7.4	The generalized moment equations	110
7.5	Non-linear equations of motion	111
7.6	The linearized equations of motion	111
7.7	Stability	114
<b>8</b>	<b>Principles of Propulsion</b>	<b>115</b>
8.1	Propellers	115
8.2	The gas turbine engine: general principles	118
8.3	Engine data lists	126
8.4	Aero engine terminology	126
8.5	Power ratings	129
<b>9</b>	<b>Aircraft Performance</b>	<b>132</b>
9.1	Aircraft roles and operational profile	132
9.2	Aircraft range and endurance	136
9.3	Aircraft design studies	138
9.4	Aircraft noise	140
9.5	Aircraft emissions	144
<b>10</b>	<b>Aircraft Design and Construction</b>	<b>145</b>
10.1	Basic design configuration	145
10.2	Materials of construction	164
10.3	Helicopter design	165
10.4	Helicopter design studies	168

<b>11 Airport Design and Compatibility</b>	<b>173</b>
11.1 Basics of airport design	173
11.2 Runway pavements	196
11.3 Airport traffic data	197
11.4 FAA-AAS airport documents	197
11.5 Worldwide airport geographical data	205
11.6 Airport reference sources and bibliography	205
<b>12 Basic Mechanical Design</b>	<b>215</b>
12.1 Engineering abbreviations	215
12.2 Preferred numbers and preferred sizes	215
12.3 Datums and tolerances – principles	217
12.4 Toleranced dimensions	218
12.5 Limits and fits	223
12.6 Surface finish	227
12.7 Computer aided engineering	224
<b>13 Reference Sources</b>	<b>235</b>
13.1 Websites	235
13.2 Fluid mechanics and aerodynamics	235
13.3 Manufacturing/materials/structures	235
13.4 Aircraft sizing/multidisciplinary design	240
13.5 Helicopter technology	240
13.6 Flying wings	240
13.7 Noise	241
13.8 Landing gear	241
13.9 Airport operations	241
13.10 Propulsion	242
Appendix 1 Aerodynamic stability and control derivatives	243
Appendix 2 Aircraft response transfer functions	245
Appendix 3 Approximate expressions for dimensionless aerodynamic stability and control derivatives	247
Appendix 4 Compressible flow tables	253
Appendix 5 Shock wave data	261
Index	269
